Microelectronic Materials C.R.M. Grovenor, 2017-10-05 This practical book shows how an understanding of structure thermodynamics and electrical properties can explain some of the choices of materials used in microelectronics and can assist in the design of new materials for specific applications It emphasizes the importance of the phase chemistry of semiconductor and metal systems for ensuring the long term stability of new devices The book discusses single crystal and polycrystalline silicon aluminium and gold based metallisation schemes packaging semiconductor devices failure analysis and the suitability of various materials for optoelectronic devices and solar cells It has been designed for senior undergraduates graduates and researchers in physics electronic engineering and materials science **Fundamentals Of Solar Cells** Alan Fahrenbruch, Richard Bube, 2012-12-02 Fundamentals of Solar Cells Photovoltaic Solar Energy Conversion provides an introduction to the fundamental physical principles of solar cells It aims to promote the expansion of solar photovoltaics from relatively small and specialized use to a large scale contribution to energy supply The book begins with a review of basic concepts such as the source of energy the role of photovoltaic conversion the development of photovoltaic cells and sequence of phenomena involved in solar power generation This is followed by separate chapters on each of the processes that take place in solar cell These include solar input properties of semiconductors recombination and the flow of photogenerated carriers charge separation and the characteristics of junction barriers and calculation of solar efficiency Subsequent chapters deal with the operation of specific solar cell devices such as a single crystal homojunction Si a single crystal heterojunction buried homojunction AlGaAs GaAs and a polycrystalline thin film cell CuxS CdS This book is intended for upper level graduate students who have a reasonably good understanding of solid state physics and for scientists and engineers involved in research and development of solar cells *Phase Separation in Glass* Oleg V.
