Jitendra Pal Singh UBEROI, Bronislaw Malinowski, 1962 **Politics of the Kula Ring** Jitendra Pal Singh, 1962 **Ways of Baloma** Mark S. Mosko, 2017-11-15 Bronislaw Malinowski's path breaking research in the Trobriand Islands shaped much of modern anthropology's disciplinary paradigm Yet many conundrums remain For example Malinowski asserted that baloma spirits of the dead were responsible for procreation but had limited influence on their living descendants in magic and other matters claims largely unchallenged by subsequent field investigators until now Based on extended fieldwork at Omarakana village home of the Tabalu Paramount Chief Mark S Mosko argues instead that these and virtually all contexts of indigenous sociality are conceived as sacrificial reciprocities between the mirror worlds that baloma and humans inhabit Informed by a synthesis of Strathern's model of individual personhood and Lévy Bruhl's theory of participation Mosko upends a century of discussion and debate extending from Malinowski to anthropology's other leading thinkers His account of the intimate interdependencies of humans and spirits in the cosmic generation and coordination of life, momova and death, kaliga strikes at the nexus of anthropology's received wisdom and Ways of Baloma will inevitably lead practitioners and students to reflect anew on the discipline's multifold theories of personhood, ritual agency and sociality **The Evolution of Human Co-operation** Charles Stanish, 2017-08-03 How do people living in small groups without money, markets, police and rigid social classes develop norms of economic and social cooperation that are sustainable over time This book addresses this fundamental question and explains the origin, structure and spread of stateless societies Using insights from game theory, ethnography and archaeology Stanish shows how ritual, broadly defined, is the key Ritual practices encode elaborate rules of behavior and are ingenious mechanisms of organizing society in the absence of coercive states As well as asking why and how people choose to cooperate Stanish also provides the theoretical framework to understand this collective action problem He goes on to highlight the evolution of cooperation with ethnographic and archaeological data from around the world Merging evolutionary game

theory concepts with cultural evolutionary theory this book will appeal to those seeking a transdisciplinary approach to one of the greatest problems in human evolution *Lost Knowledge* Benjamin B. Olshin, 2019-02-19 *Lost Knowledge* The Concept of Vanished Technologies and Other Human Histories examines the idea of lost knowledge reaching back to a period between myth and history It investigates a peculiar idea found in a number of early texts that there were civilizations with knowledge of sophisticated technologies and that this knowledge was obscured or destroyed over time along with the civilization that had created it This book presents critical studies of a series of early Chinese South Asian and other texts that look at the idea of specific lost technologies such as mechanical flight and the transmission of images There is also an examination of why concepts of a vanished golden age were prevalent in so many cultures Offering an engaging and investigative look at the propagation of history and myth in technology and culture this book is sure to interest historians and readers from many backgrounds *The Ideas in Barotse Jurisprudence* Max Gluckman, 1972 Political Anthropology Victor W. Turner, 2017-07-12 Politics a static network of structural and functional models Is it a given set of rules statuses and procedures Or a dynamic process a continuum related to the past as well as to the present and continually influenced by pressures within and outside of a society Taking the latter view of the nature of political behavior the editors of *Political Anthropology* here present an original compilation of papers that thoroughly assess contemporary anthropological research and theory on political phenomena and explore the sources and maintenance of political power One of the aims of this book is to take tentative steps toward resolving the developing crisis by investigating the structure of political action revealed in empirical data Within the general framework of political dynamics the book uses processes such as decision making the judicial process the disturbance and settlement of policy issues the application of sanctions and the outcome of disputes among other things These items will find their places as components of phases in the major sequence Investigating societies from Africa to Alaska politics is shown to be a global phenomenon a human process of action centering on the conflict between the common good and interests of groups and on the resolution or extension of that conflict by the religious structural sociocultural and psychological pressures within and external to a social grouping Essential reading for anyone concerned with the nature of political process *Political Anthropology* presents a fresh important and comprehensive overview of the wind of change currently abroad in the study of political behavior **The Ecological Transition** John W. Bennett, 2017-09-29 Written during the height of the ecology movement *The Ecological Transition* is a stunning interdisciplinary work It combines anthropology ecology and sociology to formulate an understanding of cultural environmental relationships While anthropologists have been studying relationships between humans and the physical environment for a very long time only in the last thirty years have questions inherent in these relationships broadened beyond description and classification For example the concept of environment has been extended beyond the physical into the social Although anthropologists have adopted many of the concepts that Bennett develops in the book he also feels that

the central issues have never been addressed either by anthropologists or by people in related disciplines The most important of these in Bennett's opinion is the failure to incorporate a respect for the environmental in contemporary culture which would allow making exceptions in certain human practices in order to protect the environment His point in *The Ecological Transition* is that a basic cultural change in modern civilization is necessary to achieve this end Both a theoretical and a practical work *The Ecological Transition* emphasizes the relationships between human culture the physical environment technology and social policy *The Ecological Transition* is a challenging volume that makes us face the consequences of human behavior in the modern world its effect on pollution natural resources agriculture the economy and population to name just a few areas The book remains a significant contribution to the discourse on social economic and environmental problems While the book was first published in 1976 it still reads as a contemporary tract

Prato, 2016-05-23 With half of humanity already living in towns and cities and that proportion expected to increase in the coming decades society both Western and non Western is fast becoming urban and even mega urban As such research in urban settings is evidently timely and of great importance *Anthropology in the City* brings together a leading team of anthropologists to address the complex methodological and theoretical challenges posed by field research in urban settings clearly identifying the significance of the anthropological paradigm in urban research and its centrality both to mainstream academic debates and to society more broadly With essays from experts on wide ranging ethnographic research from fields as diverse as China Europe India Latin and North America and South East Asia this book demonstrates the contribution that empirically based anthropological analysis can make to our understanding of our increasingly urban world

Politics, Law and Ritual in Tribal Society Max Gluckman, 2017-09-04 What can we learn from tribal societies about the ways in which in a variety of social settings groups of men resolve their conflicts with other men In order to answer this question Politics Law and Ritual in Tribal Society compares nearly forty case study societies most of them in Africa in their reconstructed pre colonial tribal condition comparing their small scale social relations to their large scale social context At the outset Gluckman explains to the reader that custom is the focus of interest of all types of anthropology Yet his approach manifests a strong interest in economy politics and social relationships In the volume Max Gluckman offers a succinct version of a lifetime of opinionated analysis This material is organized by theme and the ethnographic examples appear as brief illustrations of theoretical questions Discussed here also is the relation between disputes and struggles for power within the context of mechanisms of social control and stability In addition Gluckman presents a step by step survey of the cumulative development of the anthropological analysis of tribal institutions from the nineteenth century to the present and supports the argument that anthropology is a science rather than an art The new masterful introduction by Sally Falk Moore along with a new postscript of Gluckman s professional activities and publications provides newcomers to the work of Gluckman with deep insights into the contents as well as contexts within which the great anthropologist worked
