Proceedings of the Second Conference ,1980 Current Catalog National Library of Medicine (U.S.),1993 First multi year cumulation covers six years 1965 70 National Library of Medicine Current Catalog National Library of Medicine (U.S.), Second Conference on the Epidemiology of Aging ,1980 **Drug Studies in the Elderly** N.R. Cutler,P.K. Narang,2013-11-11 Clinical trials are the most definitive tool for evaluation of the applicability of clinical investigations The main objective of clinical investigations is to assess the potential value of a therapeutic entity in the treatment or prophylaxis of a disease or a condition It is also deemed necessary at this stage to obtain information regarding the undesirable side effects associated risks and their interrelationship with clinical assessments Most of these clinical investigations conform in some form or fashion to the guidelines adopted by the Food and Drug Administration FDA for a given class of compounds Clinical investigations in the past have not included specific studies in special or subpopulations e g the elderly Because of an ever increasing elderly population newer policies for clinical investigations are now being debated with the recognition of enhanced drug sensitivity in this special population This key research activity can lead not only to improved health care in the elderly but also to control of its costs **Publication Catalog of the U.S. Department of Health and Human Services** ,1981 **Monthly Catalogue, United States Public Documents** ,1981 *Monthly Catalog of United States Government Publications* United States. Select Committee on Nutrition and Human Needs,1973 **Modern Pharmaceutics** Gilbert S. Banker,Juergen Siepmann,Christopher Rhodes,2002-05-24 Completely revised and expanded throughout Presents a comprehensive integrated sequenced approach to drug dosage formulation design and evaluation Identifies the pharmacodynamic and physicochemical factors influencing drug action through various routes of administration **Bibliography of Agriculture** ,1974 **The Aging Musculoskeletal System** Carl L. Nelson,Anthony P. Dwyer,1984 Health and Economic Status of Older Women A.Regula Herzog,Karen Holden,Mildred Seltzer,2021-05-13 Health Economic Status of Older Women is a collection of research issues and data sources This book is organized in three parts Part 1 sets the stage for the more focused discussion of health and economic issues in the lives of old women that follows in Part 2 This first section contains papers by both Troll and Reinharz Their papers presented as keynote addresses in the conference provide a historical context for the subsequent material Both authors issue challenges to those who would focus their research efforts on older women The second part of the book contains the substantive discussions of health and economic aspects of women s lives The final part contains discussions of research methodologies **Rabies in Man and Animals** Sudhi Ranjan Garg,2013-10-23 Rabies is

the deadliest zoonotic disease that threatens humans and animals on all continents except Antarctica Asia and Africa are worst affected as more than 95 per cent of rabies associated human deaths occur in these regions India alone bears about 36 per cent of the global human rabies burden Dogs are the main transmitters of rabies that potentially threaten over 3 billion people in Asia and Africa Many developed nations have been able to successfully control dog rabies but continue to face the risk from wildlife including bats Bat rabies is responsible for most human rabies deaths in the United States of America and Canada but has emerged as a public health threat in Australia Latin America and Western Europe as well Despite being vaccine preventable rabies continues to haunt the mankind Poor resources is a major constraint but the factors like low priority attributed to rabies misconceptions in the community about the disease and unsystematic approach for its prevention and control are also responsible for the grim situation Targets have been set for elimination of human and dog rabies in all Latin American countries by 2015 and of human rabies transmitted by dogs in South East Asia by 2020 However the myths prevailing among the people together with inadequate knowledge of the health professionals veterinarians and the civic body staff about the rabies prevention and control strategies might make the task very difficult This book comprising eight chapters elaborates the causation of rabies in man and animals its global epidemiology risk analysis and effective strategies for the management of exposures Proven methods of rabies prevention and control have been discussed in length along with the challenges and ways to overcome the constraints through intersectoral coordination The inclusion of 200 frequently asked questions is a unique feature of the book which may help not only the common people and pet lovers in clearing their doubts about rabies in man and animals also be equally instrumental in updating the knowledge and skills of the public health personnel veterinarians and other professionals Apt illustrations and simple language make the contents of the book easily comprehensible and a reading pleasure
