## **Politics In The Rural Society:**

**Politics in the Rural Society** P. M. Jones, 1985-06-06 This is a study of rural society with particular reference to the peasantry. It focuses on an area of France which is defined as the southern Massif Central, the four departments forming the southern perimeter of the highland plateau of central France and spans a century which marked the apogee of peasant civilisation in this region and which witnessed the revolutions of 1789 and 1848. The book adopts a broadly cultural definition of the peasantry and offers a comprehensive account of the rhythms of rural life over some three or four generations. However, the main emphasis is on the political responses of the peasantry in an age of revolutionary experimentation with democratic institutions. As such, the book is a social history of political behaviour at the grass roots. Society and Politics in the Age of the Risorgimento John A. Davis, Paul Ginsborg, 2002-07-18 A comparative European perspective on aspects of nineteenth century Italian politics and social history. **Grassroot Politics in India** Sumita Mishra, 2000 *Politics and Peasants in Interwar Romania* Sorin Radu, Oliver Jens Schmitt, 2017-11-06 The volume discusses the integration of peasants into the nation building project of Greater Romania with a focus on social and cultural practices. Thus it addresses one of the key questions of the new political system in post imperial East Central and Southeast Europe. It advocates a shift from a multiple top down perspective: capital province urban political elites rural voters to an analysis concentrating on regionally diverse rural societies with a special interest in the predominantly ethnic Romanian population. Political Society in Developing Countries A.H. Somjee, 1984-06-18 The Politics of Agriculture in Japan Aurelia George Mulgan, 2013-01-11 Agriculture is one of the most politically powerful sectors in Japanese national politics. This book provides the first comprehensive account of the political power of Japanese farmers. This definitive text analyses the organisational and electoral basis of farmers' political power, including the role of agricultural interest groups, the mobilisation of the farm vote and links between farmers and politicians in the Diet. Agrarian power has helped to produce the distinctly pro rural anti urban bias of postwar Japanese governments, resulting in a general neglect of urban consumer interests and sustained opposition to market opening for farm products. This book represents a major study of Japanese agricultural organisations in their multifarious roles as interest groups, agents of agricultural administration, electoral resource providers and mammoth business groups. It describes the policy issues that engage farmers' concerns and identifies the agricultural commodities that carry the greatest political significance. **The Politics Of Chile** Cesar Caviedes, 2019-06-26 Chile's road to socialism points out the author was not a linear one. In the last twenty years, political parties of an astonishingly wide range of opinions participated in the administration of the country and their successes and failures have been clearly reflected in the shifting preferences of the voting population. Political ideas did not always receive nationwide acceptance; disobedience, dissent and confrontation with the government or party officials in Santiago were frequent, and the struggle between centralism and provincial aspirations was a continuing fact of Chilean political life. Dr Caviedes focuses clearly on the main protagonists of

Chilean politics the politicians and the voters and interprets the changing fortunes of the different political parties both historically and within the context of existing local social political and economic conditions He provides a province by province analysis of twenty presidential and congressional elections demonstrating the variegated character of the voters throughout the country and exploring as well the relevant links with the international political scene *China's Political System* Ning Fang,2020-09-30 This book includes collective research by the Institute of Political Science of the Chinese Academy of Social Sciences which is an important research institution of political science and a think tank in China The book was completed by the expert team of China's Political System headed by Director Fang Ning for several years and after several changes in their manuscripts This book covers the core political systems of China such as the leadership system of the Communist Party of China the decision making system of the Party and government in Chinese politics the system of the people's congress the relationship between the central and local authorities the system of officials training and selection the system of discipline inspection and supervision the system of consultative democracy and the system of community level self governance etc This book aims to build a new paradigm of empirical research and introduction of the contemporary Chinese political system by using the description and research method of materialization and dynamics of the political system *The Political Economy of the Cambodian Transition* Caroline Hughes,2003-09-02 Cambodia underwent a triple transition in the 1990s from war to peace from communism to electoral democracy and from command economy to free market This book addresses the political economy of these transitions examining how the much publicised international intervention to bring peace and democracy to Cambodia was subverted by the poverty of the Cambodian economy and by the state's manipulation of the move to the free market This analysis of the material basis of obstacles to Cambodia's democratisation suggests that the long established theoretical link between economy and democracy stands even in the face of new strategies of international democracy promotion **The Oxford Handbook of European History, 1914-1945** Nicholas Doumanis,2016-05-05 The period spanning the two World Wars was unquestionably the most catastrophic in Europe's history Despite such undeniably progressive developments as the radical expansion of women's suffrage and rising health standards the era was dominated by political violence and chronic instability Its symbols were Verdun Guernica and Auschwitz By the end of this dark period tens of millions of Europeans had been killed and more still had been displaced and permanently traumatized If the nineteenth century gave Europeans cause to regard the future with a sense of optimism the early twentieth century had them anticipating the destruction of civilization The fact that so many revolutions regime changes dictatorships mass killings and civil wars took place within such a compressed time frame suggests that Europe experienced a general crisis The Oxford Handbook of European History 1914-1945 reconsiders the most significant features of this calamitous age from a transnational perspective It demonstrates the degree to which national experiences were intertwined with those of other nations and how each crisis was implicated in wider regional continental and global developments
