Regulating The European Environment:

Regulating the European Environment Thomas Handler, 1994 Environmental regulation imposes strict limits on business activity but it also offers opportunities to gain an advantage in the market and to meet industry compliance requirements Understanding the limitations and the market potential is difficult and time consuming but also important and rewarding Regulating the European Environment cuts straight through the uncertainties It is designed not to be exhaustive but to provide an initial understanding of the general shape of the mass of rules and legislation in Europe and to provide a basis for further detailed analysis of the subject if required *Regulating Europe* Giandomenico Majone, 2002-11-01

Regulating Europe explains why economic and social regulation is rapidly becoming the new frontier of public policy and public administration in Europe both at the national and EU levels Statutory regulation implemented by independent regulatory bodies is replacing not only older forms of state intervention but also to some extent the redistributive policies of the welfare state Thus Regulating Europe is an examination of the emergence of the regulatory state as the successor of the Keynesian welfare state of the past Contributions emphasize the parallelism of policy developments at the national and European levels Part one provides the necessary theoretical background including a new model of demand and supply of Community regulation The second part presents a series of case studies of particular regulatory policies and institutions in the UK Germany France Spain and the EU Part three evaluates current policy and institutional developments pointing out how the lack of a tradition of statutory regulation in Europe affects the design of the new institutions Special attention is devoted to the issue of the democratic accountability of expert politically independent agencies a problem which contrary to widespread opinion is as severe at the national level as it is in Brussels It is suggested that the requirements of democratic accountability and of subsidiarity cannot be met by re nationalizing European policies much less by increasing the current level of centralization A more promising solution is the development of regulatory networks closely integrating national and supranational regulators Krämer's EU Environmental Law Ludwig Krämer, Christopher Badger, 2024-05-30 The new edition of this essential book details the present state of EU environmental law as it has developed over the last 50 years The author was personally involved in its making and enforcement having worked for more than 30 years in the environmental department of the European Commission The book therefore provides unique insights into this complex field The book discusses in detail governance and other horizontal issues such as competence questions the division of power between the EU and its Member States the individual right to a clean environment and the integration of environmental requirements into other EU policies such as energy transport agriculture fisheries trade and tourism New chapters elaborate on the relationship between UK and EU law after Brexit written by Christopher Badger and on the global effect of EU environmental law and policy Other chapters deal with climate change biodiversity water protection air and noise pollution products and waste Implementation of EU law in the Member States and the prominent role of the EU Court of Justice with its more than 1

100 environmental judgments are discussed as well as an overall assessment of EU law and policy in environmental matters and its perspectives to 2030 under the 8th EU environmental action programme At a time of globalisation the book is indispensable reading for students researchers and practising lawyers alike Regulating Europe Giandomenico

The third edition of *EU Administrative Law* provides comprehensive coverage of the administrative system in the EU and the principles of judicial review that apply in this area. This revised edition provides important updates on each area covered, including new case law, institutional developments, and EU legislation. These changes are located within the framework of broader developments in the EU. The chapters in the first half of the book deal with all the principal variants of the EU administrative regime. Thus, there are chapters dealing with the history and taxonomy of the EU administrative regime, direct administration, shared administration, comitology, agencies, social partners, and the open method of coordination. The coverage throughout focuses on the legal regime that governs the particular form of administration and broader issues of accountability, drawing on literature from political science as well as law. The focus in the second part of the book shifts to judicial review. There are detailed chapters covering all principles of judicial review, and the discussion of the law throughout is analytical and contextual. It begins with the principles that have informed the development of EU judicial review. This is followed by a chapter dealing with the judicial system and the way in which reform could impact on the subject matter of the book. There are then chapters dealing with competence, access, transparency, process, law, fact, and discretion, rights, equality, legitimate expectations, two chapters on proportionality, the precautionary principle, two chapters on remedies, and the Ombudsman. *European Environment Review*, 1986. **Research Handbook on EU Administrative Law** Carol Harlow, Päivi Leino, Giacinto della Cananea, 2017-02-24. In doing so, they provide a summary of what we know, don't know, and ought to know about EU administrative law. Examining the control functions of administrative law and the machinery for accountability, this *Research Handbook* eloquently challenges areas of authoritarian governance such as the Eurozone and security state, where control and accountability are weak, and tackles the seemingly insoluble question of citizen voice and access to policy making. **Environmental Health in International and EU Law** Stefania Negri, 2019-12-09.
