Goldstein, 2017-08-01 Audisee eBooks with Audio combine professional narration and sentence highlighting for an engaging read aloud experience Did you know that companies and governments send more than one hundred satellites into space every year And that most of those satellites continue to orbit Earth even after they have stopped working More than 500 000 old satellites pieces of metal and other bits of junk currently pollute Earth's orbit And that number is growing Astronomers engineers and politicians all agree that the future of space exploration is in danger if this debris isn't taken care of But the problem of garbage in space is difficult and expensive to solve In this book learn more about this problem and its potential solutions *Space Debris and Other Threats from Outer Space* Joseph N. Pelton, 2013-03-27 The mounting problem of space debris in low earth orbit and its threat to the operation of application satellites has been increasingly recognized as space activities increase The efforts of the Inter Agency Space Debris Coordinating Committee IADC and UN COPUS have now led to international guidelines to mitigate the creation of new debris This book discusses the technical studies being developed for active removal processes and otherwise mitigating problems of space debris particularly in low earth orbit This book also considers threats to space systems and the Earth that comes from natural causes such as asteroids coronal mass ejections and radiation After more than half a century of space applications and explorations the time has come to consider ways to provide sustainability for long term space activities **Orbiting debris : a space environmental problem.** US Cong Off Tech Assess ..., *Orbiting Debris* ,1990 **Space Warfare** Nordin Yusof, 1999 **State Accountability for Space Debris** Peter Stubbe, 2017-11-13 In *State Accountability for Space Debris* Peter Stubbe examines the legal consequences of space debris pollution which he argues is a global environmental concern The study finds that the customary no harm rule and Article IX of the Outer Space Treaty obligate States to prevent the generation of debris and that the international community as a whole has a legitimate interest in their compliance A breach of these obligations entails the responsibility of a State and compensation must be provided for damage caused by space debris The author treats responsibility and liability separately and thoroughly scrutinizes both legal regimes with the help of common analytical elements Finally Peter Stubbe argues that a comprehensive traffic management system is required
