Reinvention Of Politics Rethinking Modernity In The Global Social Order:

The Reinvention of Politics Ulrich Beck, 1997-02-07 Those who advocate ideas about postmodernity and post industrialism offer radical critiques of existing social and political institutions But they provide very little in place of those institutions It is all very well to criticize the limitations of social democracy the welfare state trade unionism and social classes as agents of change but once these have been thrown into crisis what other institutions do we have to depend on The Reinvention of Politics suggests we should think again about forging a new model of politics for our times An active devolved civil society Beck argues can sustain the claim that modernity is inherently democratic For many issues now for example those involving technology environment protest the family or gender relations belong to the domain of what the author calls subpolitics The postmodern critique of modernity in Beck's view is based on mistaken generalizations about a transitional phase in the evolution of modern society What is needed he argues is the reinvention of politics corresponding to the new demands of a society which remains modern but which has progressed beyond the earlier form of industrial society This book will be essential reading for second year undergraduates and above in the fields of social and political theory sociology and political science *The Reinvention of Politics : Rethinking Modernity in the Global Social Order* , *Handbook of Historical Sociology* Gerard Delanty, Engin F Isin, 2003-06-23 Systematic and informative this book is a complete and authoritative guide to historical sociology in three parts foundations different approaches and major substantive themes

Reification Timothy Bewes, 2020-05-05 Of all the concepts which have emerged to describe the effects of capitalism on the human world none is more graphic or easily grasped than reification the process by which men and women are turned into objects things Arising out of Marx's account of commodity fetishism the concept of reification offers an unrivalled tool with which to explain the real consequences of the power of capital on consciousness itself Symptoms of reification are proliferating around us from the branding of goods and services to racial and sexual stereotypes all forms of religious faith the growth of nationalism and recent concepts like spin and globalization At such a time the term ought to enjoy greater critical currency than ever Recent thinkers however have expressed deep reservations about the concept and the term has become marginalized in the humanities and social societies Eschewing this trend Timothy Bewes opens up a new formulation of the concept claiming that in the highly reflective age of late capitalism reification is best understood as a form of social and cultural anxiety further that such an understanding returns the concept to its origins in the work of Georg Lukacs Drawing upon writers including Kierkegaard Herman Melville Proust and Flannery O'Connor he outlines a theory of reification which promises to unite politics with truth art with experience and philosophy with real life **Environmental Sociology** Cristiano Luis Lenzi, 2022-07-06 Environmental Sociology Risk and Sustainability in Modernity examines the encounter between sociology and contemporary environmental issues It presents the proposal for an environmental sociology considering the dilemmas surrounding sustainable development ecological modernization and risk society In this book

Cristiano Luis Lenzi critically examines these concepts aiming to show how controversial environmental sociology still is. The book offers a nuanced interpretation of some of the issues and disputes that arise in the debate over these approaches in the sociological literature.

Lifelong Learning in Neoliberal Japan Akihiro Ogawa, 2015-11-01 Explores the trend of lifelong learning in Japan as a means to deal with risk in a neoliberal era. Akihiro Ogawa explores Japan's recent embrace of lifelong learning as a means by which a neoliberal state deals with risk. Lifelong learning has been heavily promoted by Japan's policymakers and statistics find one third of Japanese people engaged in some form of these activities. Activities that increase abilities and improve health help manage the insecurity that comes with Japan's new economic order and increased income disparity. Ogawa notes that the state attempts to integrate the divided and polarized Japanese population through a newly imagined collectivity, *atarashii kkyo* or the New Public Commons, a concept that attempts to redefine the boundaries of moral responsibility between the state and the individual with greater emphasis on the virtues of self-regulation. He discusses the history of lifelong learning in Japan, grassroots efforts to create an entrepreneurial self, community schools that also function as centers for problem solving, vocational education and career education.

Politics, Products, and Markets Frederick M. Wirt, 2017-07-31 In contemporary life the marketplace has emerged as an important arena for the practice of politics. Concerns about personal and family well-being as well as ethical or political assessment of favorable and unfavorable business and government practices become part and parcel of the marketplace of politics. This volume describes this phenomenon as political consumerism, reflecting an understanding of politics as a product embedded in a complex social and normative context. *Politics, Products, and Markets* is the first general study of political consumerism. It asks fundamental questions including what is new and what is old about the phenomenon. The authors discuss the mediating role of political consumerism in the problematic relationship between markets and morality. They explore whether institutional arrangements have been developed to permit consumers and producers to assume ethical responsibility for their choices and behavior. They ask why political consumerism is presently on the rise. And they investigate the relationship between globalization and political consumerism.

Part 1 *Making Money Morally* discusses how political consumerism challenges the perceived division between private interests pursued by private actors in the market and public interests pursued through political means. Part 2 *Consumer Choices and Setting of the Agenda of Politics* contains examples of how political consumerism sets the agenda of politics and discusses its democratic quality. Part 3 *Building Responsible Institutions in Multi Risk Society* has as its central theme the development of new political consumer institutions. Part 4 *Politicizing Consumers and Change in Politics* studies the characteristics of political consumers and raises the question of whether political consumerism really is politics. This volume will be of interest to social scientists, social activists and policy institutes.
