Rehabilitation Of Sports Injuries Scientific Basis:

Rehabilitation of Sports Injuries Walter R. Frontera, 2008-04-15 Rehabilitation is by definition the restoration of optimal form and function for an athlete. In this edition in the Encyclopedia series the editor and contributors advocate that rehabilitation should begin as soon as possible after the injury occurs alongside therapeutic measures such as anti-inflammatories and other pain killing agents. This might also begin before or immediately after surgery. The rehabilitative process is therefore managed by a multi-disciplinary team including physicians, physiotherapists, psychologists, nutritionists and athletic trainers amongst others. This book considers the three phases of rehabilitation: pain relief, protection of the affected area and limitation of tissue damage; limitation of impairment and recovery of flexibility, strength, endurance, balance and coordination; and finally the start of conditioning to return to training and competition. *Rehabilitation of Sports*
