Politics and Oil in Kazakhstan Wojciech Ostrowski, 2010-02-25 In Kazakhstan the oil industry plays a crucial role in its economic and political life due to the country's considerable oil revenues and accompanying conflicting interests As an arena of political struggle this industry provides a good test case for uncovering regime maintenance techniques This book examines the ways in which the post Soviet Kazakh regime has managed to sustain itself in power and the regime maintenance techniques it has used in the process of establishing and upholding its position It scrutinizes the tools that the Kazakh regime employed in order to bring the country's oil industry under its control and while doing so shifts the emphasis from the prevalent zhuz horde tribe and clan based approaches to Kazakh politics towards corporatism and patron client mechanisms of control Based on extensive field work in Kazakhstan and in depth interviews with high ranking

representatives of companies working in Kazakhstan's oil and gas industry both local and foreign the National Oil Company and its subsidiaries government agencies foreign diplomats journalists and representatives of oppositional parties and NGOs this book provides a comprehensive study of the issues of politics of oil and state business relationships in Kazakhstan

The Law & Politics of the Caspian Sea in the Twenty-first Century Bahman Āqāyī, Bahman Aghai Diba, 2003 The Caspian Sea has been the focus of states and peoples in and out of the area for the last decade The surrounding states are interested in getting a decent share of the lake's resources The industrial states are interested in taking the oil gas and other natural wealth of the Caspian Sea to world markets as soon as possible The populations of the littoral states which are all ruled by undemocratic regimes are concerned with whether their governments will retain their just rights in the Caspian Sea They realise that the highest priority for their current rulers is to keep their grip on power not their nation's present or future interests How have the respective governments in Azerbaijan the Federation of Russia Kazakhstan Turkmenistan and especially Iran thought and acted in regard to the situation of the Caspian Sea and their interests The issue has a special reference to Iran because it is experiencing a terrible situation in regard to the Caspian Sea due to the poor management of its foreign policy and international relations Iran will end up with the smallest share of the Caspian Sea whether it likes it or not This is a serious setback for a country that once shared the Caspian Sea with the former Soviet Union Iran's mismanagement of its Caspian Sea rights is a political and diplomatic lesson in what not to do This book gives everyone even those without legal or political backgrounds in this issue an opportunity to survey the facts and history and to analyse the legal and political realities of the present political situation of the world's largest lake

Energy Security and Global Politics Daniel Moran, James A. Russell, 2008-07-17 This book analyses the strategic dimensions of energy security particularly where energy resources have become the object of military competition The volume explores the risks that may arise from conditions of increasing economic competition and resource scarcity and the problems that may follow if major producers or consumers of

energy lose confidence in the equity and efficiency of the market and resort instead to the use of force to secure access to energy It surveys the strategic outlook of both producer and consumer states with emphasis on nations or regions Central Asia Russia China Venezuela the Persian Gulf where unstable or rapidly evolving political conditions may undermine the currently prevailing market consensus It also examines the role of the United States as the chief guarantor of the global economy and the challenge this poses for its exercise of military power The book contests that while the global energy market may be largely self regulating it is not self defending A failure to consider how it can be most effectively defended from emerging and potential challenges merely heightens the risk that those challenges may someday become real
