Lyme Disease Molecular Immunological:

Cellular and Molecular Immunology Reece Davis, 2019-08-18 Immunology is a branch of biology that covers the study of immune systems in all organisms Cellular immunology is the study of the cells and molecules of an organism's immune system The field involves studying how those different cells and molecules work together to provide a defense against different types of pathogens To better understand cellular immunology researchers study both healthy immune systems and those that are actively fighting off pathogens comparing the differences and similarities of how the immune system's cellular physiology operates Molecular immunology is a subfield of immunology that aims to examine immune processes at a molecular level The immune system is the bodily system that responds to foreign entities such as bacteria or other infectious agents in the body The immune response that such a foreign entity triggers tends to be highly specific The body produces antibodies that are specifically designed to target a particular antigen or foreign body that triggers an immune response just as a single lock tends to be matched to a single key The field of molecular immunology exists to examine this and other aspects of immune response that are controlled at a molecular level Immunology is a fast evolving subject and attempt has been made in this work to keep it as much up to date as possible according to the requirement of the students and researchers in the field This book reviews the principles of immunology and provides basic concepts of it by extracting the important information on immunology and presents it in a concise uncluttered fashion to prepare students for their courses

Pharmacy prepares pharmacists for practice by providing a complete understanding of the basis of immunology and the
consequences of either suppressing or enhancing immune function It covers key subjects such as prophylaxis and vaccination
antibodies as therapeutic and diagnostic agents biological modifiers and the rationale for use and mechanisms of therapeutic
agents Written by experienced author and educator Dennis Flaherty this book presents topics with a logical step by step
approach explaining concepts and their practical application A companion Evolve website reinforces your understanding with
flashcards and animations Pharmacy specific coverage narrows the broad field of immunology to those areas most pertinent
and clinically relevant to pharmacy students 165 full color illustrations help to illuminate difficult concepts Factors That
Influence the Immune Response chapter covers biological agents including bacteria viruses and fungi and their related toxins
and how they relate to the immune system Three chapters on vaccinations prepare you for this important part of the
pharmacist s role by discussing cancer treatment with whole tumor vaccines cell vaccines and viral vector vaccines
describing other vaccines such as recombinant vaccines and plant vaccines and examining how diseases such as diphtheria
whooping cough and tetanus respond to vaccinations A summary of drugs used in treating each condition helps you
understand typical treatments and their immunological mechanisms so you can choose proper treatments Integrated
information makes it easier to understand how various parts of the immune system work together leading to a better

understanding of immunology as a whole A unique focus on practical application and critical thinking shows the interrelationship of concepts and makes it easier to apply theory to practice Information on AIDS covers the identification and treatment of both strains of HIV as well as AIDS preparing you for diseases you will see in practice Unique student friendly features simplify your study with learning objectives and key terms at the beginning of each chapter bulleted summaries and self assessment questions at the end of each chapter and a glossary at the back of the book Over 60 tables summarize and provide quick reference to important material A companion Evolve website includes animations and pharmacy terminology flashcards
