Reinaldo Funes Monzote, 2004 Tratado elemental de geografía de Cuba para de las escuelas Alfredo Miguel Aguayo, 1907

**Geografía de Cuba** Alfredo Miguel Aguayo, 1925 **From Rainforest to Cane Field in Cuba** Reinaldo Funes Monzote, 2009-11-30 In this award winning environmental history of Cuba since the age of Columbus Reinaldo Funes Monzote emphasizes the two processes that have had the most dramatic impact on the island s landscape deforestation and sugar cultivation During the first 300 years of Spanish settlement sugar plantations arose primarily in areas where forests had been cleared by the royal navy which maintained an interest in management and conservation for the shipbuilding industry The sugar planters won a decisive victory in 1815 however when they were allowed to clear extensive forests without restriction for cane fields and sugar production This book is the first to consider Cuba s vital sugar industry through the lens of environmental history Funes Monzote demonstrates how the industry that came to define Cuba and upon which Cuba urgently depended also devastated the ecology of the island The original Spanish language edition of the book published in Mexico in 2004 was awarded the UNESCO Book Prize for Caribbean Thought Environmental Category For this first English edition the author has revised the text throughout and provided new material including a glossary and a conclusion that summarizes important developments up to the present The Conversion to Sustainable Agriculture Stephen R. Gliessman, Martha Rosemeyer, 2009-12-21 With all of the environmental and social problems confronting our food systems today it is apparent that none of the strategies we have relied on in the past higher yielding varieties increased irrigation inorganic fertilizers pest damage reduction can be counted on to come to the rescue In fact these solutions are now part of the problem It is *Phytogeography and Vegetation Ecology of Cuba* Attila Borhidi, 1996 *Slavery behind the Wall* Theresa A. Singleton, 2016-10-05 A significant contribution in Caribbean archaeology Singleton weaves archaeological and documentary evidence into a compelling narrative of the lives of the enslaved at Santa Ana de Biajacas Patricia Samford author of *Subfloor Pits and the Archaeology of Slavery in Colonial Virginia* Presents results of the first historical archaeology in Cuba by an American archaeologist since the 1950s revolution Singleton s extensive historical research provides rich context for this and future archaeological investigations and the entire body of her pioneering research provides comparative material for other studies of African American life and institutional slavery in the Caribbean and the Americas Leland Ferguson author of *God s Fields Landscape Religion and Race in Moravian Wachovia* Singleton s enlightening findings on plantation slavery life will undoubtedly constitute a reference point for future studies on Afro Cuban archaeology Manuel Barcia author of *The Great African Slave Revolt of 1825 Cuba and the Fight for Freedom in Matanzas* Cuba had the largest slave society of the Spanish colonial empire At Santa Ana de Biajacas the plantation owner sequestered slaves behind a massive masonry wall In the first archaeological investigation of a Cuban plantation by an English speaker Theresa Singleton

explores how elite Cuban planters used the built environment to impose a hierarchical social order upon slave laborers Behind the wall slaves reclaimed the space as their own forming communities building their own houses celebrating gambling and even harboring slave runaways What emerged there is not just an identity distinct from other North American and Caribbean plantations but a unique slave culture that thrived despite a spartan lifestyle Singleton s study provides insight into the larger historical context of the African diaspora global patterns of enslavement and the development of Cuba as an integral member of the larger Atlantic World

Procesos biogeoquímicos Juan Reynerio Fagundo Castillo, Patricia González Hernández, 2020-08-26 La literatura científica acerca del agua es cuantiosa Probablemente no exista otro objeto natural tan visitado por tantos autores en la ciencia Sin embargo los estudiosos del agua tal y como está presente en todo el entorno humano no abundan El presente libro es precisamente un tratado simplificado hecho por un científico tan admirable como Juan Reynerio Fagundo y su colectivo de trabajo Se trata de uno de esos pocos estudiosos de casi todo lo que tiene que ver con el agua que nos sustenta la de nuestra vida diaria y la de nuestra ciencia desde las cuevas cársticas cubanas hasta los polos de la Tierra y en el libro nos dice cómo tenemos que enterarnos de ella y de sus cualidades para que nos sirva Además en este libro el agua como compuesto químico es solo una parte de la historia Cuando aparece para nosotros se presenta con componentes disueltos que le otorgan algunas de las cualidades que más necesitamos Más aún el carbono y el silicio que tan esenciales son para la vida serían intrascendentes si no se presentaran con el agua

**En todos los rincones imperiales** Sergio Eduardo Carrera Quezada, Juan Manuel Pérez Zevallos, 2023-01-19 En 1591 el rey Felipe II requirió la contribución de sus súbditos en las Indias para la creación de una armada que se encargara de defender los navíos españoles de los ataques de corsarios y enemigos del Imperio español También advirtió el desorden y el exceso habidos en la distribución de tierras en los virreinos indios Para recaudar recursos y poder fundar la armada el rey demandó de los poseedores de tierras la exhibición de sus títulos y en caso de no contar con ellos o de presentar anomalías les exigió pagar por el derecho a su regularización Desde entonces la metrópoli puso en marcha un programa dirigido a sus territorios en ultramar a fin de regularizar la posesión del suelo productivo El monarca deseaba que al igual que sus flotas su política agraria llegara a todos los rincones del Imperio Esta obra abarca tres siglos de historia de la propiedad en distintas provincias de América y de Filipinas que estuvieron bajo dominio del Imperio español y de la Monarquía portuguesa

**antropología en Vueltabajo** Barcia Zequeira, María del Carmen, Garcell Domínguez, Jorge, Herrera Jerez, Miriam, 2023-09-13 La última marea historia arqueológica y antropológica en Vueltabajo de María del Carmen Barcia Zequeira Jorge F Garcell Domínguez y Miriam Herrera Jerez es resultado de una ardua investigación interdisciplinaria sobre la trata negrera en Cuba especialmente en su etapa inicial. En el libro se analizan cuatro alijos ocurridos en el siglo XIX especialmente en la región occidental de la isla dos han sido mencionados someramente en otros estudios especializados y dos se presentan por vez primera al público. Reconstruir estos acontecimientos posibilita profundizar en el funcionamiento de la sociedad colonial cubana y en las características del comercio transatlántico de esclavos. La última marea establece y describe por primera vez a nivel mundial un sitio de memoria histórica de la trata ilegal. Cuenta además con una amplia reproducción de documentos de archivos que permiten confrontar la investigación con los textos que la sustentaron y con una rica colección de mapas e imágenes que apoyan las conclusiones de los autores. Este libro pionero en su campo marca una pauta en la investigación histórica y propone un nuevo acercamiento al fenómeno de la esclavitud.
