Noah And The Great Flood Jerry Blount, 2017-04-17 The apostle Peter warned us that in the last days before the end times there would be a new philosophy that would deny that there ever was a worldwide flood They would deny that God created the world the existence of God and the coming end time judgment by fire Today we see this taking place exactly as Peter had predicted This book provides proof of a Biblical worldwide flood and backs it up with geological data The information in this book offers evidence of creation by an omnipotent God and a global flood as God s judgment of a sinful world It provides evidence as to what the earth was like before the flood It was a world which after creation God had declared very good Even after the fall of man it was still paradise compared with the world we know today The effects of catastrophic worldwide flood changed this planet drastically This book also offers extensive proof that disproves the theory of evolution New scientific discoveries are showing that evolution is impossible Also contained in this book is considerable scientific evidence showing that the earth is only a few thousand years old This book may go against much of the popular scientific views of today but it does so with the evidence to back it The Bible gave us the history as well as the future of this world The scientific and geological data that is available today fits well within that Biblical framework In fact it fits within the Biblical framework much better than any theories the evolutionary community has come up with as this book will show

During the 1930s in the build up to the Second World War the Nazis established a band of specialists the SS Ahnenerbe under the command of Heinrich Himmler and Hermann Wirth. Their aim was nothing less than to prove the superiority of the Aryan race and with it the unique right of the German people to rule Europe. The occult figured as a key feature in many of these increasingly desperate quack research efforts. Part science part espionage and part fantasy. Archaeological expeditions were sent to Iceland, Tibet, Kafiristan, North Africa, Russia, the Far East, Egypt and even South America and the Arctic. The Nazi Ancestral Heritage Society's chief administrator was Dr Wolfram Sievers who cruelly conducted medical experiments on prisoners in concentration camps and was responsible for the looting of historic artefacts considered Germanic for return to Germany. He rewarded those academics that took part with high military office whilst those academics who contradicted or criticized the SS Ahnenerbe were carted off to concentration camps where they faced certain death. This book tells the true history of the real life villains behind the Indiana Jones movies. Sometimes truth really is stranger than fiction. **Traces on the Rhodian Shore** Clarence J. Glacken, 1976-08-24. In the history of Western thought men have persistently asked three questions concerning the habitable earth and their relationships to it. Is the earth which is obviously a fit environment for man and other organic life a purposefully made creation? Have its climates, its relief, the configuration of its continents influenced the moral and social nature of individuals and have they had an influence in molding the character and nature of human culture? In his long tenure of the earth in what manner has man changed it from its hypothetical pristine condition? From the time of the Greeks to our own answers to these questions have been and are being given so frequently and so continually that we may restate them in the form of general ideas: the idea of a designed earth, the idea of environmental influence and the idea of man as a geographic agent. These ideas have come from the general thought and experience of men but the first owes much to mythology, theology and philosophy, the second to pharmaceutical lore, medicine and weather observation, the third to the plans, activities and skills of everyday life such as cultivation, carpentry and weaving. The first two ideas were expressed frequently in antiquity, the third less so although it was implicit in many discussions which recognized the obvious fact that men through their arts, sciences and techniques had changed the physical environment about them. This magnum opus of Clarence Glacken explores all of these questions from Ancient Times to the End of the Eighteenth Century. **Do You Know the B.I.B.L.E.: Basic Instruction Before Leaving Earth**, **Gleanings of Glory Land** Bill French, 2006-11. **Earliest Christianity within the Boundaries of Judaism** Alan Avery-Peck, Craig A.
