## **Politics Of Aging Power And Policy:**

*The Politics of Aging* John B. Williamson, Linda Evans, Lawrence A. Powell, 1982      **The New Politics of Old Age Policy** Robert B. Hudson, 2014-09-22 Scholars students and policymakers will appreciate the volume's timely overview of the evolution of aging policy      *The Handbook of Social Policy* James Midgley, Martin B. Tracy, Michelle Livermore, 2000 Comprises 33 papers grouped under five themes The Nature of social policy The History of social policy Social policy and the social services The Political economy of social policy and International and future perspectives on social policy      **Aging Policy and Politics in the Trump Era** Edward Alan Miller, Pamela Nadash, Michael K. Gusmano, 2020-05-21 The surprise election of Donald J Trump to the presidency of the United States marks a singular turning point in the American republic not only because of his idiosyncratic approach to the office but also because the Republican Party now holds the presidency and both houses of Congress presenting a historic opportunity for change The role of older Americans has been critical in both shaping and reacting to this political moment Their political orientations and behaviors have shaped it through their electoral support for Republican candidates But older Americans stand as highly invested stakeholders in the policy decisions made by the very officials they elected and as beneficiaries of the programs that Republicans have targeted for cuts or elimination This comprehensive volume explores the ways in which Trump administration policies are likely to significantly undermine the social safety net for near elderly and older Americans including long term care housing health care and retirement The authors also explore how the Trump administration might shape politics and political behavior through the policy changes made The response of older voters in upcoming elections to efforts by the Trump administration and its Republican allies in Congress to draw back on the federal government's commitment to programs and policies affecting them will shape the direction of aging policy and politics for years to come This book was originally published as a special issue of the *Journal of Aging Social Policy*      *The SAGE Handbook of Social Gerontology* Dale Dannefer, Chris Phillipson, 2010-08-13 This SAGE Handbook integrates basic research on social dimensions of aging It presents programmatic applications of research in areas not often seen in Handbooks including imprisonment technology and aging urban society aged and elderly migration The authors constitute a Who's Who of international gerontology and the focus on globalization and aging is unique among Handbooks today This Handbook should be in the library of every social gerontologist Vern L Bengtson Professor of Gerontology University of Southern California This volume reflects the emergence of ageing as a global concern including chapters by international scholars from Asia Australasia Europe and North America It provides a comprehensive overview of key trends and issues in the field drawing upon the full range of social science disciplines The Handbook is organized into five parts each exploring different aspects of research into social aspects of ageing Disciplinary overviews summaries of findings from key disciplinary areas within social gerontology Social relationships and social differences explores area like social inequality gender religion inter generational ties social networks and friendships Individual characteristics and change

in later life examines different aspects of individual aging including self and identity cognitive processes and bio social interactions and their impact on physical and psychological aging Comparative perspectives and cultural innovations topics include ageing and development ageing in a global context migration and cross cultural perspectives on grandparenthood Policy issues covering policy concerns such as long term care technology and older people end of life issues work and retirement and the politics of old age This will be essential reading for all students researchers and policy makers concerned with the major issues influencing the lives of older people across the globe **Aging, Social Inequality, and Public**

**Policy** Fred C. Pampel, 1998-02-25 Author Fred C. Pampel treats age as a component of social inequality which gives rise to the three major themes of the text diversity in the experience of individuals differences in public policy and variations across nations Comparison of the United States with other nations is a central component of the book providing a greater understanding of the larger forces that shape old age Women & Aging Helen Rippier Wheeler, 1997 Guide with more than two thousand bibliographic entries and cross references It includes journal articles book chapters essays and doctoral dissertations as well as complete books AARP Christine L. Day, 2017-10-19 This examination of the history development activities successes and limitations of the largest membership organization in the country will be of interest to anyone who belongs to or is curious about this sometimes controversial group AARP is one of Washington's most influential interest groups but just who does it represent To some it represents the narrow special interests of older Americans who already consume more than their share of government benefits To others its advocacy encompasses everyone including those with elderly parents and grandparents and those who will comprise the older generations of the future The most comprehensive volume ever written about AARP the book begins with a chapter on the organization's history going back to its founding in 1958 and its roots in the National Retired Teachers Association established in 1947 Readers will learn about AARP's membership and chapter activities including how it grew to be the largest membership organization in the country Perhaps even more engrossing is the book's investigation of the nature and extent of AARP's political influence and its positions and priorities as it struggles to represent a large and diverse constituency Finally the study discusses AARP's organizational model which combines political advocacy business and charity and probes the controversies arising from what AARP's critics charge are conflicts of interest Readings in the Political Economy of Aging Meredith Minkler, Carroll Estes, 2019-03-19 Includes 16 essays which address many issues from a different perspective suggested by the experience of aging in America This study explores the political social and economic realities which have an impact on Americans as they grow older The politics of old age Martha Doyle, 2015-02-01 The politics of old age in the twenty first century is contentious encompassing ideological debates about the rights and welfare entitlements of individuals in later life An important aspect is the manner in which older people and their representative groups are given the opportunity to articulate their interests in the policy making process Drawing upon key literature in political science social gerontology and cultural sociology The politics of old

age explores the relationship between ageing politics and representation. It reveals the complexity of older people's representation and how the power the organisations exercise, their legitimacy and existence remain highly contingent on government policy design, political opportunity structures and the prevailing cultural and socioeconomic milieu. This book is essential reading for policymakers and organisations interested in ageing policy and the political process and for students of ageing, social policy and political sociology.

**Japan's Environmental Politics and Governance** Yasuo Takao, 2016-11-03

Environmental issues stretch across scales of geographic space and require action at multiple levels of jurisdiction including the individual level, community level, national level and global level. Much of the scholarly work surrounding new approaches to environmental governance tends to overlook the role of sub-national governments but this study examines the potential of sub-national participation to make policy choices which are congruent with global strategies and national mandates. This book investigates the emerging actors and new channels of Japan's environmental governance which has been taking shape within an increasingly globalized international system. By analysing this important new phenomenon it sheds light on the changing nature of Japan's environmental policy and politics and shows how the links between global strategies, national mandates and local action serve as an influential factor in Japan's changing structures of environmental governance. Further, it demonstrates that decision-making competencies are shared between actors operating at different levels and in new spheres of authority resulting from collaboration between state and non-state actors. It highlights a number of the problems, challenges and critiques of the actors in environmental governance as well as raising new empirical and theoretical puzzles for the future study of governance over environmental and global issues. Finally, it concludes that changes in the tiers and new spheres of authority are leading the nation towards an environmentally stable future positioned within socio-economic and political constraints. Demonstrating that bridging policy gaps between local action, national policy and global strategies is potentially a way of reinventing environmental policy, this book will be of interest to students and scholars of Environmental Studies, Environmental Politics and Japanese Politics.

**The Oxford Companion to Comparative Politics** Joel Krieger, 2013

The two-volume Oxford Companion to Comparative Politics fills a gap in scholarship on an increasingly important field within Political Science. Comparative Politics, the discipline devoted to the politics of other countries or peoples, has been steadily gaining prominence as a field of study, allowing politics to be viewed from a wider foundation than a concentration on domestic affairs would permit. Comparativists apply various theories and concepts to analyze the similarities and differences between political units, using the results of their research to develop causalities and generalizations. Each of these theories and outcomes are thoroughly defined in the Companion, as are major resultant conclusions. Those comparativists who have influenced the field in significant ways and politicians whose administrations have shaped the evaluation of contrasting governments. Approximately 200 revised and updated articles from the Oxford Companion to Politics of the World would serve as a foundation for the set while over 100 new entries would thoroughly

examine the field in a lasting more theoretical than current event based way New entries cover such topics as failed states Grand Strategies and Soft Power important updates include such countries as China and Afghanistan and issues like Capital Punishment Gender and Politics and Totalitarianism Country entries include the most significant nations to permit a focus on non time sensitive analysis In addition 25 1 000 word interpretive essays by notable figures analyze the discipline its issues and accomplishments Collectively entries promote deeper understanding of a field that is often elusive to non specialists

**Gray Agendas** Henry J. Pratt,1993 Gray Agendas presents a groundbreaking cross national study into the complex and interdependent relationship between public policy and the interest groups of the aged Canada Britain and the United States are examined and compared This book provides a unique in depth understanding of how public policies have sparked the creation of organized senior citizen groups which in turn through their intensified political clout have been able to shape subsequent public policy The book begins with a historical perspective on the state s role in the lives of the aged and the indirect consequences of various policies on the elderly population including most specifically age group mobilization Later consideration is given to widespread economic social and ideological changes in age policy and the effect that new interest group formation had and continues to have upon these changes The final chapters are concerned with current issues surrounding the present density of organized age based activity and the effects of transformed state policy on the future of interest groups for the aged The unique topic of Gray Agendas will prove interesting not only to those interested in the fields of sociology history and political science but also will help fill the gap of scholarly information on issues concerning the elderly s organizations proving invaluable to those interested in social gerontology and related areas of study *Disciplining Old Age* Stephen Katz,1996 The conference was organized cooperatively with the Surface Engineering Division of the ASM and as part of Materials Week and so was attended by a wider range of scientists from academia and engineers from industry than usual Funding cuts affecting travel budgets in many institutions however reduced the overall number those who were not able to attend can begin saving for the proceedings The 43 papers cover ultrahard coatings surface treatment and alternative processes corrosion resistant coatings characterizing coatings the surface engineering of powders laser processing vapor deposition and plasma methods and thermal spray coating and coatings for composites Annotation copyrighted by Book News Inc Portland OR **The Oxford Companion to American Politics** David Coates,2012-07-12 Provides students and scholars with a valuable reference source in the field of American Politics The Companion will equip readers with a deep understanding of the complex interaction between governmental institutions and processes and the wider American economy and society that they govern The Political Economy of Population Aging Kimiko Terai,Amihai Glazer,Naomi Miyazato,2021-09-21 This book integrates the economics of aging and insight based on political economy and explores generational conflict in the context of governmental spending This problem is general as the Covid 19 pandemic has highlighted lockdowns protect the elderly but hurt the young Policies to address global warming impose taxes on the elderly

but would bring benefits largely in the future This book addresses intergenerational problems by placing its focus on budget allocation taxation and regulation By using Japanese and US data the authors conduct statistical analysis of whether regions with aging populations may adopt policies that generate benefits during a short period of time instead of policies that could benefit current young generations for an extended period of time If the policy preferences of voters depend on their age and if policy adoption by a government reflects public opinion the change in demographic composition in a region may affect governmental policies In an aged society the elderly are pivotal voters Budgets may be reallocated from policies favored by younger generations such as education to policies the elderly prefer such as welfare programs This generates an intergenerational externality problem voters with short life expectancy do not take into consideration long term benefits Moreover the current tax bases may be replaced by other tax bases that do not harm the elderly The results reported in the book largely support these hypotheses Evidence also shows that the gender and racial composition and institutional factors including the extent of fiscal decentralization are important in anticipating effects of population aging in other countries

The Politics of Structural Reforms Hideko Magara, Stefano Sacchi, 2013-10-31 This innovative volume will be an excellent resource for political scientists specialized in political economy and industrial relations labour economists and sociologists as well as policy practitioners and corporate governance specialists Moreover *Aging*, 1972 Canadian Political Economy Heather Whiteside, 2020-11-19 Engaging with themes of conflict change and crisis this book re invigorates the distinct interdisciplinary field of Canadian political economy *Japanese Politics and Government* Alisa Gauner, 2023-02-27 The revised 2nd edition of this successful textbook explores Japanese politics in the postwar era from theoretical and comparative perspectives After providing historical context it offers an in depth exploration of postwar political institutions political reform in the 1990s the policymaking process and the politics of economic growth and stagnation By delving into Japan's international relations the book sheds light on Japan's security and foreign policies and Japan's role in Asia The textbook concludes by addressing what has changed since party alternation in 2009 the triple disaster in March 2011 and the global Covid pandemic Themes and questions addressed throughout the text include How and why did Japan modernize so successfully when so many other countries fell prey to colonialism and authoritarianism What explains the Japanese economic miracle and its subsequent economic stagnation What accounts for Japan's successful democratization In the international realm why has Japan achieved economic superpower status without achieving political superpower status What is the future trajectory of Japanese politics Connecting Japan to larger themes in comparative politics and linking Japan's history institutions policymaking process and international relations to experiences and structures in other countries this book is essential reading for students of Japanese or Asian Politics
