Hammer, Mikael Rothstein, 2013-01-09 This title represents pioneering research into an important but under researched current The three sections in the book are devoted to the Theosophical Society Theosophically influenced religious currents and the interaction between Theosophy and surrounding culture Hitler's Monsters Eric Kurlander, 2017-06-06 A dense and scholarly book about the relationship between the Nazi party and the occult reveals stranger than fiction truths on every page Daily Telegraph The Nazi fascination with the occult is legendary yet today it is often dismissed as Himmler's personal obsession or wildly overstated for its novelty Preposterous though it was however supernatural thinking was inextricable from the Nazi project The regime enlisted astrology and the paranormal paganism Indo Aryan mythology witchcraft miracle

weapons and the lost kingdom of Atlantis in reimagining German politics and society and recasting German science and religion In this eye opening history Eric Kurlander reveals how the Third Reich s relationship to the supernatural was far from straightforward Even as popular occultism and superstition were intermittently rooted out suppressed and outlawed the Nazis drew upon a wide variety of occult practices and esoteric sciences to gain power shape propaganda and policy and pursue their dreams of racial utopia and empire Kurlander shows how swiftly irrational ideas can take hold even in an age before social media The Washington Post Deeply researched convincingly authenticated this extraordinary study of the magical and supernatural at the highest levels of Nazi Germany will astonish The Spectator A trustworthy book on an extraordinary subject The Times A fascinating look at a little understood aspect of fascism Kirkus Reviews Kurlander provides a careful clear headed and exhaustive examination of a subject so lurid that it has probably scared away some of the serious research it merits National Review

New Religions As Global Cultures Irving

Hexham, Karla Poewe, 2018-02-12 Although the Great Anti Cult Crusade links new religious movements to dangerous cults brainwashing and the need for deprogramming Karla Poewe and Irving Hexham argue that many cults are the product of a dynamic interaction between folk religions and the teachings of traditional world religions Drawing on examples from Africa the United States Asia and Europe they suggest that few new religions are really new Most draw on rich if localized cultural traditions that are shaped anew by the influence of technological change and international linkages With the widespread loss of belief in biblical mythology in the nineteenth century new mythologies based on science and elements derived from various non Western religious traditions emerged leading to the growth and popularity of new religions and cults

Religious Responses to Earthquake and Volcanic Eruption Disasters David Chester, Angus Duncan, John Duncan, 2024-07-26 This book argues that although secular and religious perspectives on disasters have often conflicted today there are grounds for believing that the world's major faiths have much to contribute to the processes of post disaster recovery and future disaster risk reduction DRR It seeks to demonstrate how contemporary dialogues between theologians disaster scholars and policymakers are defining new ways of working together These explore how the resources of religious communities e.g. buildings human resources and finance may be used to foster successful policies of DRR particularly in the aftermath of earthquakes and volcanic eruptions Musing on the relationships between religion and disasters has occurred for millennia and has affected many societies worldwide In societies where the world's major religions Buddhism Christianity Hinduism Islam Judaism and Shinto have been and remain dominant attempting to find supernatural explanations for disasters has occurred throughout history and there have been many theologies seeking to

explain why people suffer losses It is argued that developments both within these traditions of faith and in how disasters are understood by the hazard research community of researchers and planners have allowed a new modus vivendi to emerge which emphasises both a recognition of religious worldviews by academic writers and disaster planners on the one hand and a desire by people of faith and their leaders to be more fully committed to the goals of DRR The book will appeal to those who are interested in the interface between disasters and theology across the principal religions of the world This includes researchers and students in geology geography theology and religious studies It will also be useful for specialist academic audience and the educated general reader

Under Ancient Skies Paul Dunbavin, 2005-01-01 In all of the world s myths and religions we find traditions of a Great Flood There are stories too of a Golden Age the antediluvian paradise that it destroyed Might these be real memories of the ancient world And how can we analyze the subject scientifically The key to unlock these ancient myths lies in astronomy Under Ancient Skies will examine the astronomical evidence for a prehistoric cataclysm and in the process will explore a number of related anomalies in prehistory including Was there a single great flood in human prehistory or have there been many Could the workings of ancient calendars and the records of ancient eclipses give us clues about the Flood and the antediluvian world Did the Celtic Druids use a calendar based on the orbit of Saturn and is this the same antediluvian calendar that is described in Plato s myth of Atlantis Do Hindu Chinese and Mayan cosmology myths recall the years after the Flood when our world wobbled on its axis Did these same events trigger the building of astronomically aligned monuments such as Stonehenge and the pyramids Was the Atenist religion of the heretic Egyptian Pharaoh Akhenaten inspired by a series of eclipses during his lifetime Do the seven good years and the seven bad years of the Joseph story recall a time when a comet struck the Earth Did the British Druids use astronomy to calculate the size of the Earth and could they have used this knowledge to navigate to America Why were the ancient Celts so afraid that the sky would one day fall on their heads Are comets and asteroids the only danger lurking in the cosmos or could there be other dangers as yet unknown to science In 1994 we watched as a comet struck the giant planet Jupiter Geologists have recently discovered the crater in Yucatan where an asteroid impact destroyed the world of the dinosaurs Scientists and astronomers have stopped dismissing the theory that asteroids and comets could have struck the Earth during prehistory but any suggestion that a comet impact just a few thousand years ago might have caused the Biblical Flood remains the last
