The Politics of Attracting Investment Chase C. Englund, 2024-12-27 This book

provides a tour through a novel theoretical approach to understanding the political economy of authoritarianism and the international market for capital investment. As the author demonstrates through an extensive series of analysis, success in attracting investment and ultimately fostering growth lies with the ability of the state to reduce investors' uncertainty. The author explores the market for FDI in nondemocratic states and finds that those states which feature reduced competition over policy between economic elites are more likely to attract investment inflows. However, these inflows are the result of incentives provided as private benefits for incumbent elites and tend to result in concentrated inflows. In Part II, this is contrasted with the way democratic states attract investment through institutional protections and public benefits. In this way, the author uncovers that authoritarian and democratic states achieve investor confidence through alternate paths to predictability: one based on eliminating opposition through political consolidation and the other based on impartial rules and legal protections designed to constrain the excesses of political competition. The theory's central premise is that the concentration of economic influence with fewer economic elites is corrosive to political competition and institutional quality, which carries huge significance for the study of both authoritarian and democratic governance quality.

**Risk Management in Emerging Markets** Sabri Boubaker, Bonnie Buchanan, Duc Khuong Nguyen, 2016-10-04. This book addresses three main dimensions of risk management in emerging markets: 1) the effectiveness of risk management practices; 2) current issues and challenges in risk assessment and modelling in emerging market countries; 3) the responses of emerging markets to the recent financial crises and the design of risk management models.

The Paradigm Shift from a Linear Economy to a Smart Circular Economy Mansoor Alaali, Abdalmuttaleb M. A. Musleh Al-Sartawi, Arafat Salih Aydiner, 2025-07-28. The concept of the circular economy has attracted the attention of scholars, researchers, professionals, and policymakers in recent years. The notion is characterised as an economy that intends to keep products, stocks, work in progress, and materials at their highest utility and value continually distinguishing between their technical and biological cycles. It is devised as a continuous positive development cycle that reserves and improves natural resources, optimizes outputs, and minimizes supply chain-related risks by overseeing limited stocks and renewable flows of the stocks. Several legislations and policies are being developed to motivate and integrate SDGs and net zero-related approaches in companies, among which the circular economy (CE) is gaining momentum due to its documented impact on the elements of the SDGs and net zero. Efficient management of resources and utility via artificial intelligence is vital towards a smart circular economy by minimising waste, losses, pollution, and extraction of virgin resources. It is important to note that there is a difference between smart and traditional circular economies. This book focuses on the former and makes distinctions in terms of how technology systems and solutions can be effectively and efficiently implemented. This book, *The Paradigm Shift from a Linear Economy to a Smart Circular Economy: The Role of Artificial Intelligence Enabled Systems, Solutions, and Legislations*, discusses the transition from linear to smart circular economy by dissecting the role of artificial intelligence and other technologies such as big data, IoT, and blockchain in such

transformations The book further aims to provide a platform for researchers professionals and students to closely investigate discuss and examine the theories philosophies ontologies and the role of governments policymakers and businesses in supporting the transition to a smart economy via national initiatives fiscal policies and corporate governance The book highlights the need for collaborative efforts between various actors including the private and public sectors through cross disciplinary approaches to attain maintain and sustain a smart circular economy

*The Legal Protection of Foreign Investments Against Political Risk* Thomas Nektarios Papanastasiou, 2015-08-19

The Legal Protection of Foreign Investments Against Political Risk examines how political risks associated with foreign direct investment in the energy sector are managed or mitigated and suggests new ways to deal with the possibility of such risk It applies its analysis using case studies and international law and examining actual contracts to the specific context of foreign investment in five Asian countries power infrastructure projects Legal protection of foreign investments against political risk has been a problem for a long time Professor Papanastasiou s book brilliantly balances the legitimate regulatory power of host states with legitimate business interests of foreign investors by presenting a neatly designed multi layered legal framework for political risk management This is an important contribution to both the study of international investment law and the practice of foreign investment business transactions Junji Nakagawa Professor of International Economic Law Institute of Social Science University of Tokyo Author International Harmonization of Economic Regulation Oxford University Press 2011 This book is an impressive and important entry into the field of international investment law scholarship While maintaining a focus on the important Japanese and Asian regions it also provides a general and up to date coverage of relevant international investment law and political risk considerations faced by multinational corporations It is impressively concise yet thorough it is practical yet takes into account relevant and recent legal scholarship it is well written and organized The ultimate goal is to help foreign investors and their advisors understand the current international investment law framework and climate to enable them to devise strategies to help their clients reduce political risk and to protect their clients property rights and investments This work should be of interest to in house counsel and international law practitioners as well as to law students and scholars for its coverage of current international investment law standards scholarship and practices N Stephan Kinsella Attorney Houston Texas Co author International Investment Political Risk and Dispute Resolution OUP 2005 This study contributes insightfully to the literature on international economics and in particular on the laws protecting foreign investment The book is unique in two ways First it analyzes and measures the impact of such multi tier legal frameworks as FTAs investment contracts FDI regulations and insurance by

combining legal interpretative tools and scoring techniques Second it adds a new narrative on how Japanese business can use law to secure investments from political risks in the energy sector of foreign countries Shujiro Urata Professor of International Economics Graduate School of Asian Pacific Studies Waseda University Co editor Economic Consequences of Globalization Evidence from East Asia Routledge 2012      The Operations of Chinese Infrastructure Multinationals in Africa Yuxuan Tang, 2021-08-26 The book aims to analyse and evaluate the strategic positioning of China's participation in terms of firm level performance in the generation of infrastructure capacity in African countries Africa counts among its development challenges a major bottleneck of infrastructure capacity and shortage of investable capital China's long period of high growth generates the strengths to secure availability of energy from Africa by enhancing infrastructure provision for the region To achieve this complementary macro level development beyond the traditional dimension of infrastructure provision ODA Chinese IMNEs become the vital players on the intersection of these processes Thus this research makes practical and analytical contributions to international business studies and development issues by making concrete the analysis of bilateral development processes from a macro context to a micro level framework e.g. focusing on ICT and construction sectors then fitting this into the real world story Infrastructure itself is a key element for potential investment and development processes Therefore how IMNEs achieve not only exist simply in a way of a commercial oriented investment but also in their implications for development and political related issues      *Towards Africa-oriented Risk Analysis Models* Korwa Gombe Adar, Richard O. Iroanya, F. O. C. Nwonwu, 2008 Risk analysis studies on Africa conducted by a number of international organisations have addressed a number of complex and interlocking socioeconomic and political issues largely painting a bleak picture of the continent These reports have been used by the Western countries as benchmarks for the flow of donor funds often with disastrous consequences The failure of the Structural Adjustment Programmes SAPs introduced by the Bretton Woods institutions in the 1970s and 1980s serve as a good example Taking cognisance of these interpretations the case studies in this volume have employed appropriate methodological conceptual and theoretical approaches with the objective of reaching balanced assessments on the underlying principles of risk and threat in Africa The authors take a more holistic view clearly defining the concept of risk and its corollaries and going beyond the somewhat limited view of those organisations which apply largely Eurocentric values to their assessments      Cultural Barriers to the Success of Foreign Media Content Ulrike Rohn, 2009 What media content attracts audiences across cultures and what does not What does the cross cultural audience demand depend on The author takes a new approach to understanding cultural barriers to the success of foreign media content by analyzing the entry strategies of Time Warner Disney Viacom News Corporation and Bertelsmann with regard to China India and Japan in terms of their respective localization efforts In depth interviews with companies representatives give an insight into how they view the need for locally produced media in these countries The author develops and employs the Lacuna and Universal Model that provides a new theoretical classification of reasons for the

cross cultural success and failure of media content as well as the Vertical Barrier Chain that locates cultural barriers in the wider context of legal political and economic barriers to successful entry into foreign media markets     International Business in the 21st Century Bruce D. Keillor,Vijay R. Kannan,2011-05-04 This comprehensive three volume set covers every aspect of international business operations and offers a detailed discussion of important issues looming on the horizon Covering an array of topics critical to today s business leader International Business in the 21st Century is comprised of three volumes The first volume Are You Ready Preparing for International Operations covers issues related to establishing an international business including assessing your export readiness and finding financing Volume two Going Global Implementing International Business Operations is about actually getting your business up and running Volume three Staying on Top Crucial Issues for International Business in the 21st Century discusses the many things that impact anyone doing business in the international arena from cultural differences to the challenges of international threats and terrorism Bridging the gap between the business world and the academic world the set provides a comprehensive breakdown of the specific topic areas associated with firm preparedness improving efficiencies and the often overlooked areas of operational risk With this set in hand business leaders will better understand how to get involved and how to stay ahead of the curve in international markets     Vanquished Peace Gerrie SwartA,2010-11-30 The Democratic Republic of the Congo has endured a long difficult and brutal chapter in its history of independence characterized by chaos turmoil instability violence conflict and one of the most brutal wars Africa has witnessed to date It is regrettably a chapter that has defied a satisfactory and peaceful conclusion and one that continues to be written each and every day adding further casualties in its wake with each passing year As the country prepared to celebrate its 50th anniversary of independence on 30 June 2010 from erstwhile colonial power Belgium there is a real danger that the politics of forgetting could once again set in forgetting that this vast country is nowhere near being at peace with itself and the rest of the Great Lakes Region The country had accumulated a history of protracted violence with little or no shared experience of genuine peace to offset these negative interactions Throughout its various incarnations as the Congo Free State 1885 1908 the Belgian Congo 1908 1960 the Congo Republic 1960 1971 Zaire 1971 1997 and finally the Democratic Republic of the Congo since 1997 an enduring feature and image that has held sway in all narratives has been that of an entity immersed in an unrelenting sense of statelessness further embedded in a perpetual state of chaos At the turn of the twenty first century Congo had become the veritable epicentre of conflict in Africa and the dearth of peaceful coexistence in the country has vividly revealed the numerous flaws that peace can possess if it is devoid of structural stability integrity and most importantly the ability to address the underlying causes and factors that continue to foment and facilitate conflict to take place in this war torn nation The aim of this volume is to serve as an audit and appraisal of the DRC s post conflict peace dividend in particular to undertake a post peace accord appraisal of the various gains achieved and also the numerous setbacks that continue to challenge the behemoth that is the Democratic Republic of the

Congo in its long and arduous journey to peace prosperity and national unity An observation that could be made from the very outset of this analysis is that the ideals of a positive sustainable let alone perpetual peace in the Congo has largely been a vision etched on numerous paper peace agreements yet remains largely unfulfilled in Congolese citizens everyday reality Even where some laudable progress has been made the threat of large scale reversal and a return to full scale conflict and combat remain omnipresent

*Law, Bubbles, and Financial Regulation* Erik F. Gerding, 2013-12-04 Financial regulation can fail when it is needed the most The dynamics of asset price bubbles weaken financial regulation just as financial markets begin to overheat and the risk of crisis spikes At the same time the failure of financial regulations adds further fuel to a bubble This book examines the interaction of bubbles and financial regulation It explores the ways in which bubbles lead to the failure of financial regulation by outlining five dynamics which it collectively labels the Regulatory Instability Hypothesis The book concludes by outlining approaches to make financial regulation more resilient to these dynamics that undermine law
