Handbook of Education Policy Research
Gary Sykes, Barbara Schneider, David N. Plank, 2012-09-10
Co-published by Routledge for the American Educational Research Association (AERA). Educational policy continues to be of major concern. Policy debates about economic growth and national competitiveness, for example, commonly focus on the importance of human capital and a highly educated workforce. Defining the theoretical boundaries and methodological approaches of education policy research are the two primary themes of this comprehensive AERA-sponsored Handbook. Organized into seven sections, the Handbook focuses on: 1. disciplinary foundations of educational policy; 2. methodological perspectives; 3. the policy process; 4. resources management and organization; 5. teaching and learning policy; 6. actors and institutions; and 7. education access and differentiation. Drawing from multiple disciplines, the Handbook's over one hundred authors address three central questions: What policy issues and questions have oriented current policy research? What research strategies and methods have proven most fruitful? And what issues, questions and methods will drive future policy research? Topics such as early childhood education, school choice, access to higher education, teacher accountability and testing and measurement cut across the 63 chapters in the volume. The politics surrounding these and other issues are objectively analyzed by authors and commentators. Each of the seven sections concludes with two commentaries by leading scholars in the field. The first considers the current state of policy design and the second addresses the current state of policy research. This book is appropriate for scholars and graduate students working in the field of education policy and for the growing number of academic, government and think tank researchers engaged in policy research. Making Public Policy Decisions Damon Alexander, Jenny Lewis, 2014-12-05 To understand public policy decisions it is imperative to understand the capacities of the individual actors who are making them how they think and feel about their role and what drives and motivates them However the current literature takes little account of this preferring instead to frame the decisions as the outcomes of a rational search for value maximising alternatives or the result of systematic and well ordered institutional and organisational processes Yet understanding how personal and emotional factors interact with broader institutional and organisational influences to shape the deliberations and behaviour of politicians and bureaucrats is paramount if we are to construct a more useful nuanced and dynamic picture of government decision making This book draws on a variety of approaches to examine individuals working in contemporary government from freshly trained policy officers to former cabinet ministers and prime ministers It provides important new insights into how those in government navigate their way through complex issues and decisions based on developed expertise that fuses formal rational techniques with other learned behaviours memories emotions and practiced forms of judgment at an individual level This innovative collection from leading academics across
