Kuklinski, 1975-10-31 **International Perspectives on Socio-Economic Development in the Era of Globalization** Sen, Saurabh, Bhattacharya, Anshuman, Sen, Ruchi, 2016-03-08 In today's world globalization bears intense interdependencies between countries and the impact global business transactions have on society and economics is more palpable than ever Despite this many developing countries in the global market find themselves struggling to support perpetual population growth These countries must find ways to attain sustainable development in the economic social and environmental sectors International Perspectives on Socio Economic Development in the Era of Globalization seeks to examine the existing variability of development in the global marketplace and to identify the catalysts responsible for this disparity of success This title analyzes the economic frontiers social norms and infrastructural capabilities that factor into the socio economic growth of the developing and under developed world This book will become a definitive text for policy makers academics students and business executives Equity and Efficiency in Economic Development Donald J. Savoie, Irving Brecher, 1992-10-16 The ideological foundations of the contributors range from personalized neo Marxism through extreme centre neo Keynesianism to hard line neoclassical mathematical economics Despite this diversity there is a surprising degree of consensus No contributor advocates centralized planning and none expects a free market to cure all economic ills Opinions vary as to how well the market actually works but all agree that equity and efficiency are essential goals which most consider to be complementary rather than mutually exclusive In the concluding chapter it is suggested that current economic problems are caused not so much by government intervention as by the nature of that intervention The authors believe that the recent ideological convergence may lead to a new paradigm a theory of the optimal blend of market and management that will be flexible enough to deal with the varying conditions of diverse societies thus simplifying the task of creating a smooth running global economy The contributors are Irma Adelman Mark Blaug Kenneth Boulding Irving Brecher Albert Breton John S Chipman Andr Gunder Frank Martha Fuentes Frank Niles Hansen Murray C Kemp Robin Marris Richard Musgrave Walt Rostow Donald J Savoie Nicholas Spulber and Paul Streeten Higgins himself contributes a chapter on basic concepts and collaborates with Donald Savoie on the final chapter All the Difference Benjamin Higgins, 1992-10-14 He goes on to tell the story of his advisory missions to Asia the Middle East Latin America Africa and the South Pacific Higgins

weaves anecdotal accounts of his adventures in these regions and gives his personal reactions to these environments along with analysis of the development efforts in which he participated. He explains how professional thinking about economic and social development evolved as experience and knowledge accumulated. The book also includes accounts of the author's experiences with and reactions to a variety of multicultural and bilateral aid agencies thus providing an intimate picture of their operation. In his final chapter Higgins sums up his own views on the current state of economic development, development economics, economics in general and the role of political and cultural factors in the development process.

Regional Development: Theory and Practice Baleshwar Thakur, H.S. Sharma, Suresh Misra, S. Chattopadhyay, Surendra Singh, 2017-01-01. The Five Volume Series on Regional Development Theory and Practice is a festschrift dedicated to Professor R P Misra, a distinguished scholar widely recognized as one of the pioneers who initiated and promoted Regional Planning studies in India. This five volume series with over one hundred research papers on different aspects of regional development is a fitting tribute to the scholar who spent much of his life time thinking, researching and writing about development in general and regional development in particular. These five volumes each dealing with a specific aspect of regional development: Vol 1 Concept of Regional Development, Vol 2 Measuring Development, Vol 3 Development Patterns and Structures, Vol 4 Development Policies and Vol 5 Development Challenges. Each of the five volumes begins with an introduction which is unique in the sense that this is not merely an introduction to the contributions contained in the volume but also talks of the theory of regional development, contemporary development in the discipline and the contrarian views expressed by various academics and policy makers. Another significant aspect of these introductions is the global view and a comparative scenario of the developed, developing and under developed economies of the world that the editors have kept in view in a debate seeking an universal theory of regional development. Regions are specific and often unique and regional development implies focusing on the assets of the territory, its potential and constraints. *Urban and Regional Planning and Development* Rajiv R. Thakur, Ashok K. Dutt, Sudhir K. Thakur, George M. Pomeroy, 2020-02-10. This book discusses urban planning and regional development practices in the twentieth century and ways in which they are currently being transformed. It addresses questions such as: What are the factors affecting planning dynamics at local, regional, national and global scales? With the push to adopt a market paradigm in land development and infrastructure, the relationship between resource management, sustainable development and the role of governance has been transformed. Centralized planning is giving way to privatization not only in the traditional regions but also in newly emerging regions of Asia, Africa and Latin America. Further attempts are being made to bring planning related decision making closer to the people who are most affected by it. Presenting a collection of studies from scholars around the world and highlighting recent advances in the field, the book is a valuable reference guide for those engaged in urban transformations, whether as graduate students, researchers, practitioners or policymakers. **The individuality of a scholar and advancement of social science : the scholarship**
