

# How Stone Age Humans Made Hand Axes

1. The process started with a large piece of rock.

2. The humans roughly shaped the rock with a stone hammer.

3. Using a hammer made of wood, stone, or antler, they sharpened the edge.

4. They trimmed the edge by prying off tiny flakes with a pointed stick.

Ancient Building Technology, Volume 3: Construction (2 Vols) G.R.H. Wright, 2009-11-23 Building construction is the subject of this third part of the Ancient Building Technology set dealing with the history of building and building materials Beginning with the formulation of a project it goes on to discuss preliminary site surveying and setting out followed by building site development and its attendant installations and then examines the disposition of the various building materials in building construction from pre history to the end of antiquity

### **Ancient Building Technology, Vol. 2: Materials**

G.R.H. Wright, 2023-03-20 This summary study deals with building material which together with construction and structures forms one of the three aspects of building or equally one of the three factors which constitute the nature of a building Unlike existing manuals on ancient building this offers an analytic presentation and the subject matter extends across all ages and regions The treatment of materials is set out according to a paradigm of nature manufacture and use so as to facilitate direct comparison between different modes of the one material as also between different materials and between different building traditions This second part is published in two volumes the first containing texts the second more than 300 illustrations The print edition is available as a set of two volumes 9789004140073

### **The Bronze Age Towers at Bat, Sultanate of Oman**

Christopher P. Thornton, Charlotte M. Cable, Gregory L. Possehl, 2016-11-17 In the third millennium B C E the Oman Peninsula was the site of an important kingdom known in Akkadian texts as Magan which traded extensively with the Indus Civilization southern Iran the Persian Gulf states and southern Mesopotamia Excavations have been carried out in this region since the 1970s although the majority of studies have focused on mortuary monuments at the expense of settlement archaeology While domestic structures of the Bronze Age have been found and are the focus of current research at Bat most settlements dating from the third millennium B C E in Oman and the U A E are defined by the presence of large circular monuments made of mudbrick or stone that are traditionally called towers Whether these so called towers are defensive agricultural political or ritual structures has long been debated but very few comprehensive studies of these monuments have been attempted Between 2007 and 2012 the University of Pennsylvania Museum of Archaeology and Anthropology conducted excavations at the UNESCO World Heritage Site of Bat in the Sultanate of Oman under the direction of the late Gregory L. Possehl The focus of these years was on the monumental stone towers of the third millennium B C E looking at the when how and why of their construction through large scale excavation GIS aided survey and the application of radiocarbon dates This has been the most comprehensive study of nonmortuary Bronze Age monuments ever conducted on the Oman Peninsula and the results provide new insight into the formation and function of these impressive structures that surely formed the social and political nexus of Magan's kingdom
