Astrofuturism De Witt Douglas Kilgore, 2010-08-03 *Astrofuturism Science Race and Visions of Utopia in Space* is the first full scale analysis of an aesthetic scientific and political movement that sought the amelioration of racial difference and social antagonisms through the conquest of space Drawing on the popular science writing and science fiction of an eclectic group of scientists engineers and popular writers De Witt Douglas Kilgore investigates how the American tradition of technological utopianism responded to the political upheavals of the twentieth century Founded in the imperial politics and utopian schemes of the nineteenth century astrofuturism envisions outer space as an endless frontier that offers solutions to the economic and political problems that dominate the modern world Its advocates use the conventions of technological and scientific conquest to consolidate or challenge the racial and gender hierarchies codified in narratives of exploration Because the icon of space carries both the imperatives of an imperial past and the democratic hopes of its erstwhile subjects its study exposes the ideals and contradictions endemic to American culture Kilgore argues that in the decades following the Second World War the subject of race became the most potent signifier of political crisis for the predominantly white and male ranks of astrofuturism In response to criticism inspired by the civil rights movement and the new left astrofuturists imagined space frontiers that could extend the reach of the human species and heal its historical wounds Their work both replicated dominant social presuppositions and supplied the resources necessary for the critical utopian projects that emerged from the antiracist socialist and feminist movements of the twentieth century This survey of diverse bodies of literature conveys the

dramatic and creative syntheses that astrofuturism envisions between people and machines social imperatives and political hope physical knowledge and technological power Bringing American studies utopian literature popular conceptions of race and gender and the cultural study of science and technology into dialogue Astrofuturism will provide scholars of American culture fans of science fiction and readers of science writing with fresh perspectives on both canonical and cutting edge astrofuturist visions

Space Exploration on Film Paul Meehan, 2022-05-24 Over the course of several decades scientific fact has overtaken science fiction as humankind's understanding of the universe has expanded Mirroring this development the cinematic depictions of space exploration over the last century have evolved from whimsical sci fi fantasies to more fact based portrayals This book chronologically examines 75 films that depict voyages into outer space and offers the historical cultural and scientific context of each These films range from Georges Melies fantastical *A Trip to the Moon* to speculative science fiction works such as *2001 A Space Odyssey* *Solaris* and *Contact* and fact based accounts of actual space missions as depicted in *The Right Stuff* *Apollo 13* *Salyut 7* and *First Man* Each film is analyzed not only in terms of its direction screenplay and other cinematic aspects but also its scientific and historical accuracy The works of acclaimed directors including Fritz Lang George Pal Stanley Kubrick Andrei Tarkovsky Robert Wise Ron Howard Robert Zemeckis Ridley Scott and Christopher Nolan are accorded special attention for their memorable contributions to this vital and evolving subgenre of science fiction film

Innocent Experiments Rebecca Onion, 2016-10-04 From the 1950s to the digital age Americans have pushed their children to live science minded lives cementing scientific discovery and youthful curiosity as inseparable ideals In this multifaceted work historian Rebecca Onion examines the rise of informal children's science education in the twentieth century from the proliferation of home chemistry sets after World War I to the century long boom in child centered science museums Onion looks at how the United States has increasingly focused its energies over the last century into producing young scientists outside of the classroom She shows that although Americans profess to believe that success in the sciences is synonymous with good citizenship this idea is deeply complicated in an era when scientific data is hotly contested and many Americans have a conflicted view of science itself These contradictions Onion explains can be understood by examining the histories of popular science and the development of ideas about American childhood She shows how the idealized concept of science has moved through the public consciousness and how the drive to make child scientists has deeply influenced American culture

Real Emotional Logic: Film and Television Docudrama As Persuasive Practice Steven N. Lipkin, 2002

Absinthe and Flamethrowers William Gurstelle, 2009-06 Written for reasonable risk takers and suburban dads who want to add more excitement to their lives this daring combination of science history and DIY projects explains why danger is good for you and details the art of living dangerously All of the projects from throwing knives drinking absinthe and eating fugu to cracking a bull whip learning baritsu and building a flamethrower have short learning curves are human focused as opposed to technology centric are affordable and demonstrate true but reasonable risk The guide maintains that risk takers are more successful more interesting individuals who lead more fulfilling lives What would the world be like if Thomas Edison retired after 30 years working for the railroad it asks instead of getting fired for blowing up a rail car with one of his experiments Though the manual doesn't advocate getting fired it does reveal that making black

powder is pure excitement Unlike watching an action movie or playing a video game real edgy life experience changes a person Each potentially life altering project includes step by step directions and illustrations along with sidebar tips from experts in the field

Mining Morality William P. George, 2019-10-11 Employing self sharpening tools found in the work of theologian and philosopher Bernard Lonergan Pope Francis encyclical *Laudato si* and international law William P George brings mining to personal and collective moral awareness by prospecting for ethics at selected sites 1 Butte Montana the Richest Hill on Earth once bound to Chuquicamata Chile by a company that spanned two continents and nearly owned a state 2 the tiny island nation of Nauru called Pleasant Island until it was devastated by phosphate mining and the breaking of a sacred trust by foreign powers 3 the deep seabed governed by the United Nations Law of the Sea a constitution for the oceans that regards much of the resource rich seabed as humankind's common heritage 4 Africa with its uranium mines but also its conflicts over what being nuclear means in the wake of colonialism apartheid and Hiroshima and 5 mineral rich asteroids speeding through space where mining rights are contested even as space entrepreneurs look to become the world's first trillionaires George introduces readers to remarkable moral miners the women of Butte and Chuquicamata a World Court judge from Sri Lanka and the Rocket Boys of Coalwood West Virginia to name a few and leads them to consider not only the morality of mining what's good and not so good about resource extraction but also the mining of morality a venture that Socrates called the examined life

Virtue and Vice in Popular Film Joseph H. Kupfer, 2021-05-03 This book addresses a prominent group of virtues and vices as portrayed in popular films to further our understanding of these moral character traits The discussions emphasize the interplay between the philosophical conception of the virtues and vices and the cinematic representations of character Joseph H Kupfer explores how fictional characters possessing certain moral strengths and weaknesses concretize our abstract understanding of them Because the actions that flow from these traits occur in cinematic contexts mirroring real world conditions the narrative portrayals of these moral characteristics can further our appreciation of their import Humility integrity and perseverance for example are depicted in *Chariots of Fire* *The Fabulous Baker Boys* and *Billy Elliot* while the vices of envy arrogance and vanity are captured in *Amadeus* *Whiplash* and *Young Adult* This interdisciplinary work in philosophy and film criticism will be of great interest to scholars and students of film studies philosophy of film ethics aesthetics and popular culture

The Century of Space Science J.A. Bleeker, Johannes Geiss, M. Huber, 2001 The 20th century can truly be called the Century of Space Science for it was in the 20th century that the multidisciplinary study of space science as opposed to astronomy was conceived Today as we start a new century of discovery we are able to cast our perspective back in order to chronicle how the field began review how it developed and discuss how it reached its current levels We are able to overview the historical development and to put early discoveries in context to document our current understanding and to look forward to the coming century with some degree of optimism One of the most attractive features of this young discipline is that many of the original pioneers and key players

involved are still available to describe their field. Hence at this point in history we are in a unique position to gain first hand insight into the field and its development. To this end *The Century of Space Science*, a scholarly authoritative reference book, presents a chapter by chapter retrospective of space science as studied in the 20th century. The level is academic and focuses on key discoveries, how these were arrived at, their scientific consequences, and how these discoveries advanced the thoughts of the key players involved. With over 90 world class contributors such as James Van Allen, Cornelis de Jager, Eugene Parker, Reimar Lüst and Ernst Stuhlinger, and with a Foreword by Lodewijk Woltjer, past ESO Director General, this book will be immensely useful to readers in the fields of space science, astronomy, and the history of science. Both academic institutions and researchers will find that this major reference work makes an invaluable addition to their collection. The work is published in two large format volumes and contains colour images throughout. It includes several appendices, for example a basic chronology of the field and a complete list of every space science mission ever launched, and is extensively and comprehensively indexed. The scientific editorial team consists of Johan A. M. Bleeker of SRON, The Netherlands; Johannes Geiss of the International Space Science Institute, Berne; and Martin Huber of ESA, and history consultant Arturo Russo of the University of Palermo, Italy.

Don't Blow Yourself Up Homer Hickam, 2021-10-19

Homer Hickam's memoir *Rocket Boys* and the movie adaptation *October Sky* have become one of the most popular stories in the world, inspiring millions to pursue a better life. But what happened to Homer after he was a West Virginia rocket boy? In his latest memoir, Homer recounts his life in college, where he built the world's biggest baddest game cannon, fought through some of the worst battles in Vietnam, became a scuba instructor, discovered sunken U-boats, wrote the definitive account of a World War II naval battle, befriended Tom Clancy, made a desperate attempt to save the passengers of a sunken river boat, trained the first Japanese astronauts, taught David Letterman to scuba dive, helped to fix the Hubble Space Telescope, wrote his number one bestselling *Rocket Boys*, and was on set during the making of *October Sky*. Although told with humor and wit, Hickam does not shy away from the pain and hardship endured and the mistakes he made during the tumultuous decades since his life in the town he made famous, Coalwood, West Virginia.
