Politics Of Uranium:

The Politics of Uranium Norman Moss, 1981 **The Politics of Uranium** Audrey Parry, Foreign Affairs Research Institute, 1982 *The International Politics of Africa's Strategic Minerals* Oye Ogunbadejo, 2016-10-06 This important study examines the role of Africa's strategic mineral resources in global defense and in the international economic system. Beginning with an overview of the situation as a whole, the author discusses the role of transnational corporations in the exploitation of Africa's mineral resources and explains the implications of the theories of Matthew Effect, dependency, core-periphery, and imperialism. Among the issues Ogunbadejo considers are the political economy of strategic minerals, the political significance of American, European, and Soviet dependence on these minerals vis-à-vis their relations with the producer nations, and the impact of geopolitical considerations on U.S.-South African relations.

The Politics of Nuclear Energy in China X. Yi-chong, 2010-10-14 Explores the history and challenges of nuclear energy development in China across five main areas: politics, economics, environment, technology transfer, and the nuclear fuel cycle. It emphasizes the political challenges in developing a set of long-term national strategies to ensure speedy, safe, and secure nuclear energy development.

Nuclear Exports and World Politics Robert Boardman, J. Keeley, 1983-06-18 *Nuclear Politics in America* Robert J. Duffy, 1997 Duffy's work traces nuclear politics from the creation of a powerful subgovernment through the public lobby reforms of the late 1960s and early 1970s and the deregulatory backlash of the Reagan years. He demonstrates that while policies did change in the 1970s, they did not change as much as other accounts have suggested, and that the industry continued to receive considerable federal support. The book is particularly significant for extending the discussion of nuclear policy through the Bush and Clinton years, including the controversy over waste disposal, new licensing procedures enacted in the 1992 Amendments to the Atomic Energy Act, and the effects of deregulation of electric utilities. Greenland and the International Politics of a Changing Arctic Kristian Søbø Kristensen, Jon Rahbek-Clemmensen, 2017-10-10 *Greenland and the International Politics of a Changing Arctic* examines the international politics of semi-independent Greenland in a changing and increasingly globalized Arctic. Without sovereign statehood but with increased geopolitical importance, independent foreign policy ambitions, and a solidified self-image as a trailblazer for Arctic indigenous peoples' rights, Greenland is making its mark on the Arctic and is in turn affected and empowered by Arctic developments. The chapters in this collection analyze how a distinct Greenlandic foreign policy identity shapes political ends and means, how relations to its parent state of Denmark is both a burden and a resource, and how Greenlandic actors use and influence regional institutional settings as well as foreign states and commercial actors to produce an increasingly independent, if not sovereign, entity with aims and ambitions for regional change in the Arctic. This is the first comprehensive and interdisciplinary examination of Greenland's international relations and how they are connected to wider Arctic politics. It will be essential reading for students and scholars interested in Arctic governance and security, international relations.
