Burden, 2003-07-07 This book represents an exciting intellectual meeting of researchers from diverse subfields to analyze how and why uncertainty affects American politics It seeks to reconnect research traditions that have seldom spoken to one another Though used by formal theorists empiricists and historians in a parallel fashion for a number of years the notion of uncertainty has often been introduced only to explain away anomalies provide backing for a larger argument or justify a particular methodology Uncertainty has rarely been considered in its own right or as a concept that might connect researchers from different subfields      **Managing Technological Change** Nancy M. Lorenzi, Robert T. Riley, 2013-03-14 The successful implementation of health information systems in complex health care organizations ultimately hinges on the receptivity and preparedness of the user Although the Information Age is well underway user resistance to information systems is still a valid concern facing the informatics community This book provides effective management strategies to health care administrators for the productive integration and maintenance of such information systems The Second Edition covers three main areas technical skills project management skills and organizational and people skills including the practical implementation strategies necessary to make the system an operational success The audience for this book consists of health care administrators CEOs clinicians IT developers librarians and professors      Delivering Public Services that Work Peter Middleton, 2010-03-09 Delivering Public Services that Work is a ground breaking book of Case Studies showing how Systems Thinking has been applied to a particular public service in six local authorities Each case study written by the manager or project leader responsible describes what was done how it was done and the results achieved The book makes extraordinary reading It began with John Seddon s 2008 book Systems Thinking in the Public Sector That book said in effect It s OK you re not mad Yes if you live in the UK what the Labour Government says is true It has massively increased spending on the public sector And your own experience is also correct The quality of public services has deteriorated Seddon went on to explain how this is possible showing that the system was at fault not the people delivering the services or the levels of funding He explained the obvious point that spending more money on the wrong thing won t help If your car won t start upgrading the tyres and getting a new exhaust fitted won t help Seddon s prescription then and now for the UK and for any other country using the quasi free market model for public services is this scrap the myth of choice because the public don t want a choice of hospitals they want a good hospital scrap targets because they don t work and people spend their time trying to massage the statistics scrap specifications because they re wrong and they don t work scrap inspections because they re expensive to do and to prepare for and they only serve to ensure that people are doing the wrong thing correctly meeting bad specifications scrap deliverology because it s nonsense scrap the obsession with sharing administrative and back office services in huge call centres and data warehouses because they don t work half as well as front offices where people talk to

the public scrap the Audit Commission because it s a white elephant scrap the centralised regime that oversees the disastrous public sector because it is the problem Then use systems thinking to understand and fix problems and deliver joined up public services that work better work faster save money delight the public and delight the people who deliver those services
