gifted and controversial thinkers of his time Antifoundationalism and antirepresentationalism are the guiding motifs in his thought He wants to jettison a set of philosophical distinctions appearance reality mind body morality prudence that have dominated and shaped the history of Western philosophy since the time of Plato It is a position that has propelled him into a series of heated debates with philosophers who are the most influential of their generation analytic philosophers such as Quine Davidson Rawls and Putnam as well as Continental philosophers including Habermas Derrida Foucault and Lyotard At the same time Rorty s work has helped to break down the artificial separation between these two wings of Western philosophy by acting as an intellectual bridge between them This distinctive collection by scholars from around the world focuses upon the cultural educational and political significance of his thought The nine essays which comprise the collection examine a variety of related themes Rorty s neopragmatism his view of philosophy his philosophy of education and culture Rorty s comparison between Dewey and Foucault his relation to postmodern theory and also his form of political liberalism

The Possibility/Impossibility of a New Critical Language in Education, 2010-01-01 The critique of Critical Pedagogy in its current various trends and paths teaches me not only the shortcomings of various versions of Critical Pedagogy No less important it offers an invitation to a reflection on the limitations costs and open horizons of critique itself It is an invitation to transcend critique as such But what alternative do we have and from where or with what ears might we listen to the music of the new call What is it that awaits us outside the critical tradition that in an unproblematic manner we could use internalize or surrender ourselves to Such questions reintroduce us to Utopia They reintroduce us to the Utopia of the possibility of happiness of the kind that is neither made possible nor advocated by self abandonment and enslavement destruction of the otherness of the Other and the I This book manifests a refusal to abandon Critical Theory's telos it offers no solutions victories of the oppressed and emancipation neither does it promise peace and unproblematic consensus On the contrary all the eternal open Diasporic individual can hope for is worthy Diasporic Love of Life creativity mature forms of togetherness and eternal nomadism as a manifestation of co poiesis

Inequality, Education, and Social Exclusion in the Welfare State Kirsten Elisa Petersen, Niels Rosendal Jensen, 2025-08-08 Focusing specifically on educational contexts this volume sheds light on how the increasing inequalities and issues of social exclusion found in the processes and systems of Nordic welfare states have a detrimental impact on the well being and development opportunities of children and young people Presenting a broad range of empirical and theoretical research conducted within a variety of institutional contexts such as day care school and leisure pedagogy as well as in more domestic disadvantaged settings chapters analyse problems and issues which foster inequality within pedagogy

and education in predominantly Danish and more broadly Nordic welfare state contexts Using insights from various scientific disciplines such as psychology sociology and anthropology the volume discusses how these processes are acted out not only within welfare education systems but more broadly within social and educational policy legislation directly affecting decisions made for children and young people Ultimately the volume looks to the wider international context to argue that inequality cannot be analysed solely in relation to income and discusses different forms of inequality stemming from liberal conservative and social democratic welfare state regimes in order to recommend implications for future research This book will be of interest to researchers academics and postgraduate students in the fields of sociology of education childhood education and social inequalities within education more broadly Policymakers in these fields will also find the book useful

**Re-Reading Education Policies** ,2009-01-01 This book collects studies with a critical education policy orientation and presents itself as a handbook of matters of public concern The term critical does not refer to the adoption of a particular theoretical framework or methodology but rather it refers to a very specific ethos or way of relating to the present and the belief that the future should not be the repetition of the past This implies a concern about what is happening in our societies today and what could or should be happening in the future As a consequence the contributors to the book rely on a general notion of public policy that takes on board processes practices and discourses at a variety of levels in diverse governmental and non governmental contexts and considers the relation of policy to power to politics and to social regulation Following the detailed introduction that aims at picturing the landscape of studies with a critical education policy orientation the book presents re readings of six policy challenges globalization knowledge society lifelong learning equality democracy social inclusion accountability control efficiency and teacher professionalism It seeks to contextualise these in relation to issues of current global concern at the start of the 21st century Despite the diversity of approaches this collection of critical education policy studies shares a concern with what could be called the public and its education and represents a snapshot of education policy research at a particular time

**International Conversations on Curriculum Studies** ,2009-01-01 This collection of essays from the most prominent scholars in the field of curriculum studies paint an intellectually rich palette of the present state of curriculum research across the countries and continents when the traditionally prevailed national imaginaries give increasingly way to transnational international and postnational impulses The main parameters of education subjectivity and its belonging is shifting by employing the contradictory and broader issues around the question of nation and nation state as well as around its traditional educational counterpart the psychologized individual both radically reinterpreted by post and rereadings of old educational and social canons International Conversations on Curriculum identifies the present transformations at work nationwide worldwide between and beyond by focusing on these shifts from a variety of methodological theoretical national political and pedagogic concerns It will open new and one could argue compelling vistas for reconsidering the social and political mission and moral purpose of education policies of curriculum theory and practice
