Cross-Cultural Perspective Stephen Ellingson, M. Christian Green, 2014-03-18 Issues of sexuality and gender are hotly contested in both religious communities and national cultures around the world In the social sciences religious traditions are often depicted as inherently conservative or even reactionary in their commitments to powerful patriarchal and pronatalist sexual norms and gender categories In illuminating the practices of religious traditions in various cultures these essays expose the diversity of religious rituals and mythologies pertaining to sexuality In the process the contributors challenge conventional notions of what is normative in our sexual lives **The Marketization of Religion** François Gauthier, Tuomas

Martikainen, 2020-09-10 The Marketization of Religion provides a novel theoretical understanding of the relationship between religion and economy of today's world A major feature of today's capitalism is marketization While the importance that economics and economics related phenomena have acquired in modern societies has increased since the consumer and neoliberal revolutions and their shock waves worldwide social sciences of religion are still lagging behind acknowledging the consequences of these changes and incorporating them in their analysis of contemporary religion Religion as many other social realities has been traditionally understood as being of a completely different nature than the market Like oil and water religion and the market have been mainly cast as indissoluble into one another Even if notions such as the marketization commoditization or branding of religion and images such as the religious and spiritual marketplace have become popular some of the contributions aligned in this volume show how this usage is mostly metaphorical and at the very least problematic What does the marketization of religion mean The chapters provide both theoretical and empirical discussion of the changing dynamics of economy and religion in today's world Through the lenses of marketization the volume discusses the multiple at times surprising connections of a global religious reformation Furthermore in its use of empirical examples it shows how different religions in various social contexts are reformed due to growing importance of a neoliberal and consumerist logic This book was originally published as a special issue of the journal Religion **Routledge International**

Maher, 2009 In the space of a few short decades Ireland has become one of the most globalised societies in the Western world The full ramifications of this transformation for traditional Irish communities religious practice economic activity as well as literature and the arts are as yet unknown What is known is that Ireland's largely unthinking embrace of globalisation has at times had negative consequences Unlike some other European countries Ireland has eagerly and sometimes recklessly grasped the opportunities for material advancement afforded by the global project This collection of essays largely the fruit of two workshops organised under the auspices of the Humanities Institute of Ireland at University College Dublin and the National Centre for Franco Irish Studies in the Institute of Technology Tallaght explores how globalisation has taken such a firm hold on Irish society and provides a cultural perspective on the phenomenon The book is divided into two sections The first examines various manifestations of globalisation in Irish society whereas the second focuses on literary representations of globalisation The contributors acknowledged experts in the areas of cultural theory religion sociology and literature offer a panoply of viewpoints of Ireland's interaction with globalisation **The Theological Origins of Liberalism** Ismail

Kurun,2016-07-26 This eye opening book offers a critical survey of the true origins of liberalism It challenges the widely held belief among social scientists that liberalism was developed in opposition to Christianity Beginning with the Protestant Reformation it illustrates how Christian thinkers reinterpreted Christianity and used a set of indemonstrable biblical presuppositions from their reinterpretations to develop the first liberal ideas starting a process that culminates in the birth of the first liberal political theory in the writings of a devout Christian philosopher John Locke It explains how the Protestant Reformation covenant theology anti trinitarianism and medieval Christian natural law theories formed the foundations of liberalism Thus the central claim of this book is that liberalism is better understood as a radical reinterpretation of Christianity that emerged in the post Reformation and early modern period As a logical consequence of revealing the hitherto generally neglected roots of liberalism it eventually proposes that a legally pluralist liberal political theory is the best way to maintain human dignity and peace in multi religious societies of today s globalized world **Regulating Freedom of**

Religion Hans G. Kippenberg,2021-06-17 Freedom of Religion declared in Art 18 of the Universal Declaration of Human Rights 1948 concerned not only individuals but included the moral right of religious communities to manifest religion in public The International Covenant on Political and Civil Rights 1966 1976 made it a legal right and added an article that allowed states to restrict that freedom provided it violates national laws and public order This article resulted in an ongoing process of legal proceedings The Human Rights Committee of the UN and the European Court of Human Rights have made judgments that allowed a plurality of religions in public even in cases where there is a state religion A declaration of the UN against intolerance and discrimination empowered religious communities to establish charitable institutions to disseminate internationally relevant publications and to receive financial contributions and made them powerful social and political actors The same declaration defended the principles of free choice of a religion and of tolerance among citizens of different faiths This book investigates the most relevant rulings concerning the religious rights of individuals and communities It fills a gap in the study of religious communities in the globalized world and will be of interest to anyone involved in historical social legal and religious studies It will help the reader to understand the paradox of the power of religious communities in a secular and globalizing world *Handbook of Religious Culture in Nineteenth-Century Europe* Anthony Steinhoff,Jeffrey

missions and imperialism It also evaluates recent developments in work on religion vis vis both gender and nationalism while calling attention to newer research that proposes secularism as a form of belief in its own right Presenting the scholarship of eighteen leaders in their respective fields the volume explains why religion as a topic of research has moved from the periphery to the center of modern European historiography
