South Coast Air Basin, Air Quality Management Plan , 1990 *Air Quality Management and Research in Southeast Asia* Erik Velasco, Armando Retama, Dimitris Stratoulis, 2024-12-01 This book examines the capabilities for monitoring air quality developing emission inventories and running chemical transport models for regulatory forecasting and research purposes in Southeast Asia It also reviews scientific efforts made to better understand and characterize air pollution in the region Poor air quality poses a threat to public health It affects people s lives and undermines economic growth but as in many other parts of the world it has been overlooked in Southeast Asia International assessments suggest that it is the culprit of 335 thousand premature deaths in the region each year entailing a monetary cost equivalent to 6 75% of the regional GDP Reducing air pollution requires concerted efforts from all Southeast Asian nations to implement local and regional air quality policies following a science policy approach For such endeavor it is essential to develop tools that enable timely and reliable air quality management This entails collecting data to characterize the magnitude origin and impact of air pollution to support corrective actions The objective of this book is to provide a starting point for a science based conversation about implementing solutions to Southeast Asia s air pollution problem by bringing together an analysis of the availability of air

Toxicology, Committee on Air Quality Management in the United States, 2004-09-30 Managing the nation's air quality is a complex undertaking involving tens of thousands of people in regulating thousands of pollution sources. The authors identify what has worked and what has not and they offer wide ranging recommendations for setting future priorities making difficult choices and increasing innovation. This new book explores how to better integrate scientific advances and new technologies into the air quality management system. The volume reviews the three decade history of governmental efforts toward cleaner air discussing how air quality standards are set and results measured the design and implementation of control strategies regulatory processes and procedures special issues with mobile pollution sources and more. The book looks at efforts to spur social and behavioral changes that affect air quality the effectiveness of market based instruments for air quality regulation and many other aspects of the issue. Rich in technical detail this book will be of interest to all those engaged in air quality management scientists engineers industrial managers law makers regulators health officials clean air advocates and concerned citizens.

Energy Futures and Urban Air Pollution Chinese Academy of Sciences, Chinese Academy of Engineering, National Research Council, National Academy of Engineering, Policy and Global Affairs, Development, Security, and Cooperation, Committee on Energy Futures and Air Pollution in Urban China and the United States, 2008-01-22 The United States and China are the top two energy consumers in the world. As a consequence they are also the top two emitters of numerous air pollutants which have local regional and global impacts. Urbanization has led to serious air pollution problems in U.S. and Chinese cities although U.S. cities continue to face challenges the lessons they have learned in managing energy use and air quality are relevant to the Chinese experience. This report summarizes current trends profiles two U.S. and two Chinese cities and recommends key actions to enable each country to continue to improve urban air quality.
