

Professionalism or Politics As a Model for Educators' Work and Lives

Mark B. Ginsburg
University of Pittsburgh

Introduction

Should educators conceptualize and organize their work and lives around the notion of professionalism or politics? For many educators and non-educators alike the answer to this question seems as obvious as whether educators should strive to be good or bad? In this essay I want to deconstruct the concepts of professionalism and politics in order to suggest why the answer is not so obvious. Indeed I will argue that politics, particularly democratic politics, may be a more appropriate model for educators to adopt as we engage in activities as instructors, curriculum decision-makers, evaluators of students, researchers, union and professional organization participants, family members, and citizens.

Professionalism

It has been stated that in the United States, "all intelligent modern persons organize their behavior, both public and private, according to the culture of professionalism" (Blodgett, 1976, p. ix). While this is undoubtedly an overstatement and despite Hall's (1983) claim that the sociological study of professions, professionalism, and professionalization is moribund,¹ we cannot ignore the idea of professionalism when examining contemporary societies, at least the increasing number of societies

where English constitutes an important language (Flores & Glover, 1978; Larson, 1977).² This more general statement is especially valid for educators, as Oremstein (1981, p. 196) reports: "Whether teaching can be considered a profession in the fullest sense has concerned educators and education scholars for decades." And more recent history underlines this point:

"Professionalism is an animating theme in the current educational reform movement" (Sykes, 1989, p. 253).

"This decade [1980s] has responded with the call to professionalize teaching" (Pickle, 1990, p. 73).

The scholarly literature — as well as everyday discourse (Dingwall, 1976) and the mass media³ — are replete with representations of what "professionalism" means (for summaries of the literature see Eklund, 1980b; Johnson, 1972; Roth, 1974; Wilemski, 1964). Not surprisingly, given a focus on different historical and societal contexts as well as on different occupations, these representations, despite overlapping, vary considerably (Freidson, 1973; Ginsburg, 1987; Ginsburg et al., 1980; Ginsburg et al., 1988a; Ginsburg et al., 1988b; Ginsburg & Chaturvedi, 1988; Ginsburg & Chaturvedi, 1988; Jackson, 1970; Johnson, 1972, 1973, & 1982; Klegon, 1978; Vollmer & Mills, 1966). As Freidson (1983, p. 32-33) posits, "there is no single, truly explanatory trait or characteristic ... that can join together all occupations called professions beyond the actual fact of coming to be called professions." Some of the traits that have been posited either to differentiate professions from other occupations (including teaching) or to characterize the elements that need to be acquired during the process of professionalization include:⁴ a) performing an essential service or task⁵; b) engaging in work involving a high level of

Performativity, Politics and Education Peter Roberts, 2022-04-04 This book provides a distinctive perspective on some of the ways in which performativity as an expression of neoliberal and managerialist thinking works in specific policy contexts It pays particular attention to higher education and considers how the logic of performativity reconfigures our sense of what it means to engage in worthwhile research what it means to be well and ultimately what it means to be human Philosophy of education conceived not just as a domain of scholarly activity but as a way of life rubs against the grain of performativity In a performance driven world efficiency measurability and predictability are all important A philosophical life in education is often unpredictable uncertain and inefficient it creates a kind of intellectual restlessness that can never be fully satisfied Performativity Politics and Education From Policy to Philosophy suggests that the current obsession with productivity performance and prosperity is misguided It argues that policies and practices underpinned by the principle of performativity are dehumanising and offers an alternative approach an orientation to education grounded in a philosophy of hope and underpinned by a commitment to collegiality constructive critique and ongoing dialogue *Educators, Professionalism and Politics* Terri Seddon, John Levin, 2013 This title brings together contributions from around the world that analyse and reflect on the way curriculum is configuring and reconfiguring that world **Education and Training Politics in Europe** Philipp Assinger, 2020-09-11 In the past seventy years education and training have evolved from side issues of

Popular Music, Cultural Politics and Music Education in China Wai-Chung Ho, 2016-12-08 While attention has been paid to various aspects of music education in China to date no single publication has systematically addressed the complex interplay of sociopolitical transformations underlying the development of popular music and music education in the multilevel culture of China Before the implementation of the new curriculum reforms in China at the beginning of the twenty first century there was neither Chinese nor Western popular music in textbook materials Popular culture had long been prohibited in school music education by China's strong revolutionary orientation which feared spiritual pollution by Western cultures However since the early twenty first century education reform has attempted to help students deal with experiences in their daily lives and has officially included learning the canon of popular music in the music curriculum In relation to this topic this book analyses how social transformation and cultural politics have affected community relations and the transmission of popular music through school music education Ho presents music and music education as sociopolitical constructions of nationalism and globalization Moreover how popular music is received in national and global contexts and how it affects the construction of social and musical meanings in school music education as well as the reformation of music education in mainland China is discussed Based on the perspectives of school music teachers and students the findings of the empirical studies in this book address the power and potential use of popular music in school music education as a producer and reproducer of cultural politics in the music curriculum in the mainland

Handbook of Cultural Politics and Education, 2010-01-01 In academia

the effects of the cultural turn have been felt deeply In everyday life tenets from cultural politics have influenced how people behave or regard their options for action such as the reconfiguration of social movements protests and praxis in general Many authors writing in this field are known for their scholarship and social activism both of which are arguably guided by principles of cultural politics about the nature of representation and the deployment of power in political discourses The Handbook of Cultural Politics and Education is less an attempt to standardize contemporary educational scholarship and more a collection that engages the problems and promises of recent themes in social and cultural thought which require our attention and demand a response In other words it opens doors to questions rather than convenient answers to difficult educational dilemmas The Handbook is part of the appraisal of an opening created by interdisciplinary writings on such themes as representation civil society cultural struggle subjectivity and media within the context of education Indeed cultural politics troubles traditional frameworks in search of critical explanations concerning education s place within society The contributions in the collection support this endeavor

Changing Politics of Education Michael Fabricant,Michelle Fine,2015-11-17 The authors persuasively argue that the present cascade of reforms to public education is a consequence of a larger intention to shrink government The startling result is that more of public education s assets and resources are moving to the private sector and to the prison industrial complex Drawing on various forms of evidence structural economic narrative and youth generated participatory research the authors reveal new structures and circuits of dispossession and privilege that amount to a clear failure of present policy Policymaking is at war with the interests of the vast majority of citizens and especially with urban youth of color In the final chapter the authors explore democratic principles and offer examples essential to mobilizing in solidarity with educators youth communities labor and allied social movements the kind of power necessary to contest the present direction of public education reform
