The Political Economy of Inter-regional Fiscal Flows Nuria Bosch, Marta Espasa, 2010-01-01 Struggles over what a region receives or should receive from the budget of the central government are common to many countries Discussions often focus on the measures of net fiscal flows or fiscal balances provided by the government or other actors This unique book shows just how these flows are computed then interpreted and clarifies the often misunderstood economic and political motives that explain why some regions receive more monies than others The Political Economy of Inter Regional Fiscal Flows provides an overview of the main methods currently being used to measure fiscal flows highlighting the advantages of the different approaches and interpreting their results The book reviews the political economy literature that analyses the determinants of inter regional fiscal flows Particular attention is devoted to the relationship between fiscal flows and country stability with methodological contributions and country studies both focusing on this issue The contributing economists and political scientists provide a state of the art study that will prove to be of great use to academics and practitioners in public sector economics and finance Tax Wealth in Fifty States D. Sjoquist, 2003-01-01 State and Local Finances under Pressure explores the future of state and local government fiscal systems given the numerous pressures they face from economic legal technological demographic and political forces It explores how these multiple forces play out in terms of the changes state and local governments should and are likely to make The contributors argue that state and local governments must make substantial changes and that failure to act is likely to result in adverse effects and increasing pressures for modifications that are more difficult to implement and more politically unpalatable Without reform state and local fiscal systems will grow increasingly out of sync with economic reality The authors suggest that government responses are likely to be evolutionary but that in 25 years the recorded changes will be substantial The first chapter provides a historic perspective of state and local fiscal trends Each of the subsequent chapters describes the nature of one of the pressures state and local governments face including political and legal forces globalization of business demographic and technological

theoretical foundations of fiscal policy Where the burdens of various taxes fall has been a matter of intense interest to economic theorists in the last twenty years As public expenditures and taxpayer resistance rise not only must policy makers try to distribute the burdens of taxation equitably but they must also attempt to move toward national goals by judicious use of tax instruments George F Break of the University of California at Berkeley in *The Incidence and Economic Effects of Taxation* a comprehensive review of recent tax literature focuses on the theoretical studies that have helped to expand knowledge of tax incidence and the empirical studies that support newly developed hypotheses In each area he surveys the design of theoretical and general sales and income taxes the effect of economic choices both of individuals and businesses on the national well being Break indicates the ground still to be covered and the potential benefits of further inquiry In *Public Expenditure Budgeting* Peter O Steiner of the University of Michigan explores the literature dealing with the hard questions underlying public expenditures What is the public interest How does the community decide whether the government should undertake or finance a given activity instead of leaving it to a private action or inaction On what basis should incremental expenditure decisions of governmental units be made Steiner reviews the various approaches scholars have taken to the difficult questions surrounding the appropriateness of governmental provision of particular goods and services Although he finds none of the models fully satisfactory his work contributes to the debate concerning the process by which collective values are articulated and collective decisions come to be accepted as binding Dick Netzer's *State Local Finance and Intergovernmental Fiscal Relations* clarifies the debate that centered around the initial proposals for revenue sharing The author Dean of New York University's Graduate School of Public Administration explores the appropriate distribution of responsibility for public services among federal state and local governments the appropriate revenue systems for the subnational governments and the appropriate means of coordinating the systems with the responsibilities
