## **Politics Of Security:**

**Politics of Security** Michael Dillon, 2002-01-31 In this critique of security studies with insights into the thinking of Heidegger Foucault Derrida Levinas and Arendt Michael Dillon contributes to the rethinking of some of the fundamentals of international politics developing what might be called a political philosophy of continental thought Drawing on the work of Martin Heidegger *Politics of Security* establishes the relationship between Heidegger's radical hermeneutical phenomenology and politics and the fundamental link between politics the tragic and the ethical It breaks new ground by providing an etymology of security tracing the word back to the Greek *asphaleia* not to trip up or fall down and a unique political reading of Oedipus Rex Michael Dillon traces the roots of desire for security to the metaphysical desire for certitude and points out that our way of seeking that security is embedded in 20th century technology thus resulting in a global crisis *Politics of Security* will be invaluable to both political theorists and philosophers and to anyone concerned with international relations continental philosophy or the work of Martin Heidegger

## **Political Trust and the Politics of Security**

**Engagement** Benjamin Barton, 2017-09-13 The EU and China are often characterised as parties whose bilateral political differences still remain too large to bridge so that they have failed to convert rhetorical promises into tangible results of cooperation particularly with regards to the field of international security Yet in terms of their bilateral interaction on security risk management in Africa EU and Chinese naval officers jointly brought down the number of successful Somali pirate attacks in the Gulf of Aden and to a lesser extent were jointly involved in seeking a resolution to the lingering conflict in Darfur This book asks how we can make sense as a whole of this relatively sudden shift in regards to the dealings between their respective officials on the topic of security risk management It argues that the outcomes of Sino European bilateral dealings on this topic are above all determined by the ability inability of these officials to build political trust as a complex and cognitive social phenomenon Consequently the book applies an innovative conceptual framework on political trust to explain why EU and Chinese officials bridged their endemic political differences to practically cooperate on Somali piracy but were unable to do so when it came to their interaction on Darfur To conclude it examines the longer term impact of this bilateral trust building process by covering more recent examples of bilateral engagement in Libya and Mali and aims to show that although this trust building process may be case specific ramifications may go beyond the realm of their bilateral dealings on security matters in Africa to impact wider issues of international security This text will be of key interest to scholars and students of African and Chinese politics EU politics security and maritime studies and more broadly of international relations and to governmental actors

**Foucault on Politics, Security and War** M. Dillon, A. Neal, 2015-12-31 Foucault on Politics Society and War interrogates Foucault's controversial genealogy of modern biopolitics These essays situate Foucault's arguments clarify the correlation of sovereign and bio power and examine the relation of *bios nomos* and race in relation to modern war

**Annual Report on International Politics and Security (2012)** Zhang Yuyan Li

Shenming,2012-04-01 A brand new series of annual reports that offer a high level Chinese perspective on China's International economic relations and strategies These books are highly detailed and research led offering expert analysis and evaluations from key Chinese advisers and academics Annual Report on International Politics and Security the first in the series to publish takes a close expert look at China's views on the key International political and security considerations for 2012 and beyond plus perspectives on perceived threats to China itself **Security as Politics** Neal Andrew W.

Neal,2019-03-21 Andrew W Neal argues that while security was once an anti political exception in liberal democracies a black box of secret intelligence and military decision making at the dark heart of the state it has now become normalised in professional political life This represents a direct challenge to critical security studies debates and their core assumption that security is a kind of illiberal and undemocratic anti politics Using archival research and interviews with politicians Neal investigates security politics from the 1980s to the present day to show how its meaning and practice have changed over time In doing so he develops an original reassessment of the security politics relationship **Security, Emancipation and**

**the Politics of Health** Joao Nunes,2013-10-01 This book develops a new theoretical framework for the study of security issues and applies this to the case of health Building on the work of the Welsh School of Security Studies and drawing on contributions from the wider critical security literature the book provides an emancipatory perspective on the health security nexus one which simultaneously teases out its underlying political assumptions assesses its political effects and identifies potential for transformation Security Emancipation and the Politics of Health challenges conventional wisdom in the field of health and international politics by conceiving of health as a fundamentally political issue and not merely as a medical problem demanding technical solutions and arrangements The book shows how political processes of representation underpin notions of health and disease through an examination of three key areas the linkages between immigration and the fear of disease colonial medicine and the health as a bridge for peace literature In order to successfully carry out this political investigation of health the book develops an innovative theoretical framework inspired by the idea of security as emancipation which goes beyond the existing emancipatory literature in security studies This book will be of much interest to students of critical security studies health politics sociology and IR in general **The Politics of European Security**

**Policies** Xymena Kurowska,Patryk Pawlak,2014-06-03 The book is a timely investigation into the European security policy dynamic from the perspective of actors engaged in the contentious policy process Instead of looking at security actors in isolation from one another the book enquires into the practice of the policy process and maps out the constellations of formal and informal actors sponsoring concrete ideas on what European security should be about The understandings of security shift and advocating a particular reading of security involves entering the political contest with actors advancing different conceptions The contributors analyse these different modalities overlapping scenes and shifting meanings that bring about EU security policies Our case studies illustrate how these processes unfold both at the intra EU level where different

institutions supply and endorse their security framings and vis vis the EU and its neighbours The purpose of the book is to uncover by pluralistic means the rules of the game that structure the field of the EU s security making That way rather than impose a rigid theoretical model the editors structure the inquiry around three concepts security politics and policy This book was published as a special issue of Perspectives on European Politics and Society

### **The Politics of Energy Security**

Johannes Kester,2018-06-12 Energy security is known for its slippery nature and subsequent broad range of definitions Instead of another attempt to grasp its essence this book offers a critical reflection that problematizes the use of energy security itself After a short historical and methodological analysis of the proliferation of energy security The Politics of Energy Security unpacks three social practices that drive energy security These include an analysis of the logics of security a study of the relation between the materiality of sociotechnical energy systems and the knowledge people have over such systems and a reflection on the power and politics behind energy security Each of these are discussed and ultimately illustrated in the last chapter to show how energy security works how it is shaped and what role it plays within political processes Based on a novel performative reading of energy security with its focus on ontological politics and an in depth look at the often implicitly accepted social practices that determine how people shape and are shaped by energy security this book will be of great interest to students and scholars of energy security and policy political theory international relations critical security studies and environmental studies more broadly

### **Crime, Security and Global Politics**

Anja P. Jakobi,2020-03-04 This engaging new textbook presents a comprehensive nuanced and multidimensional perspective on global crime and its governance As global criminal activity becomes increasingly sophisticated and elusive so the means to counter it must adapt Every day our news media is dominated by incidents that span countries and continents often presented as an all encompassing threat orchestrated by societal outsiders If not in the news global crime is sensationalised in our film and television industry and it can be difficult to gain a true understanding of what global crime is and how it is combated Featuring the latest research and informed by a wide range of theoretical perspectives this text masterfully makes sense of a range of issues from global environmental crime and human trafficking to the global trade in drugs and cybercrime This pathbreaking text analyses why global crime is important the obstacles faced in countering it and accounts for the difficulties in securing cooperation across states Comprehensive and accessible this authoritative textbook is the perfect companion for students and scholars who are interested in the still evolving issue of international relations and global politics

### **Hong Kong Politics after the National Security Law**

Stephan Ortmann,Raymond Kwun-Sun Lau,Kenneth Ka-Lok Chan,2025-04-22 Ortmann Lau and Chan together with the contributors provide an innovative assessment of the impact of the National Security Law on Hong Kong politics The law was introduced by the Chinese government in 2020 and has since fundamentally transformed the political landscape of the former British colony The book explores how Hong Kong s transformation in governance law education and civil society has amounted to one of the most significant episodes of

autocratization in the world in recent years Each chapter provides theoretical and methodological approaches to capture the different dimensions of the influence of the National Security Law on Hong Kong politics The trends discussed in the book are of global relevance to the discussion of the current trends of increasing autocratization and this provides insights into the institutional transformations and the adaptive response from Hong Kongers Also the extra territorial application of China's National Security Law has inevitably global implications which makes it important to investigate how the Hong Kong overseas diasporas are responding to these challenges The book is an indispensable resource for scholars and experts on Hong Kong Politics China's policy toward Hong Kong international policymakers journalists students and those who are interested in the growing global trend of autocratization      *Rethinking Climate Change, Security and Politics* Steven Ratuva, Mercedes Alda-Fernández, Dalila Gharbaoui, Masaki Kataoka, 2025-09-19 The book provides a critical analysis of the nexus between climate change security and politics especially in relation to the role and impact of societal agencies such as states corporations military financial institutions and community organizations in framing and responding to climate change using various forms of social economic or political leverage Climate change is a major existential security threat to the planet and humanity yet there is continuing debate as to how it should be approached      Cyber Security and the Politics of Time Tim Stevens, 2016 Explores how security communities think about time and how this shapes the politics of security in the information age      **Security Politics in the Gulf Monarchies** David B. Roberts, 2023-04-18 The Gulf monarchies Saudi Arabia Kuwait Bahrain Qatar Oman and the United Arab Emirates play crucial roles in world markets and politics Their economies which have traditionally been driven by oil revenues have simultaneously propelled transformative change and preserved the traditional order Fossil fuel wealth has underwritten an implicit social contract characterized by generous welfare states ruler centric politics and a heavy state presence in the economy facilitating stability during tumultuous times However as the transition toward renewable energy looms will the Gulf monarchies be able to adapt David B Roberts offers a definitive guide to continuity and change in the Gulf region He explores the forces challenging and bolstering the status quo across the political social economic military and environmental dimensions of security Roberts examines the six monarchies individually and holistically considering their recent histories and contemporary concerns Beneath wide ranging changes affecting these countries he pinpoints key dynamics and structures that have persisted over the long term The book examines key topics such as generational change in leadership migrant workers female labor force participation U S military influence and the multifaceted threat of climate change Roberts scrutinizes how a move away from the oil centered economic model could reverberate across the social spectrum with profound implications for security Suitable for a range of courses and offering important new insights for experts this book is an accessible and up to date overview of the politics of a key world region      *The New Politics of Energy Security in the European Union and Beyond* Andrea Prontera, 2017-05-18 Combining theoretical reflections and empirical insights from paradigmatic case studies in the area of external energy governance

pipeline politics Liquefied Natural Gas development and offshore petroleum policy and politics this ground breaking study demonstrates that a distinctive and new politics of energy security is definitively emerging in the European Union Innovative not only in regard to the case studies presented which include the Caspian region the Baltic Mediterranean countries Central Asia and EU Russia relations but also in regard to the analytical framework adopted an International Political Economy approach informed by an historical institutional perspective the book challenges the common view of the de politicisation of energy security supported by the mainstream market approach and the power politics and zero sum game view supported by the geopolitical perspective This book places the study of EU energy politics in the broader evolving context of global energy markets and explores the complex interactions between EU and national political dynamics and between energy security and environmental concerns at the local level

**Security Unbound** Jef Huysmans, 2014-05-09 Security concerns have mushroomed Increasingly numerous areas of life are governed by security policies and technologies Security Unbound argues that when insecurities pervade how we relate to our neighbours how we perceive international politics how governments formulate policies at stake is not our security but our democracy Security is not in the first instance a right or value but a practice that challenges democratic institutions and actions We are familiar with emergency policies in the name of national security challenging parliamentary processes the space for political dissent and fundamental rights Yet security practice and technology pervade society heavily in very mundane ways without raising national security crises in particular through surveillance technology and the management of risks and uncertainties in many areas of life These more diffuse security practices create societies in which suspicion becomes a default way of relating and governing relations ranging from neighbourhood relations over financial transactions to cross border mobility Security Unbound demonstrates that governing through suspicion poses serious challenges to democratic practice Some of these challenges are familiar such as the erosion of the right to privacy others are less so such as the post human challenge to citizenship Security unbound provokes us to see that the democratic political stake today is not our security but preventing insecurity from becoming the organising principle of political and social life

The UN Security Council and the Politics of International Authority Bruce Cronin, Ian Hurd, 2008-03-04 Observes how the growth of the political authority of the Council challenges the basic idea that states have legal autonomy over their domestic affairs The individual essays survey the implications that flow from these developments in the crucial policy areas of terrorism economic sanctions the prosecution of war crimes human rights humanitarian intervention and the use of force In each of these areas the evidence shows a complex and fluid relation between state sovereignty the power of the United Nations and the politics of international legitimation Demonstrating how world politics has come to accommodate the contradictory institutions of international authority and international anarchy this book makes an important contribution to how we understand and study international organizations and international law Written by leading experts in the field this volume will be of strong interest to students and scholars of international relations

international organizations international law and global governance      **Critical Approaches to Security in Central Asia**

Edward Lemon, 2020-05-21 Central Asia remains on the periphery both spatially and in people's imaginations. When the region does attract international attention it is often related to security issues including terrorism, ethnic conflict and drug trafficking. This book brings together leading specialists from a range of disciplines including geography, anthropology, sociology and political science to discuss how citizens and governments within Central Asia think about and practise security. The authors explore how governments use fears of instability to bolster their rule and how securitized populations cope with and resist being labelled threats through strategies that are rarely associated with security including marriage and changing their appearance. This collection examines a wide range of security issues including Islamic extremism, small arms, interethnic relations and border regions. While coverage of the region often departs from preconceived notions of the region as dangerous, obscure and volatile, the chapters in this book all place emphasis on the way local people understand security and harmony in their daily lives. This book will be of interest to students and researchers of Central Asian Studies as well as Security Studies and Political Science. The chapters were originally published in the journal *Central Asian Survey*.

**Understanding Security** Mike Bourne, 2013-11-26 This broad-ranging new text introduces a wide range of theoretical perspectives with a central focus on their application to understanding key issues in global state and human security in the contemporary world.      *Ethics and Global Security* Anthony Burke, Katrina Lee-Koo, Matt McDonald, 2014-06-27 This book will be the first systematic examination of the role that ethics plays in international security in both theory and practice and offers the reader a concrete ethics for global security. Questions of morality and ethics have long been central to global security from the death camps, world wars and H-bombs of the 20th century to the humanitarian missions, tsunamis, terrorism and refugees of the 21st. This book goes beyond the Just War tradition to demonstrate how ethical commitments influence security theory, policy and international law across a range of pressing global challenges. The book highlights how from patrolling a territorial border to maintaining armed forces, security practices have important ethical implications by excluding some from consideration, presenting others as potential threats and exposing them to harm and licensing particular actions. While many scholars and practitioners of security claim little interest in ethics, ethics clearly has an interest in them. This innovative book extends the traditional agenda of war and peace to consider the ethics of force short of war such as sanctions, deterrence, terrorism, targeted killing and torture and the ethical implications of new security concerns such as identity, gender, humanitarianism, the responsibility to protect and the global ecology. It advances a concrete ethics for an era of global threats and makes a case for a cosmopolitan approach to the theory and practice of security that could inspire a more just, stable and inclusive global order. This book fills an important gap in the literature and will be of much interest to students of ethics, security studies and international relations.      *Security Beyond the State* Rita Abrahamsen, Michael C.

Williams, 2010-11-18 Across the globe from mega cities to isolated resource enclaves, the provision and governance of

security takes place within assemblages that are de-territorialized in terms of actors, technologies, norms, and discourses. They are embedded in a complex transnational architecture defying conventional distinctions between public and private, global and local. Drawing on theories of globalization and late modernity along with insights from criminology, political science, and sociology, *Security Beyond the State* maps the emergence of the global private security sector and develops a novel analytical framework for understanding these global security assemblages. Through in-depth examinations of four African countries—Kenya, Nigeria, Sierra Leone, and South Africa—it demonstrates how global security assemblages affect the distribution of social power, the dynamics of state stability, and the operations of the international political economy with significant implications for who gets secured and how in a global era.
