Industrialization in Developing and Peripheral Regions F. E. Ian Hamilton, 2017-09-05 The ten years before this book was originally published in 1986 saw major restructuring in the economies of the developed world This was often closely related to industrial development in newly industrializing and third world countries This book examines the performance of these developing countries and includes studies of peripheral regions less developed regions within more advanced economies The overall findings are that whilst some areas and countries have success stories to tell such as Korea many so called newly industrializing countries and regions have had serious problems

*Population/Urban Future* , 1982-01-01 By the end of the twentieth century over half of the world's population will be urban The urban future will in large measure determine the world future In the next two decades the world will undergo as a result of the urbanization process the most radical changes that it has ever experienced in social economic and political life Historically the city has often been the place where civilization has blossomed One of the dominant characteristics of the late twentieth century however is the inability of cities to cope with economic social and environmental problems *Population and the Urban Future* contributes to a better understanding of the problems and needs
