

Relational Epistemologies for a Living Planet

How do we go about arriving at “truths”, together? Not “timeless” truths, but useful truths, situated ones, something that helps *this* group, *this* organization, *this* community, find its own way forward? As a practitioner of group facilitation, I have developed certain practical knowledge about this; as a theorist and researcher-in-training, I have begun to explore long-standing questions about how our conventional cognitive habits might create difficulties for this work. In this essay, I will be exploring a variety of academic theorists who question our ingrained cultural assumptions about argumentation, while also pointing to some useful alternatives.

Forty years ago, in *Metaphors We Live By*, cognitive linguist George Lakoff and philosopher Mark Johnson invited us to become more conscious of our cultural patterns by observing how arguments, one aspect of our society’s search for truth, are organized through the metaphor of “war” (he “attacked” my position, she “defended” her thesis):

ARGUMENT is partially structured, understood, performed, and talked about in terms of WAR. [...] The language of argument is not poetic, fanciful, or rhetorical; it is literal. We talk about arguments that way because we conceive of them that way – and we act according to the way we conceive things. (1980, p. 5)¹

Lakoff and Johnson point out that even “rational argument”, the specialized subset of argument that prevails in the worlds of academia, law, and diplomacy, is still structured by war. Ostensibly restricted to stating premises, citing evidence, and drawing logical conclusions, “there is still a position to be established and defended, you can win or lose, you have an opponent whose position you attack and destroy and whose argument you try to shoot down” (p. 64). Their examples show how there is often present, in a subtle form, “the ‘irrational’ and ‘unfair’ tactics that rational arguments in their ideal form are supposed to transcend” (p. 65).

On the whole, academic culture as a whole still lacks a coherent alternative to the culture of argumentation. Here is the experience of AnaLouise Keating, multicultural women’s and gender studies professor:

¹ Lakoff and Johnson’s work on the metaphorical foundations of language was part of their invitation to move beyond the “myth of objectivism” and the “myth of subjectivism” to “the experientialist alternative” where “understanding emerges from interaction” (1980, p. 230).

Relational Epistemologies:

Decentering Epistemologies and Challenging Privilege Sophie Bourgault, Maggie FitzGerald, Fiona Robinson, 2024 Care ethics first emerged as an attempt to decenter ethics feminist scholars like Carol Gilligan argued that women's moral experiences were not reflected in the dominant masculinist approaches to ethics which were centered on a rational disembodied atomistic moral subject Care ethics challenged this model by positing ethics as relational contextualized embodied and realized through practices rather than principles Over the past decades many care ethics scholars have sought to further this project by considering care politically and epistemologically in relation to various intersecting hierarchies of power and knowledge This book advances this project by discussing the ways care ethics contributes to the decentering of dominant epistemologies and to the challenging of privilege and by considering how to decenter care ethics itself via an encounter with non Western philosophical traditions and alternative epistemologies Written by scholars from different countries disciplines and intellectual traditions the volume offers original care ethics contributions on epistemic injustice privileged irresponsibility ecofeminism settler colonialism social movements such as BLM and various racialized and gendered inequities tied to care work

Practice with Multicultural Communities Yolanda C. Padilla, Ruth McRoy, Rocío Calvo, 2020-05-21 With research showing that clients from diverse racial and ethnic groups disproportionately experience barriers in their interactions with social services and that providers recognize the need to be better prepared to work with these groups this book invites us to rethink current approaches to social work practice with multicultural communities We begin with a synthesis of the current evidence on the provision of care to multicultural communities that provides an in depth look at both client and provider experiences The following chapters offer tangible research based approaches to engaging with multicultural clients and reveal often unrecognized problems with current models of social work practice A unique compilation of rigorous qualitative experimental and community based studies demonstrate the effectiveness of culturally grounded interventions and identify

the specific factors associated with positive outcomes Areas covered include disability marriage and couple relationship problems domestic violence and mental illness within Latinx African American First Nations and South Asian communities As the authors in this book show the stories of multicultural communities are narratives of unprecedented resourcefulness and reinvention Yet social work underutilizes rich family and community cultural resources By not facilitating their involvement social service systems compromise these vital resources which social services cannot replace In arguing that we need to expand professional boundaries to encompass indigenous practices family and extended kin and therapeutic relationships that make sense to different cultural groups this book will be of interest to those studying the ways in which social work practice can be improved to better suit the needs of a racially and ethnically diverse population This book was originally published as a special issue of the Journal of Ethnic Cultural Diversity in Social Work
