The Age of Longevity Rosalind C. Barnett, Caryl Rivers, 2016-08-22 Long productive lives are the destiny of most of us not just the privilege of our great grandchildren The story of aging is not one of steady decline and decay we need a new narrative based on solid research not scare stories Today Americans enjoy a new healthy stage of life between roughly 65 and 79 during which we are staying engaged in the workplace starting new relationships and careers remaining creative and becoming entrepreneurs and job creators We are in the midst of a major paradigm shift in the way we live Our major milestones are shifting The definition of normal behavior is changing Today we marry later or not at all cohabitation is not just a stepping stone to marriage but a long term arrangement for many Women often have their first child in their 40s and increasingly before they marry People enjoy active sex lives well into their 6th 7th or even 8th decades None of our institutions will remain the same People are working longer and given the declining birth rate older workers will be in great demand Four generations are increasingly working side by side learning from each other But we must ensure that the benefits of long life are not limited to a wealthy few The Age of Longevity shows how we as a society can embrace the life altering changes that are either coming in the near future or are already underway The authors give readers a panoramic view of how they the institutions that affect them and the country as a whole will need to adapt to what's ahead They offer strategies based on cutting edge research that will enable individuals institutions companies and governments to make the most of our lengthening life spans Using real life examples throughout the authors paint a picture of what our new longer lives will look like and the changes that need to be made so we can all make those years both more productive and more enjoyable

Social and Behavioral Foundations of Public Health Jeannine Coreil, 2010 This book is intended as a core textbook for courses in public health that examines current issues in health from a social and behavioral science perspective It is a cross disciplinary course public health medical

sociology health psychology medical anthropology and thus there are many ways to teach the course based on a particular instructor's perspective. The authors wrote the book because they were dissatisfied with the way other texts apply social science to public health and found that many texts being used were from related fields such as medicine nursing or general health. The authors are planning to do a major revision based on reviews they have collected and the reviews we have collected. We believe the revised edition will essentially be a new text based on rich feedback. They will include new theory new cases new research and a rich ancillary package. They will also reduce the frameworks presented to make the book more readable to students.
