Losing it Robert C. Yeager, 1980 **Financialization Of Daily Life** Randy Martin, 2002-10-18 While trillions of dollars came and went in the stock market boom of the 1990s the image of every man and woman a CEO may turn out to be the era's lasting legacy Business news once reserved to specialized papers or sections of the larger news of the day came to the forefront in cable television and in cultural images of how ordinary people through the internet and other avenues could not only master their financial life but move money and equity around with the ease of a financial titan Financialization of Daily Life looks at how this transformation occurred and how it is just now becoming a significant and troubling aspect of our political and cultural life Randy Martin takes us through all of the aspects of our financialization He examines how the shift in economic life arose not only from changes in culture but also from new policy priorities that emphasize controlling inflation over promoting growth He offers a close reading of self help literature that teaches parents how to rear financially literate children and to instruct adults in the fundamentals of fiscal management He examines just what a society that treats financial investment as a national past time really looks like and how that society is transforming the world In a country rocked by scandals in accounting and banking the identification ordinary citizens make with and the risk with which they engage in the stock market calls into question the very basis of our economic system Randy Martin spells out in clear terms the implications our financial doings and undoing have for the way we organize our lives and especially our money **How the Economy was Lost** Paul Craig Roberts, 2010 Paul Craig Roberts smooths out the rollercoaster of the US economy

Lost in Mall Lizzy van Leeuwen, 2011-01-01 In the 1980s sensational stories about an emerging new middle class popped up simultaneously in the streets of Jakarta and at conferences of hopeful Indonesia watchers Businesspeople and professionals had profited from President Suharto's rapid economic success and were allegedly eager to not only to show off their new wealth but to boost democratization processes as well They and their families were the vanguard of a category of Jakartans who regarded themselves boldly as the normal modern educated middle class of Indonesia against the background of a profound and state induced depoliticization Apart from fostering a new consumer culture the new middle class was at the root of the expansion of the conurbation Jabotabek housing hundreds of thousands of newly arrived middle class members Meanwhile a new and huge gap between rich and poor became conspicuously visible in Jakarta During the 1990s the increasing political instability of the New Order government and the Asian monetary crisis led to the dramatic resignation of President Suharto in May 1998 In this study based on extensive anthropological fieldwork throughout the 1990s this new middle class is examined as a socio cultural phenomenon Despite a global orientation and a taste for democracy its members seemed to have internalized the New Order along with some lingering late colonial notions as their guidelines for life How new was the new middle class anyway Lifestyle and material culture practices in the suburb of Bintaro Raya in public space as well as in the intimacy of living rooms illustrate the everyday ambiguity of people who appear to be trapped in their imagined middle classness they were lost in mall

Global Criminal and Sovereign Free Economies and the Demise of the Western Democracies Robert J. Bunker, Pamela Ligouri Bunker, 2014-09-15 Much has been written about the many economic benefits of globalization and the triumph and spread of democratic liberalism with the end of the Cold War following the demise of the Soviet Union This work takes issue with such wine and roses perspectives about the future of the Western democracies and their faith based views on the moral purity of a globalized marketplace It also questions many of the assumptions found in the status quo reinforcing discipline of international political economy IPE a discipline that focuses on the formal and legitimate economies and the facade they present that international relations and commerce is still dominated and dictated solely by the old Westphalian state centric system Having highlighted these concerns this book looks at two major themes The first theme focuses on the theoretical perception that a Dark Renaissance is taking place globally one in which the Western liberal democracies and its citizens are ill prepared to respond because it exists at the trans civilization level bridging the modern to the post modern world The second theme focuses on the actual process of state deconstruction that is taking place This process is leading to what may become the very undoing of the democracies Drawing together experts from a variety of backgrounds this work explores the increasing shift away from

Levack, 2022 Distrust of public institutions which reached critical proportions in Britain and the United States in the first two decades of the twenty first century was an important theme of public discourse in Britain and colonial America during the early modern period Demonstrating broad chronological and thematic range the historian Brian P Levack explains that trust in public institutions is more tenuous and difficult to restore once it has been betrayed than trust in one's family friends and neighbors because the vast majority of the populace do not personally know the officials who run large national institutions Institutional distrust shaped the political legal economic and religious history of England Scotland and the British colonies in America It provided a theoretical and rhetorical foundation for the two English revolutions of the seventeenth century and the American Revolution in the late eighteenth century It also inspired reforms of criminal procedure changes in the system of public credit and finance and challenges to the clergy who dominated the Church of England the Church of Scotland and the churches in the American colonies This study reveals striking parallels between the loss of trust in British and American institutions in the early modern period and the present day **American Government, Second Edition** Timothy O. Illusions Andreas Reckwitz, 2021-06-28 We live in a time of great uncertainty about the future Those heady days of the late twentieth century when the end of the Cold War seemed to be ushering in a new and more optimistic age now seem like a distant memory During the last couple of decades we ve been battered by one crisis after another and the idea that humanity is on a progressive path to a better future seems like an illusion It is only now that we can see clearly the real scope and structure of the profound shifts that Western societies have undergone over the last 30 years Classical industrial society has been transformed into a late modern society that is molded by polarization and paradoxes The pervasive singularization of the social the orientation toward the unique and exceptional generates systematic asymmetries and disparities and hence progress and unease go hand in hand Reckwitz examines this dual structure of singularization and polarization as it plays itself out in the different sectors of our societies and in so doing he outlines the central structural features of the present the new class society the characteristics of a postindustrial economy the conflict about culture and identity the exhaustion of the self resulting from the imperative to seek authentic fulfillment and the political crisis of liberalism Building on his path
