The Causes and Progression of Desertification Helmut Geist, 2017-09-08 This book provides an examination into the causes and prospects of desertification through a systematic review of 132 sub national case studies It uses a meta analytical model to determine whether proximate causes and underlying driving forces fall into any patterns to identify mediating factors feedbacks cross scalar dynamics and typical pathways It shows a limited set of recurrent core variables in varying combinations to drive desertification Most prominent root causes are climatic factors institutions national policies population growth and remote economic influences that lead to local cropland expansion overgrazing and infrastructure extension associated with desertification as a potential but not necessary outcome Some factors are geographically robust most of them are region and time specific

Regions at Risk Jeanne X. Kasperson, Roger E. Kasperson, Billie Lee Turner, 1995 Human induced environmental change is to be found throughout the world but there are areas that scientists consider to be critical regions regions that are particularly vulnerable to or suffering from environmental degradation In this volume nine such critical environmental regions Amazonia the Aral Sea basin the middle mountains of Nepal Kenya s Ukambani region the US Southern High Plains the Mexico Basin the North Sea the Ordos Plateau of China and the eastern Sundaland region of South East Asia are examined as case studies In chapter one the authors provide a detailed look into the concepts of environmental criticality and endangerment and propose formal definitions The nine regional studies that follow in the subsequent chapters serve to translate the conceptual framework into the physical and social realities of each area The case studies make available an up to date synthesis of vast amounts of inaccessible data and as such will be valuable to scholars and policy makers interested in specific areas of the world and others interested in regional comparisons Anyone concerned with global environmental change criticality human environment interactions and how societies in different regions have responded to environmental degradation will find much that is new and important in this pioneering innovative study
