Regionalism In East Asia:

Regionalism in East Asia Fu-Kuo Liu,Philippe Régnier,2003 Reviews the evolution of the concepts and practices of regionalism in East Asia and considers the factors which are shaping new patterns of regional co operation and integration

The United States and China Narayani Basu,2015-10-05 With its long history of internal divisiveness and its intersecting cultural and linguistic cleavages East Asia is undoubtedly a complex area However the idea of East Asia as a regional entity is one that is relatively recent a concept that gained momentum after the financial crisis that rocked the region in the 1990s In recent years East Asia has become considerably more interdependent connected and cohesive This increased cohesiveness has been driven by a dense network of trade and investments technology sharing and communication among many other variables and has been reflected in the increasing institutionalisation of regional mechanisms like the ASEAN Regionalism is not however entirely about economic interdependence In today s day and age it means not only overarching social networks and a regional identity but also strategic thinking that recognises common security interests This book takes into account the regional discourses of two of East Asia s biggest players the United States and China While the former has been a power to reckon with albeit externally deeply entrenched in the region since the end of the Second World War the rise of China in the 21st century and its emergence as the largest power in East Asia has brought a new perspective to East Asian regionalism In 2010 the United States began reasserting itself in East Asia bringing into sharp focus the ideological differences between itself and China as each vied to shape the architecture of East Asian security There is no doubt that heightened American interest comes at a time when China s own views of regionalism have become noticeably less cooperative While balance of power politics is one way to look at the geopolitical tug of war in East Asia there are questions that have not yet been answered How do the two countries look at a region that is so important for them How has that perception influenced their foreign policy within the same arena More importantly how do they define East Asia This book studies American and Chinese regional discourses from the end of the Cold War to the present day in order to highlight the rationale behind the natural balance of power politics between an established power and a rising one and its subsequent effects on security regionalism in East Asia The Political Economy of Regionalism in East Asia H. Yoshimatsu,2008-04-23 An exploration of the evolution of regionalism and regional economic relations in East Asia since the late 1990s The book analyzes moves towards free trade agreements cooperation in information technology energy and environment and agriculture by highlighting preferences and actions of governmental and business actors *Regionalism in East Asia* Fu-Kuo Liu,Philippe Regnier,2015-03-04 Regional cooperation and integration have emerged as key issues for East Asia following the financial crisis This book explores these issues and examines the degree to which a new paradigm is emerging It reviews the evolution of the concepts and practices of regionalism in East Asia and considers the factors which are shaping new patterns of regional co operation and integration It includes discussions of historical developments economic co operation socio

political factors and defence and security It considers the role of those states including China and Japan which have distinctive approaches to international relations and assesses the role of regional international bodies such as ASEAN

Dent, 2008-02-19 East Asia is a region that holds much fascination for many people It is one of the world's most dynamic and diverse regions and is also becoming an increasingly coherent region through the inter play of various integrative economic political and socio cultural processes Such a development is generally referred to as regionalism which itself has become a defining feature of the contemporary international system and this book explores the various ways in which East Asian regionalism continues to deepen Focusing on the main themes of the East Asia region and the study of regionalism economic regionalism and East Asia's new economic geography Southeast Asia and the Association of Southeast Asian Nations ASEAN trans regionalism East Asia's new free trade agreement trends and key transnational issues in East Asia such as international migration and energy security East Asian Regionalism will be an essential text for courses on East Asian regionalism Asian politics and Asian economics Key pedagogical features include end of chapter study questions case studies that discuss topical issues with study questions also provided useful tables and figures which illustrate key regional trends in East Asia extensive summary conclusions covering the chapter's main findings from different international political economy perspectives

Asian Regionalism Peter J. Katzenstein, 2000 Regionalism is of growing relevance to the political economy of Asia Pacific In the wake of the Asian financial crisis this timely volume investigates in four different chapters the dynamics of Asian regionalism during the 1980s and 1990s Specifically it focuses on Japanese and Chinese business networks in Northeast and Southeast Asia and the effects of economic monetary and financial policies on regional cooperation Asian regionalism is an important factor that both complements and shapes corporate strategies and government policies in a globalizing economy

China and East Asian Regionalism Suisheng Zhao, 2018-12-07 To convey the image of a responsible power willing to contribute to regional stability and cooperation China has shifted from a single minded preference for bilateralism to an active participation in East Asian regionalism in the recent decades This development has inspired discussions over whether a rising China could play a leadership role in building an institutionalized architecture for regional cooperation in East Asia Nevertheless this has not happened as East Asian regional cooperation and relevant activities remain mostly ad hoc and informal especially when compared to regions such as Europe To what extent has China contributed or constrained the development of regionalism in East Asia What are China's desired roles and objectives in East Asian regional cooperation What is the level of trust that other regional players have for China in regional cooperation This book seeks answers to these questions by exploring China's motivations and strategic calculations as well as

its policy practices in East Asian economic and security cooperation This book was published as a special issue of the Journal of Contemporary China *Advancing East Asian Regionalism* Melissa Curley, Nicholas Thomas, 2012-10-12 Developments in East Asia have progressed rapidly in terms of regionalism since the 1997 crisis The end of the Asian miracle called into question not only the capacity of regional states to meet the needs of their attendant peoples but also challenged the viability of regional organizations such as ASEAN to adapt and respond to the changing circumstances *Advancing East Asian Regionalism* looks at the ways in which ASEAN has expanded since the crisis and evaluates the potential of East Asia to come together in a regional formation one capable of representing the region as a whole akin to the European Community It draws upon the knowledge and perspectives of academics and policy makers actively engaged in the contradictory issues of regionalism Coupling case study material on regionalism institutions and sectoral cooperation with theoretical debates on regionalization this book is an invaluable resource that pushes our understanding of East Asian regionalism forward

Regionalism in East Asia Fu-kuo Liu, Philippe Regnier, 2013-10-18 Regional cooperation and integration have emerged as key issues for East Asia following the financial crisis This book explores these issues and examines the degree to which a new paradigm is emerging It reviews the evolution of the concepts and practices of regionalism in East Asia and considers the factors which are shaping new patterns of regional co operation and integration It includes discussions of historical developments economic co operation socio political factors and defence and security It considers the role of those states including China and Japan which have distinctive approaches to international relations and assesses the role of regional international bodies such as ASEAN **Trade Strategy in East Asia** Fithra Faisal Hastiadi, 2016-04-08 The study of regionalism is essential as it has become a vital trend with profound regional and global impacts Japan Korea and China are regarded as the key actors for such action in East Asia While regionalization has created building blocks for economic integration the act of exclusion from regionalism will only lead to marginalization Therefore it is important to learn how to make it work This book analyzes the effect of China Japan and Korea s trade strategy on ASEAN countries As closer economic ties between countries in the area have expanded significantly in the last decade economic regionalization in East Asia has proceeded in a much more dynamic fashion than regionalist projects Hastiadi argues that regionalism in the form of Regional Trade Agreements RTAs is better than the present regionalization as it promotes sustainability in the future **The Theoretical and Practical Dimensions of Regionalism in East Asia** Karolina Klecha-Tylec, 2016-11-29 This book provides a comprehensive overview of developments in East Asian regionalism combining qualitative evidence with empirical quantitative analysis It argues that two dominant processes have formed East Asian regionalism 1 regionalization and 2 inter regionalism Klecha Tylec examines the differences between traditional and new regionalisms as they apply to East Asia the differences between East Asian and European regionalism the role of the United States in shaping regional links and the evolution of the three key structures of ASEAN ASEAN 3 and Asia Summits The book is unique for examining together the

network zonal and geospatial dimensions of relations in East Asia as they apply at micro regional sub regional macro regional trans regional and inter regional levels The book offers a detailed analysis of intra regional links and the hybrid relationships between micro regions and nation states **Cross Regional Trade Agreements** Saori N. Katada,Mireya Solis,2008-06-24 An unacknowledged key feature of East Asian FTA diplomacy is the region s active cross regional preferential trading relations In sharp contrast to the Americas and Europe where cross regional initiatives gained strength after the consolidation of regional trade integration East Asian governments negotiate trade deals with partners outside of their region at an early stage in their FTA policies The book asks three main questions Are there regional factors in East Asia encouraging countries to explore cross regionalism early on What are the most important criteria behind the cross regional partner selection How do cross regional FTs CRTAs influence their intra regional trade initiatives Through detailed country case studies from China Japan South Korea Singapore Thailand and Malaysia we show the ways in which these governments seek to leverage their CRTAs in the pursuit of intra regional trade integration objectives a process that yields a much more permeated regionalism Regionalism and Subregionalism in East Asia Glenn Drover,Graham Johnson,Julia Lai Po-Wah Tao,2001 In this book the authors highlight the influence of China in the region of East Asia and the significance of sub regions within it particularly the sub region formed or imagined by Taiwan Hong Kong and their links with south China In Part One they analyse development by reference to the neo governance of globalisation and regionalisation as well as the interplay of cultural and ethical values within East Asia In Part II they turn to the dynamics of sub regional development and the role of China The picture which emerges is complex and graphic nuanced and intricate East Asia is a focal point for the contestation of forces framed by globalisation regionalisation subregionalisation state and cultural values a changing morphology in which openness is associated with export led growth and economic integration It is a region in which change is at once welcomed and distrusted a region where states are not merely powerful but authoritarian one in which business is assumed to lead politics and where old rivalries are typically transcended by desires to create new economic opportunities

Beyond Japan Peter J. Katzenstein,Takashi Shiraishi,2018-07-05 Have Japan s relative economic decline and China s rapid ascent altered the dynamics of Asian regionalism Peter Katzenstein and Takashi Shiraishi the editors of Network Power one of the most comprehensive volumes on East Asian regionalism in the 1990s present here an impressive new collection that brings the reader up to date This book argues that East Asia s regional dynamics are no longer the result of a simple extension of any one national model While Japanese institutional structures and political practices remain critically important the new East Asia now under construction is more than and different from the sum of its various national parts At the outset of a new century the interplay of Japanese factors with Chinese American and other national influences is producing a distinctively new East Asian region **East Asia** Gennady Chufrin,2006 Analyses modern tendencies in the development of regional economic cooperation in East Asia which is considered by regional countries as their response to growing challenges
