Regional Development and Spatial Planning in an Enlarged European Union Neil Adams, 2016-04-01 The expansion of the European Union in 2004 has had significant consequences for both existing and new members of the Union New member states are assimilating into a new institutional and policy framework while the changing geography of Europe provides a different context for policy development in pre 2004 member states One of the more important fields in which these changes are impacting is regional development The admission of the new countries changes patterns of economic and social disparities across the territory of the European Union which in turn demands that existing approaches to regional development are reconsidered An approach which has proved to be one of the most innovative is spatial planning This book brings together a team of academics and policy makers from across the new Europe involved in regional development and spatial planning Providing insights into different approaches it offers a valuable opportunity to compare experiences across European borders

Place-based Economic Development and the New EU Cohesion Policy Philip McCann, Attila Varga, 2018-02-02 The new EU Cohesion Policy is one of the largest integrated development policies in the Western world and one of the largest of such programmes anywhere in the world The reforms to the EU Cohesion Policy contain many different elements each of which interlink in order to provide a cohesive overall framework Some of the key elements in the reforms however relate to the conditionalities employed and their effects on policy governance and the control mechanism the smart specialization approach to policy prioritization and resource allocation the underlying place based logic of the policy and the overall results orientation and evaluation emphasis of the policy In each of the areas of the EU Cohesion Policy reforms many different scholars from the fields of regional studies regional science and economic geography have played important roles in shaping the new policy and the chapters here highlight these increasing interactions between the policy and academic spheres of debate The collection of essays in this book each deal with specific aspects of these critical elements of the Cohesion Policy reforms In particular they examine some of the strengths and

weaknesses of these individual elements and allowing for a better understanding of the origins and backgrounds of many of the ideas underpinning these reforms This book was previously published as a special issue of Regional Studies

Visions and Strategies in European Integration Lars Lundqvist, Lars O. Persson, 2012-12-06 The first years of the 90s have witnessed thorough political and economic changes in northern Europe The long period of strong political separation between east and west and the less strong economic separation between the northern and southern sides of the Baltic Sea seemed to be replaced by far reaching integration There is no doubt that further integration will have additional impacts on the regional patterns in northern Europe The amplitude and composition of these changes are difficult to project In this volume a number of scholars in regional science and related disciplines geography economics environmental and political sciences planning have brought together important material on the current processes that reshapes northern Europe Visions and strategies on local national and supranational levels are penetrated in depth A mosaic vision of the regional development pattern emerges highlighting the importance of cooperative and competitive strategies affecting the local conditions of European regions
