*Politician's Dilemma* Barbara Geddes, 2023-04-28 In Latin America as elsewhere politicians routinely face a painful dilemma whether to use state resources for national purposes especially those that foster economic development or to channel resources to people and projects that will help insure political survival and reelection While politicians may believe that a competent state bureaucracy is intrinsic to the national good political realities invariably tempt leaders to reward powerful clients and constituents undermining long term competence *Politician's Dilemma* explores the ways in which political actors deal with these contradictory pressures and asks the question when will leaders support reforms that increase state capacity and that establish a more meritocratic and technically competent bureaucracy Barbara Geddes brings rational choice theory to her study of Brazil between 1930 and 1964 and shows how state agencies are made more effective when they are protected from partisan pressures and operate through merit based recruitment and promotion strategies Looking at administrative reform movements in other Latin American democracies she traces the incentives offered politicians to either help or hinder the process In its balanced insight wealth of detail and analytical rigor *Politician's Dilemma* provides a powerful key to understanding the conflicts inherent in Latin American politics and to unlocking possibilities for real political change In Latin America as elsewhere politicians routinely face a painful dilemma whether to use state resources for national purposes especially those that foster economic development or to channel resources to people and projects that will help insure poli

**Political Representation** F. R. Ankersmit, 2002 Contemporary political philosophy disregards history as irrelevant to the nature of politics and to what constitutes a political problem The author argues that this view reduces politics and political philosophy to a vapid academic game that is insensitive to both the essence and practice of politics He proposes that an indissoluble link between history and politics lies in the notion of representation

Donley T. Studlar, Jerold L. Waltman, 1984-10-01 **Thieves, Opportunists, and Autocrats** Dinissa Duvanova, 2023 This book examines how Russia and Kazakhstan navigated the dilemmas associated with building regulatory state institutions on the ruins of the Soviet command and control system The two nations developed predatory and wasteful crony capitalism but still improved their business climates and economic performance To better understand these seemingly incompatible outcomes the book advances a theory of authoritarian regulatory statehood It argues that politicians use institutions of the state as a means to balance conflicting elite demands for economic rents and popular demands for public goods and economic growth An effective balancing of the two prevents elite subversion and popular revolt in the short run and ensures elites continued access to economic rents in the long run Empirical analysis of nearly a million national and regional regulatory documents enacted in Russia and Kazakhstan between 1990 and 2020 shows that formal regulatory institutions the autocrats built have a profound effect on economic outcomes Moreover at times of political vulnerability autocracies use formal regulatory mechanisms to discipline state agencies responsible for policy implementation By reducing capricious policy implementation by the regulatory bureaucracy autocrats are able to reinvigorate economic performance and rebalance elite and popular interests The theoretical argument advanced in the book links the use of institutional instruments of policy implementation to the political survival strategy This study effectively shows that regulatory state building has emerged as an effective tool for strengthening autocratic regimes and enhancing their long term survival **The Decline of Popular**

**Politics** Michael E. McGerr, 1988-05-19 In the 1984 presidential election only half of the eligible electorate exercised its right to vote Why does politics no longer excite many of not most Americans Michael McGerr attributes the decline in voting in the American North to the transformation of political style after the Civil War *The Decline of Popular Politics* vividly recreates a vanished world of democratic ritual and charts its disappearance in the rapid change of industrial society A century ago political campaigns meant torchlight parades spectacular pageants staged by opposing parties and crowds of citizens attired in military dress or proudly displaying their crafts at well attended rallies The intense partisanship of presidential campaigns and party newspapers made political choice easy for people from all walks of life In the late 1860s and 1870s however the rise of liberalism led to a rejection of partisanship by the press and a move towards educational rather than spectacular electioneering This style then lost out at the turn of the century to the sensational journalism of Joseph Pulitzer and William Randolph Hearst and the advertised campaigning of Mark Hanna and other politicians McGerr shows how these new developments made it increasingly difficult for many Northerners to link their political impulses with political action By the 1920s Northern politics resembled our own public life today A vital democratic culture had yielded to advertised campaigns an emphasis on personalities rather than issues or partisanship and low voter turnout *The Candidate's Dilemma* Elisabeth

A. Kramer, 2022-06-15 In *The Candidate's Dilemma* Elisabeth Kramer tells the story of how three political candidates in Indonesia made decisions to resist engage in or otherwise incorporate money politics into their electioneering strategies over the course of their campaigns As they campaign candidates encounter pressure from the institutional rules that guide elections political parties and voters and must also negotiate complex social relationships to remain competitive For anticorruption candidates this context presents additional challenges for building and maintaining their identities Some of these candidates establish their campaign parameters early and are able to stay their course For others the campaign trail results in an avalanche of compromises each one eating away at their sense of what constitutes moral and acceptable behavior *The Candidate's Dilemma* delves into the lived experiences of candidates to offer a nuanced study of how the political and personal intersect when it comes to money politics anticorruptionism and electoral campaigning in Indonesia

**The Political Economy of Corruption** Arvind K. Jain, 2001-06-07 This volume provides theoretical analysis of the economic and political conditions that allow corruption amongst the top political elite to survive Case studies and empirical analysis support the theoretical models used Politics and Bureaucracy in the Norwegian Welfare State Halvard

Vike, 2017-10-20 The book aims to explain the emergence of the Norwegian and to some extent the Scandinavian welfare state in historical and anthropological terms Halvard Vike argues that particular forms of political grassroots mobilization contributed heavily to what he calls a low level of gravity state a political order in which decentralized institutions make it possible to curtail centralizing forces While there is a large international literature on the Nordic welfare states there is limited knowledge about how these states are embedded in local contexts Vike's approach is based on an ethnographic practice which may be labeled in and out of institutions It is based on ethnographic work in municipal assemblies local bureaucracies political parties voluntary organizations and various informal contexts **The Political Economy of Policy**

**Reform** John Williamson, 1994 Policymakers around the world have increasingly agreed that macroeconomic discipline microeconomic liberalization and outward orientation are prerequisites for economic success But what are the political conditions that make economic transformation possible At a conference held at the Institute for International Economics leaders of economic reform recounted their efforts to bring about change and discussed the impact of the political climate on the success of their efforts In this book these leaders explore the political conditions conducive to the success of policy reforms Did economic crisis strengthen the hands of the reformers Was the rapidity with which reforms were instituted crucial Did the reformers have a honeymoon period in which to transform the economy The authors answer these and other questions as well as providing first hand accounts of the politically charged atmosphere surrounding reform efforts in their countries Law and the Environment Robert V. Percival, Dorothy C. **Sport in the City** Michael P. Sam,John Hughson,2013-09-13 Sport is seen as an increasingly important aspect of urban and regional planning Related programmes have moved to the forefront of agendas for cities of the present and future This has occurred as the barriers between so called high and popular culture continue to disintegrate Sport is now a key component within strategies for the cultural regeneration of cities and regions a tendency with mixed outcomes at times fostering

genuinely democratic arrangements at others pseudo democratic arrangements whereby political business and cultural elites manipulate a sense of sameness and unity among their fellow citizens to smooth the path for the pursuit of what are actually vested interests Almost any active enactment of a sports city of culture risks divisiveness Recognizing controversies with both potentially positive and negative outcomes this book examines sport within contexts of urban and regional regeneration via a number of rather different case studies Within these studies the role of sport stadium development franchise expansion and sports fan and anti sport activism is addressed and articulated with issues concerning inter alia public funding environmental impact urban infrastructure and citizen identity The sport in the city project commenced as a research symposium held at the University of Otago Dunedin New Zealand and number of the essays originate from this occasion This book was previously published as a special issue of Sport in Society      **How Global Institutions Rule the World** Josep M Colomer,2014-11-19 This book reviews bureau type organizations delivering network goods documenting how most global institutions greatly improved their effectiveness during the last few decades In the current globalized world the design and choice of appropriate institutional rules and procedures can result in effective and democratic global government

Security as Politics Neal Andrew W. Neal,2019-03-21 Andrew W Neal argues that while security was once an anti political exception in liberal democracies a black box of secret intelligence and military decision making at the dark heart of the state it has now become normalised in professional political life This represents a direct challenge to critical security studies debates and their core assumption that security is a kind of illiberal and undemocratic anti politics Using archival research and interviews with politicians Neal investigates security politics from the 1980s to the present day to show how its meaning and practice have changed over time In doing so he develops an original reassessment of the security politics relationship      **The Politics of Expertise in Latin America** Miguel A. Centeno,Patricio Silva,2016-07-27 The ascendancy of technocratic personnel and their imposition of neo liberal economic policies have come to define Latin American politics in the 1980s and 1990s This book is the first comparative analysis of these events and their implications for the future of democracy on the continent Individual chapters discuss the rise to power of these technocrats in Mexico Chile Argentina Brazil and Peru as well as the historical antecedents of expert rule in the 19th and early 20th centuries      **Tackling Prison Overcrowding** Mike Hough,Robert Allen,Enver Solomon,2008-10-22 Lord Carter s Review of Prisons 2007 proposed the construction of vast Titan prisons to deal with the problem of prison overcrowding the establishment of a Sentencing Commission for keeping judicial demand for prison places in line with supply and further use of the private sector This book is a response to these controversial proposals      The Politics of Successful Governance Reforms Mark Robinson,2013-10-18 This book examines the factors that give rise to successful governance reforms in developing countries focusing on the importance of political commitment supportive institutions and the timing of reforms It reviews the lessons arising from the design and implementation of successful governance reforms in Brazil India Uganda and other parts of Africa through

comparative analysis of experience with public financial management anti corruption civil service reform and innovations in service delivery The contributors suggest that three factors are critical in explaining positive outcomes strong consistent commitment from politicians to initiate and sustain reforms a high level of technical capacity and some degree of insulation from societal interests at least in the early phases for designing and managing reforms incremental approaches with cumulative benefits are more likely to produce sustainable results Explicit attention to the political feasibility of reform identifying and building incentives for reform and a more gradual and piecemeal approach are all integral to the success of future governance reforms
