Reindeer People:

The Reindeer People Piers Vitebsky, 2006 Cambridge anthropologist Piers Vitebsky the first westerner to live with the Eveny of Siberia since the Russian revolution brings readers an extraordinary case of survival in one of the most inhospitable places on Earth of photos **Humankind/nature Interaction** Brunetto Chiarelli, 2009 *The Horse in My Blood* Victoria Soyán Peemot, 2024-03-15 A fascinating interspecies relationship can be seen among the horse breeding pastoralists in the Altai and Saian Mountains of Inner Asia Victoria Soyán Peemot herself grew up in a community with close human horse relationships and uses her knowledge of the local language and horsemanship practices Building upon Indigenous research epistemologies she engages with the study of how the human horse relationships interact with each other experience injustices and develop resilience strategies as multispecies unions **The Sámi Peoples of the North** Neil Kent, 2019-03-01 There is no single volume that encompasses an integrated social and cultural history of the Sámi people from the Nordic countries and northwestern Russia Neil Kent's book fills this lacuna In the first instance he considers how the Sámi homeland is defined its geography climate and early contact with other peoples He then moves on to its early chronicles and the onset of colonisation which changed Sámi life profoundly over the last millennium Thereafter the nature of Sámi ethnicity is examined in the context of the peoples among whom the Sámi increasingly lived as well as the growing intrusions of the states who claimed sovereignty over them The Soviet gulag the Lapland War and increasing urbanisation all impacted upon Sámi life Religion too played an important role from pre historic times with their pantheon of gods and sacred sites to their Christianisation In the late twentieth century there has been an increasing symbiosis of ancient Sámi spiritual practice with Christianity Recently the intrusions of the logging and nuclear industries as well as tourism have come to redefine Sámi society and culture Even the meaning of who exactly is a Sámi is scrutinised at a time when some intermarry and yet return to Sámi where their children maintain their Sámi identity *Young People, Wellbeing and Sustainable Arctic Communities* Florian Stammler, Reetta Toivanen, 2021-10-29 Youth are usually not yet decision makers in politics or in business corporations but the sustainability of Arctic settlements depends on whether or not youth envision such places as offering opportunities for a good future This is the first multidisciplinary volume presenting original research on Arctic youth This edited book presents the results of two research projects on youth wellbeing and senses of place in the Arctic region The contributions are united by their focus on agency Rather than seeing youth as vulnerable and possible victims of decisions by others they illustrate the diverse avenues that youth pursue to achieve a good life in the Arctic The contributions also show which social economic political and legal conditions provide the best frame for youth agency in Arctic settlements Rather than portraying the Arctic as a resource frontier a hotspot for climate change and a place where biodiversity and traditional Indigenous cultures are under threat the book introduces the Arctic as a place for opportunities the realization of life trajectories and young people's images of home Rooted in anthropology the chapters also feature contributions from the

fields of sociology geography sustainability science legal studies and political science This book is intended for an audience interested in anthropology political science Arctic urban studies youth studies Arctic social sciences and humanities in general It would attract those working on Arctic sustainability wellbeing in the Arctic Arctic demography and overall wellbeing of youth The Koryak Waldemar Jochelson,2016-04-26 Since the 18th century researchers and scientists have traveled the peninsula of Kamchatka in the Russian Far East Many of them were of German origin and had been commissioned by the Russian government to perform specific tasks Their exhaustive descriptions and detailed reports are still considered some of the most valuable documents on the ethnography of the indigenous peoples of that part of the world These works inform us about living conditions and particular ways of natural resource use at various times and provide us with valuable background information for current assessment As the first profound anthropological descriptions of that region the publications of the Jesup North Pacific Expedition undertaken in the first years of the 20th century marked the beginning of a new era of research in Russia They represented a shift of the already existing transnational research networks toward North America Jochelson s work *The Koryak* was an important milestone for Russian and North American anthropology that provides to this day a unique contribution to thoroughly understanding the cultures of the North Pacific rim **A Primary Source Guide to Norway** Elizabeth Rose,2003-12-15 From its southern tip to the northern Land of the Midnight Sun Norway has one of the most extreme and beautiful landscapes on Earth Fjords and glaciers thousands of miles of coast and clean land and air offer unique experiences in nature to Norwegians and visitors alike Norway has a healthy economy and one of Europes highest standards of living Its people have vivid imaginations and fairy tales of trolls and wild creatures abound Vikings bunads the Reindeer People and Norways royalty are all visited by readers in an inspiring primary source trip through this jewel of Scandinavia *Traditional occupations of indigenous and tribal peoples: Emerging trends* ,2000 Comprises ten case studies written by indigenous authors active in their communities Describes traditional economies and occupations and analyzes the effects of globalization and industrialization on indigenous and tribal peoples Includes proposals for development models that respect indigenous rights and preserve traditional knowledge Unrepresented Nations and Peoples Organization Yearbook, Volume 2 (1996) Christopher A. Mullen,J. Atticus Ryan,2023-09-14 Now in its second year of annual publication the UNPO Yearbook contains important information about the current state of affairs of the 50 Members of the Unrepresented Nations and Peoples Organization UNPO UNPO was created in 1991 by the members themselves in order to provide a platform for those nations minorities and peoples who are not represented in established international forums such as the United Nations The mission of UNPO is to assist these people to advance their interests effectively through non violent means including diplomacy through the use of the United Nations and other international procedures for the protection of human rights through development of public opinion and through the exploration of legal options to defend their rights The number of UNPO Members has grown rapidly since its founding and today the 50 Members

represent over 100 million people The UNPO Yearbook provides a comprehensive overview of the 1996 activities of UNPO a review of the history and current positions of UNPO Members a selection of key UNPO documents and annual information as well as 1996 Conference and Mission Reports An essential reference work for anyone involved in current international affairs the UNPO Yearbook is the only publication which gives access to the material of the UNPO and its Members The UNPO Yearbook for 1996 represents a considerable body of information providing a record of the changes and developments relating to UNPO and to the activities of its Members during the past year

Food Security in the High North Kamrul Hossain, Lena Maria Nilsson, Thora Martina Herrmann, 2020-09-09 This book explores the challenges facing food security sustainability sovereignty and supply chains in the Arctic with a specific focus on Indigenous Peoples Offering multidisciplinary insights and with a particular focus on populations in the European High North region the book highlights the importance of accessible and sustainable traditional foods for the dietary needs of local and Indigenous Peoples It focuses on foods and natural products that are unique to this region and considers how they play a significant role towards food security and sovereignty The book captures the tremendous complexity facing populations here as they strive to maintain sustainable food systems both subsistent and commercial and regain sovereignty over traditional food production policies A range of issues are explored including food contamination risks due to increasing human activities in the region such as mining to changing livelihoods and gender roles in the maintenance of traditional food security and sovereignty The book also considers processing methods that combine indigenous and traditional knowledge to convert the traditional foods that are harvested and hunted into local foods This book offers a broader understanding of food security and sovereignty and will be of interest to academics scholars and policy makers working in food studies geography and environmental studies agricultural studies sociology anthropology political science health studies and biology

Routledge Handbook of Indigenous Peoples in the Arctic Timo Koivurova, Else Grete Broderstad, Dorothée Cambou, Dalee Dorrough, Florian Stammler, 2020-12-03 This handbook brings together the expertise of Indigenous and non Indigenous scholars to offer a comprehensive overview of issues surrounding the well being self determination and sustainability of Indigenous peoples in the Arctic Offering multidisciplinary insights from leading figures this handbook highlights Indigenous challenges approaches and solutions to pressing issues in Arctic regions such as a warming climate and the loss of biodiversity It furthers our understanding of the Arctic experience by analyzing how people not only survive but thrive in the planet's harshest climate through their innovation ingenuity and agency to tackle rapidly changing environments and evolving political social economic and cultural conditions The book is structured into three distinct parts that cover key topics in recent and future research with Indigenous Peoples in the Arctic The first part examines the diversity of Indigenous peoples and their cultural expressions in the different Arctic states It also focuses on the well being of Indigenous peoples in the Arctic regions The second part relates to the identities and livelihoods that Indigenous peoples in Arctic regions derive from

the resources in their environments This interconnection between resources and people's identities underscores their entitlements to use their lands and resources The third and final part provides insights into the political involvement of Indigenous peoples from local all the way to the international level and their right to self determination and some of the recent related topics in this field This book offers a novel contribution to Arctic studies empowering Indigenous research for the future and rebuilding the image of Indigenous peoples as proactive participants signaling their pivotal role in the co production of knowledge It will appeal to scholars and students of law political sciences geography anthropology Arctic studies and environmental studies as well as policy makers and professionals *Risky Futures* Olga Ulturgasheva, Barbara Bodenhorn, 2022-08-12 The volume examines complex intersections of environmental conditions geopolitical tensions and local innovative reactions characterising the Arctic in the early twenty first century What happens in the region such as permafrost thaw or methane release not only sweeps rapidly through local ecosystems but also has profound global implications Bringing together a unique combination of authors who are local practitioners indigenous scholars and international researchers the book provides nuanced views of the social consequences of climate change and environmental risks across human and non human realms **Art of Siberia** Valentina Gorbacheva, Marina Federova, 2016-03-09 The art of Siberia is a fascinating subject and the artifacts discovered in the hidden archives of the Russian Museum of Ethnography in St Petersburg are nothing less than extraordinary Artwork day to day subjects and photos dating from the turn of the century all represent the testimonies of the Siberian people who refused to yield to the hegemony of a modern world Journal Pan-Pacific Research Institution, 1926 **Journal of the Pan-Pacific Research Institution** Pan-Pacific Research Institution, 1926 *Routledge Handbook of Human-Animal Studies* Garry Marvin, Susan McHugh, 2014-04-16 Human animal studies is an academic field that has grown exponentially over the past decade It explores the whys hows and whats of human animal relations why animals are represented and configured in different ways in human cultures and societies around the world how they are imagined experienced and given significance what these relationships might signify about being human and what about these relationships might be improved for the sake of the individuals as well as the communities concerned The Routledge Handbook of Human Animal Studies presents a collection of original essays from artists and scholars who have established themselves internationally on the basis of specific and significant new contributions to human animal studies This international interdisciplinary handbook will be of interest to students and scholars of human animal studies sociology anthropology biology environmental studies geography cultural studies history philosophy media studies gender studies literature psychology ethology and visual studies **Studying Peoples in the People's Democracies** Mihály Sárkány, C. M. Hann, Peter Skalník, 2005 Under socialism the anthropological sciences developed under conflicting pressures on the one hand Soviet influences Marxist ideology and institutional changes on the other the continued influence of national traditions and of the distinction between Volkskunde and Volkerkunde The chapters bring out striking differences between

the countries considered the German Democratic Republic Poland Czechoslovakia and Hungary They also draw attention to variation within countries and between sub branches of the discipline Coverage extends from the Stalinist years to the end of the socialist era and the topics range from folklore studies at home to fieldwork expeditions abroad

Climate Change and Indigenous Peoples Randall Abate, Elizabeth Ann Kronk, 2013-01-01 Climate Change and Indigenous Peoples offers the most comprehensive resource for advancing our understanding of one of the least coherently developed of climate change policy realms legal protection of vulnerable indigenous populations The first part of the book provides a tremendously useful background on the cultural policy and legal context of indigenous peoples with special emphasis on developing general principles for climate change mitigation and adaptation solutions The remainder of the volume then carefully and thoroughly works through how those general principles play out for different regional indigenous populations around the globe All of the contributions to the volume are by leading experts who bring their insights and innovative thinking to bear on a truly complex subject Whether as a novice s starting point or expert s desktop reference I cannot think of a more useful resource for anyone interested in climate policy for indigenous peoples J B Ruhl Vanderbilt University Law School US In Climate Change and Indigenous Peoples editors Randy Abate and Elizabeth Kronk have assembled a truly comprehensive and informative look at the special issues that indigenous peoples face as a result of climate impacts and an overview of the law international and domestic climate change and human rights substantive and procedural that applies to those issues One of the great strengths of the book is that no group of indigenous people is made to stand proxy for all the others instead after exploring the general issues facing all indigenous peoples and the general legal strategies they use the book focuses most of its attention on the specific climate change issues that confront particular groups South American indigenous peoples the various tribes of Native Americans in the US the indigenous peoples of the Arctic collectively as well as in respect to particular Arctic countries Pacific Islanders indigenous peoples in Asia the various groups of Aborigines and Torres Islanders in Australia the Maori on New Zealand and several tribes in Kenya Africa For people interested in climate change and climate change adaptation this book provides a unique overview of the special vulnerabilities and plights of indigenous peoples issues that must be considered as the world works to formulate effective and protective climate change adaptation policies For people interested in indigenous peoples and international human rights this book paints a grim picture of the various ways in which climate change threatens this very diverse group of cultural entities and the deep knowledge of place that they usually possess while at the same time offering hope that the law can find ways to keep them from disappearing and indeed that indigenous peoples might just help the rest of us to survive as well Robin Kundis Craig University of Utah S J Quinney College of Law US It is one of the world s cruelest ironies that some of the earliest effects of climate change are being felt by indigenous populations around the world even though they contributed no more than trivial amounts of the greenhouse gases that are at the root of much of the problem and they are so politically and economically powerless that

they played no role in the decisions that have led to their plight At the same time many of these populations are victimized by certain actions designed to reduce emissions such as land clearing for biofuels cultivation and restrictions on forest use Professors Abate and Kronk have assembled a formidable collection of experts from around the world who demonstrate the diversity of challenges facing these indigenous peoples and the opportunities and challenges in using various international and domestic legal tools to seek redress This book will be an invaluable resource for all those examining the legal remedies that may be available either now or as the law develops in the years to come Michael B Gerrard Columbia Law School US This timely volume explores the ways in which indigenous peoples across the world are challenged by climate change impacts and discusses the legal resources available to confront those challenges Indigenous peoples occupy a unique niche within the climate justice movement as many indigenous communities live subsistence lifestyles that are severely disrupted by the effects of climate change Additionally in many parts of the world domestic law is applied differently to indigenous peoples than it is to their non indigenous peers further complicating the quest for legal remedies The contributors to this book bring a range of expert legal perspectives to this complex discussion offering both a comprehensive explanation of climate change related problems faced by indigenous communities and a breakdown of various real world attempts to devise workable legal solutions Regions covered include North and South America Brazil Canada the US and the Arctic the Pacific Islands Fiji Tuvalu and the Federated States of Micronesia Australia and New Zealand Asia China and Nepal and Africa Kenya This comprehensive volume will appeal to professors and students of environmental law indigenous law and international law as well as practitioners and policymakers with an interest in indigenous legal issues and environmental justice

Hybrid Communities Charles Stépanoff, Jean-Denis Vigne, 2018-08-06 Domestication challenges our understanding of human environment relationships because it blurs the dichotomy between what is artificial and what is natural In domestication biological evolution environmental change techniques and practices anthropological trajectories and sociocultural choices are inextricably interconnected Domestication is essentially a hybrid phenomenon that needs to be explored with hybrid scientific approaches *Hybrid Communities Biosocial Approaches to Domestication and Other Trans species Relationships* attempts for the first time to explore domestication viewed from across disciplines both in its origins and as an ongoing process This edited collection proposes new biosocial approaches and concepts which integrate the methods of social sciences archaeology and biology to shed new light on domestication in diachrony and in synchrony This book will be of great interest to all scholars working on human environment relationships and should also attract readers from the fields of social anthropology archaeology genetics ecology botany zoology history and philosophy

Indigenous Peoples' food systems Food and Agriculture Organization of the United Nations ,Alliance of Bioversity International, International Center for Tropical Agriculture, 2021-06-25 This publication provides an overview of the common and unique sustainability elements of Indigenous Peoples food systems in terms of natural resource management access to

the market diet diversity indigenous peoples governance systems and links to traditional knowledge and indigenous languages While enhancing the learning on Indigenous Peoples food systems it will raise awareness on the need to enhance the protection of Indigenous Peoples food systems as a source of livelihood for the 476 million indigenous inhabitants in the world while contributing to the Zero Hunger Goal In addition the UN Decade of Action on Nutrition 2016 2025 and the UN Food Systems Summit call on the enhancement of sustainable food systems and on the importance of diversifying diets with nutritious foods while broadening the existing food base and preserving biodiversity This is a feature characteristic of Indigenous Peoples food systems since hundreds of years which can provide answers to the current debate on sustainable food systems and resilience
