*War on Terrorism* Alan O'Day, 2017-09-08 President George W Bush maintained in his address of 20 September 2001 that the successful prosecution of the war against terrorism will require the judicious use of every resource at our command every means of diplomacy every tool of intelligence every instrument of law enforcement every financial influence and every necessary weapon of war Unlike the Cold War the War on Terrorism is neither a battle against some ideology nor bounded by physical boundaries or conventional political units such as nation states The War on Terrorism is the internationalisation or rather globalisation of previous wars Terror is not a nation and the enemies in such wars are not nations any regime such as Libya simply by repudiating terrorism can become an ally of the anti terror coalition Regimes that continue to practice terrorism against domestic opponents qualify to participate in the wider war if they conform to certain norms in external affairs The 28 articles reprinted here consider aspects of that most amorphous of animals the War on Terrorism They do not set out to provide all of the answers nor do they radiate a unified vision of what constitutes the war on terrorism the pieces begin from a range of political and intellectual outlooks Taken as a group however the difficulties of determining the limits and nature of the war on terrorism receive important attention The authors address several major themes within the war on terrorism what falls within its perimeters its shifting manifestations implications responses and future directions

**Security and Defence in Europe** J. Martín Ramírez, Jerzy Biziewski, 2019-05-24 This book argues that security and defense have never been true priorities in the European Union and have constantly been marginalized by the elites since the Soviet Union collapsed and the Warsaw Pact disintegrated Despite the official rhetoric only a few tangible results can be presented concerning the operational readiness of European forces and the EU's inability to act was proven during the crises in the Balkans NATO has experienced similar problems as the majority of its members are EU countries Both organizations have declared their resolve concerning the security and defense of their nations and territories but unfortunately little has been done to lend these statements credence In this context the book analyzes several aspects of EU security and defense including the EU NATO relationship common defense policy and strategy common capability building common understanding of strategic changes common operational planning and centrally synchronized exercises based on operational planning etc The member states have helped to make EU NATO effective organizations but unfortunately their individual interests and priorities constitute real challenges This aspect should be discussed and addressed by political and military elites scholars analysts students and

the general public alike      European Integration as an Elite Process Max Haller, 2008-05-05 Max Haller's impressive book presents an analysis of the process of European integration which keeps the relation between elites and citizens at the forefront. It is shown on the basis of new empirical data, surveys, interviews, analyses of documents and biographies that European integration has been led since the beginning by the elites and that today there exists a considerable split between elites and citizens; this split is becoming more profound in the course of time. The book covers the following themes: the structure, interests and behaviour of the different elites; political, economic, bureaucratic, the expectations and perceptions of the populations concerning the integration process and the elites; the strategies of the elites to win the consent of the people in view of widespread scepticism; proposals for reform of the EU especially with regard to a strengthening of democratic elements which could reduce the split between elites and citizens. A timely and original read; this book will be a useful addition to the library of any political sociologist, political scientist or scholar of European integration.      *The Vital Partnership* Simon Serfaty, 2007-03-26 *The Vital Partnership* is a political, historical and intellectual assessment of the transatlantic relationship between the United States and Europe that is, according to Simon Serfaty, clearly at a crossroads. Serfaty calls on the Bush administration to work with the Europeans to craft a new transatlantic charter which will require three things: the EU and member states must assume a larger role in global relations; NATO must be willing and able to act locally to protect European security; America and the EU must implement a strategic security compact in the post 9/11 world.

**Democracy Promotion and Foreign Policy** D. Huber, 2015-04-26 Democracy promotion is an established principle in US and EU foreign policies today, but how did it become so? This comparative study explores the promotion of democracy, focusing on exponents from emerging democracies alongside more established Western models and investigates the impact of democratic interests on foreign policy.      **Governance and Leadership in Shrinking Cities** Stanisław

Mazur, 2023-08-24 The aim of this publication is to look in depth at depopulation, a trend that is affecting an increasing number of cities worldwide. It has recently become a critical issue with a range of detrimental social, economic, spatial and financial consequences. However, attempts by central and local governments to combat depopulation have yet to yield satisfactory results. Compelling evidence suggests that one of the reasons for this state of affairs is that the role of local urban leadership in devising solutions, mobilizing resources and creating networks to address the problem has been underestimated. Moreover, according to the authors of this monograph, there is a significant positive correlation between urban leadership and the ability to effectively respond to and counteract the negative effects of depopulation. Without an understanding of the impact of urban leadership on the ability to address the negative consequences of urban depopulation, it is impossible to pursue effective public policies in this regard. This book presents a novel approach to explaining the ability of cities to combat depopulation through the prism of urban leadership quality. It compares domestic empirical research findings with international case studies and offers a comprehensive review of valuable practices to counter urban shrinkage and

depopulation from both academic and practical perspectives Further the book provides a new interpretation of the processes associated with these trends The magnitude of the phenomenon in question the negative spatial economic and social consequences as well as the relatively low effectiveness of policies aimed at its mitigation will make this book an invaluable guide for researchers and students from a wide range of disciplines including urban studies economics public management leadership studies local government climate change and energy transition and urban movements The audience will also comprise of policymakers and urban experts such as sociologists planners social geographers economists and architects

**Law in a New Key** Amitai Etzioni, 2010-12-01 A book for thoughtful readers and not particularly lawyers or scholars of law and society who are engaged in the issues of the day and want something other than easy answers from the right and left Most issues of law and social policy can be understood better through a lens that balances rights and interests and protects all of us while protecting each of us says renowned communitarian sociologist Amitai Etzioni in his latest of 30 books In Law in a New Key Etzioni addresses hot bed issues of terrorism drone warfare airport security and scanners government surveillance norms of social disapproval and forgiveness human rights and respect for ethnic cultural differences He shares his perspective as one who has fought in a resistance and then later became a professor at Columbia University and The George Washington University The perspective and his decades of academic research persuaded him that the answer to thorny legal and policy issues is found neither in unyielding devotion to individual rights at all costs nor in reflexive empowerment of the state in times of crisis and pain The answer is in moral dialogs respect for the basic right to life and security responsible checks on power and a balancing of interests that all must be seen as legitimate in a world of pundits and partisans who favor one right What good is the right to privacy if the basic right to live is sacrificed as the right holder is blown out of the sky If new technologies make it possible to conduct terrorism and crime without the law catching up to them What happens when respect for one religious position means choosing among religious positions A collection of 15 trenchant essays drawn from the popular press and academic journals yet accessible to a spectrum of readers who care about the key issues of the day and see the complexity in them Law in a New Key takes a fresh look at so many important topics that need examination through a community concerned lens The frame gives contours and substance to today's debates without offering the usual entrenched policy solutions of kneejerk partisans Etzioni asks such questions frankly and on a variety of topics that matter Rights carry responsibilities and freedom and human rights must put living first in a world that does not always concede that self evident proposition It is book about law and society whose time has come For many readers the social and legal notes he plays will finally sound in their register

Management of International Institutions and NGOs  
Eduardo Missoni, Daniele Alesani, 2013-12-17 International Institutions IIs International NGOs INGOs and Transnational Hybrid Organizations THOs play a hugely important role in the modern world economy Despite having been studied by scholars from a range of disciplines these organizations have never before been approached from a management perspective

This ambitious book analyzes the management challenges associated with international cooperation and sheds light on how these organizations have evolved as the political economic and business environments have changed around them. Covering an admirably broad canvas, the authors pursue two main objectives. Firstly, they explore the main management frameworks developed in the context of the corporate and national public non-profit organizations and adapt them to the specificity of IIs and INGOs. This leads to the identification of a tailored approach to IO management based on their institutional and operational settings, stakeholder groups, core business, staff profile, and financial arrangements. Secondly, they bring theory into practice by linking frameworks to several case studies and best practices of organizations currently experimenting with management systems and tools, with case studies including the World Bank and the Gates Foundation. This comprehensive textbook is a must own resource for students and academics involved with studying and working with international organizations.

*Patterns of Disintegration. The EU and the Emerging European Order* Federico Nicolaci, 2012-08-15

Paraphrasing Marx, one could say that a spectre is hunting Europe: the spectre of disintegration. The crisis of the Monetary Union, the pinnacle of European integration, seems to call into question the core assumption of more than half a century of Europe's integration history: the functionalist idea that economic integration would be self-sustaining and would ultimately lead to the emergence of a political community. This book presents evidence suggesting that the current crisis is not an accidental snag but the collapse of the ideological architecture of Europe, showing that the disintegrating dynamics threatening the EU are structurally determined.

**Creating European Citizens** Willem Maas, 2007-02

Exploring a key aspect of European integration, this clear and thoughtful book considers the remarkable experiment with common rights and citizenship in the EU. Explaining this innovation, why states cede their sovereignty and eradicate or redefine the boundaries of the politic.

**Topographies of Suffering** Jessica Rapson, 2015-08-01

Commentary on memorials to the Holocaust has been plagued with a sense of monument fatigue: a feeling that landscape settings and national spaces provide little opportunity for meaningful engagement between present visitors and past victims. This book examines the Holocaust via three sites of murder by the Nazis: the former concentration camp at Buchenwald, Germany; the mass grave at Babi Yar, Ukraine; and the razed village of Lidice, Czech Republic. Bringing together recent scholarship from cultural memory and cultural geography, the author focuses on the way these violent histories are remembered, allowing these sites to emerge as dynamic transcultural landscapes of encounter in which difficult pasts can be represented and comprehended in the present. This leads to an examination of the role of the environment, or more particularly, the ways in which the natural environment co-opted in the process of killing becomes a medium for remembrance.

Mapping the Transnational World Emanuel

Deutschmann, 2022-01-25

A study of the structure, growth, and future of transnational human travel and communication. Increasingly, people travel and communicate across borders. Yet we still know little about the overall structure of this transnational world. Is it really a fully globalized world in which everything is linked, as popular catchphrases like "global

village suggest Through a sweeping comparative analysis of eight types of mobility and communication among countries worldwide from migration and tourism to Facebook friendships and phone calls Mapping the Transnational World demonstrates that our behavior is actually regionalized not globalized Emanuel Deutschmann shows that transnational activity within world regions is not so much the outcome of political cultural or economic factors but is driven primarily by geographic distance He explains that the spatial structure of transnational human activity follows a simple mathematical function the power law a pattern that also fits the movements of many other animal species on the planet Moreover this pattern remained extremely stable during the five decades studied 1960 to 2010 Unveiling proximity induced regionalism as a major feature of planet scale networks of transnational human activity Deutschmann provides a crucial corrective to several fields of research Revealing why a truly global society is unlikely to emerge Mapping the Transnational World highlights the essential role of interaction beyond borders on a planet that remains spatially fragmented *The Responsive Community* ,2001 *The New World Architecture* Jose Magone,2017-07-28 The collapse of the bipolar world sustained by the United States and the former Soviet Union led to a power vacuum in the 1990s that the European Union has only reluctantly begun to fill It is under pressure to take over important international tasks and roles in order to develop a new equilibrium in the system of international relations After 2000 reforms were undertaken so that the European Union could deal more efficiently with the tasks the new political system had acquired since the early 1990s With respect to its international role reorganization of the EU s external relations department was high on the list The New World Architecture explores the contribution that the European Union is making to the emerging global governance system It discusses the theoretical and historical aspects of European integration within the framework of the emerging regional EU and global governance systems It explores three regimes of governance that are contributing to holding together the new emerging EU multilevel governance system None of these is complete all are partial They include the political regime of governance the socioeconomic regime of governance and the territorial regime of governance The author assesses the impact of the European Union on global politics The Mediterranean and Latin America represent regions in which the European Union is investing considerable effort in order to create new forms of cooperation Magone argues that within the next twenty five years global governance may and should emerge as the new and reconfigured stable system of international relations In this system the European Union is and will remain the most advanced regional system This volume will be of interest to specialists scholars and students of European Politics and the European Union
