Regional Integration Europe And Asia Compared:

Regional Integration - Europe and Asia Compared Woosik Moon, 2017-07-05 This book examines and compares the integration process in both Europe and Asia and draws some possible lessons for East Asia from the European experience. The book embraces the political dimension of integration: peace and security, economic trade and monetary aspects as well as cultural aspects.

Regionalism and Global Economic Integration William Donald Coleman, Geoffrey R. D. Underhill, 1998 This scholarly and interdisciplinary volume sheds much needed light on the relationship between national policies, regional integration patterns and the wider global setting. It covers regional patterns in Europe, Asia and the Americas. Individual chapters focus on topics ranging from industrial or financial policies to social welfare regimes as well as broader assessments and comparisons of regional arrangements in a global context. The chapters point to the diversity of regional patterns in the world economy and the continuing importance of national regulatory structures, yet they also point to the common pressures of globalisation felt by all, especially in the domain of capital markets. With broad coverage and clear but sophisticated analysis, this new book will be vital reading to all those seeking to clarify their understanding of the contemporary regional/global paradox.

Globalization and Regional Integration in Europe and Asia Dr Nam-Kook Kim, 2013-04-28 This volume discusses the current trend of globalization and the main characteristics of world order, focusing specifically on the destiny of the nation-state, the threat against human rights and conflicts between unilateral hegemony of the USA and Europe. It examines the contemporary European experience and compares it with Asian reality with a view to implications for the future development of Asia. It also discusses regional integration as a framework for bringing stable peace, exploring detailed principles and specific forms of a regional community in Asia. Contributors from Europe and Asia critically review previous literature on this topic and suggest new theoretical and empirical grounds of regional community in Asia. The book takes the viewpoint of comparative civilization and experiences of European integration to offer meaningful lessons for the future of nation-states and the possibility of building regional communities in Asia.

Comparative Regional Integration Finn Laursen, 2010 This volume features up-to-date studies of regional integration efforts, particularly those made in North America, South America and East Asia. Comparisons are drawn between these efforts and those made in the EU, where integration has progressed much further. The book asks what explains the variation in achievements. What kind of agreements are needed to produce regional integration? Is pooling and delegation of sovereignty necessary? How important is regional leadership?

Europe and Asia P. Murray, 2008-10-23 Much more than a simple examination of EU-Asia relations, this book examines the idea that the EU may constitute a model for East Asian regionalism. It challenges specialists on the EU to understand the EU's impact on Asia and Asia's impact on the EU whilst illustrating that there is a commonality of interests in both Europe and Asia.

Masahiro Kawai, Jong-Wha Lee, Peter A. Petri, 2010-01-01. The structure and policy architecture of the world economy as it emerges from the historic challenges now underway will be affected by the dramatic rise of Asian economies and deepening connections among them. This important book examines the dramatic transformation of the Asian economy, the challenges it faces, emerging regional solutions, and how Asia can play a more constructive role in the global economy. Asia is becoming not just the world's factory but also its leading creditor and one of its key sources of dynamism and stability. Key questions are identified and addressed in three areas: Asia's growth and productivity, financial stability, and regional economic integration. In each of these areas, the contributing authors evaluate current trends and the forces shaping the future. They consider whether the region's progress is sustainable and what it will take to make it so. How is Asia reshaping its economy in response to the changing global landscape? More urgently, how can Asia weather the severe global financial and economic storm originating from the global credit crisis? How will it extend its gains to people left behind? And how can it contribute to better governance and greater prosperity in the world economy? This book covers new ground by connecting theory, assembling detailed evidence on trends and challenges, and offering forward-looking policy prescriptions. This timely book will appeal to Asian economic policymakers as well as postgraduate students interested in Asian economics, international economics, and regional integration. Staff of international and regional organizations interested in Asian economics will also find this book invaluable. **Evolving Diversity and Interdependence of Capitalisms** Robert Boyer, Hiroyasu Uemura, Toshio Yamada, Lei Song, 2018-10-31. This book integrates three levels of political economic analysis: first, a comparative institutional analysis of the varieties of capitalism in both Europe and Asia; second, a macroeconomic analysis of industrial structural change and economic dynamics of the national economies in Europe and Asia; and then, an encompassing analysis of international production linkages and international financial instability which determine the long-term patterns of regional integration in Europe and Asia. The comparison of the European Union and ASEAN delivers some key conditions for a viable long-term regional economic integration to cope with contrasted capitalisms and growth regimes: either pragmatism in the choice of an exchange rate regime or a form of fiscal federalism. The reader will also find a genuine analysis of the dynamism of the Chinese economy, a study on institutional changes and de-industrialization in Japan, and the increasing international production linkages among China, Japan, Korea, and ASEAN. It is shown how the enlargement of the European Union and the Euro triggered the diverging competitiveness and macroeconomic performances that led to the crisis of a six-decades-long economic and political process. This book is the result of long-lasting Asian-European collaborative research. It is a milestone in the historical and comparative analysis along the regulation theory that aims at understanding the long run.
