Minton, 2002 The struggle to remove the stigma of sickness surrounding same sex love has a long history In 1973 the American Psychiatric Association removed homosexuality from its diagnostic classification of mental illness but the groundwork for this pivotal decision was laid decades earlier In this new study Henry L Minton looks back at the struggle of the American gay and lesbian activists who chose scientific research as a path for advancing homosexual rights He traces the history of gay and lesbian emancipatory research from its early beginnings in the late nineteenth century to its role in challenging the illness model in the 1970s By examining archival sources and unpublished manuscripts Minton reveals the substantial accomplishments made by key researchers and relates their life stories He also considers the contributions of mainstream sexologists such as Alfred C Kinsey and Evelyn Hooker who supported the cause of homosexual rights through the advancement of scientific knowledge By uncovering this hidden chapter in the story of gay liberation Departing from Deviance makes an important contribution to both the history of science and the history of sexuality **Secrecy and Tradecraft in Educational Administration** Eugenie A. **Philadelphia** James H. Adams, 2015-07-01 This book examines the intersection and interplay between Progressive Era rhetoric regarding commercialized vice and the realities of prostitution in early twentieth century Philadelphia Arguing that any study of commercial sexual vice in a historical context is difficult given the paucity of evidence this work instead focuses on reformers construction of a cultural view of prostitution which Adams argues was based more upon their perceptions of the trade than on reality itself Looking at the urban core of the city Progressive reformers saw vice immorality and decay but as they frequently had little face to face interaction with prostitutes plying their trade they were forced to construct culturally fueled archetypes to explain what they believed they saw Ultimately reformers in Philadelphia were battling against a rhetorical creation of their own design and any study of anti vice reform in the early twentieth century tells us more about the relationship between activists and the government than it does about vice itself *Contemporary Intelligence in Africa* Tshepo Gwatiwa, 2024-08-08 The edited volume examines contemporary intelligence and tradecraft in Africa The work offers a timely and empirically grounded account of African intelligence It provides a multi contributor narrative that explains contemporary dynamics without discounting historical and external influences as well as explaining systemic dynamics borne by African agency The volume features chapters on different issues and themes in intelligence studies which include but are not limited to intelligence politicization covert operations and subversion during political transitions institutionalizing intelligence in post conflict states intelligence and counterterrorism financial intelligence and complex crimes intelligence professionalization media and intelligence intelligence humanization environmental intelligence and others The volume is geographically representative and features case studies from the five regions of Africa North Africa the Maghreb East Africa or Horn of Central Africa West Africa and Southern Africa Without following a specific theoretical orientation the book also aims to start a conversation around the prospects for a theory for African intelligence with the various chapters paying attention to the political social and economic nuances that have a bearing on contemporary intelligence in Africa This book will be of great interest to students of intelligence studies African politics security studies and IR *A Research Agenda for Intelligence Studies and Government* Robert Dover, Huw Dylan, Michael S.
