Politics In An Antipolitical Age:

Politics in an Antipolitical Age Geoffrey J. Mulgan, Geoff Mulgan, 1994 In the last years of the twentieth century many of our established political institutions seem to be in crisis Parties are declining and falling apart Governments appear unable to lead or to resolve outstanding problems Radicals feel that old routes to change are blocked In this important new book Geoff Mulgan offers a wide ranging and powerful analysis of the crisis of contemporary politics He shows that what was once thought to be a problem peculiar to the Left has now spread to affect the whole of the political system calling into question the future role of parties politicians and national governments Mulgan argues that an entire era of political institutions and ideologies stretching back some two hundred years is now coming to an end bringing confusion and disorientation to traditional political movements and governments around the world Politics has transcended its origins in national institutions and spread into new domains of social life from the global arena to the bedroom At the same time its central motivating power has waned with a return to ethical and personal sources of meaning In place of the old politics based around states and markets a new politics based around the quality and reciprocity of relationships is slowly emerging bringing with it radically new definitions of the links between past and future governors and governed men and women Politics in an Antipolitical Age is a major contribution to current debates and should be widely read

Relational Political Marketing in Party-Centred Democracies Helene P.M. Johansen, 2016-04-08 This book offers a critical re thinking of the way in which traditional market logic derived from mainstream economics and managerial marketing has for decades commonly been applied in the theoretical understanding of democratic politics within influential quarters of political science and in later years also the relatively new but rapidly expanding field of political marketing Such approaches are founded on the assumption that all markets are driven exclusively by exchange dynamics and this has in turn rendered the most basic workings of co production and participation oriented party centred political systems theoretically invisible The author starts by providing a thorough and wide ranging critical assessment of the theoretical underpinnings of the contemporary political marketing literature and its market based political science antecedents Using a relationship marketing perspective the author goes on to offer a re conceptualisation of these political spheres in terms of markets which addresses the theoretical inadequacies of prior research She closes by examining some of the most important practical implications that this alternative approach to party centred politics may have for the marketing efforts of contemporary membership parties This book is essential reading to all those interested in party centred politics and political marketing as well as democratic theorists and students of political theory in general

Expansion and Fragmentation Kees van Kersbergen, R. H. Lieshout, Grahame Lock, 1999 Is the end of the nation state approaching now that the international economy takes less and less notice of borders between countries and the European Union has already acquired so much political power What does national autonomy mean when governments delegate any number of powers to international organizations Internationalization leads to political change and the position of the nation state appears to be undergoing a radical process of erosion The surprising conclusion of this book is that the political significance of the state will not be lost The analyses show that both expansion and fragmentation of political power are characteristics of fundamental political change While it is true that the state is delegating authority and that internationalization is limiting autonomy the state is also finding new forms of cooperation and coordination both nationally and internationally to preserve and even to strengthen its power and autonomy Contrary to widely held assumptions the idea of a progressive weakening of the nation state does not prove tenable
