Second Industrial Divide Possibilities For Prosperity:

The Second Industrial Divide Michael J. Piore, 1984

The Second Industrial Divide Michael Piore, Charles

Sabel, 1986-10-30 Two MacArthur Prize Fellows argue that to get out of its current economic crisis industry should abandon its attachment to standardized mass production for a system of flexible specialization Handbook of Comparative Political Economy Marino Regini, 2025-08-11 This comprehensive Handbook presents an overview of the evolution and current state of Comparative Political Economy CPE Taking an interdisciplinary approach it explores the leading theories main actors key institutions policy areas geographical boundaries and emerging themes in the field **Turkey** Aksel Ersoy, 2018-03-22 Turkey's economy is a complex mix of modern industry a traditional agricultural sector and a rapidly growing private sector At the same time the country is positioning itself and preparing for entry into the European Union That Turkey should meet her national economic goals is therefore particularly important A vital factor in achieving these will be the country's regional economies and their associated economic policies To date however many of the policy interventions adopted have been based on models drawn from developed economies and the outcome has raised a number of concerns Are policy interventions drawn from advanced economies appropriate for transitional economies such as Turkey Aksel Ersoy's book is the first work to explore the dynamics of local and regional development in Turkey In addition he offers a new theoretical framework for understanding the local and regional dynamics of emerging and transitional economies more generally Disintegrating Democracy at Work Virginia Doellgast, 2012-02-15 The shift from manufacturing to service based economies has often been accompanied by the expansion of low wage and insecure employment Many consider the effects of this shift inevitable In Disintegrating Democracy at Work Virginia Doellgast contends that high pay and good working conditions are possible even for marginal service jobs This outcome however depends on strong unions and encompassing collective bargaining institutions which are necessary to give workers a voice in the decisions that affect the design of their jobs and the distribution of productivity gains Doellgast's conclusions are based on a comparative study of the changes that occurred in the organization of call center jobs in the United States and Germany following the liberalization of telecommunications markets Based on survey data and interviews with workers managers and union representatives she found that German managers more often took the high road than those in the United States investing in skills and giving employees more control over their work Doellgast traces the difference to stronger institutional supports for workplace democracy in Germany However these democratic structures were increasingly precarious as managers in both countries used outsourcing strategies to move jobs to workplaces with lower pay and weaker or no union representation Doellgast's comparative findings show the importance of policy choices in closing off these escape routes promoting broad access to good jobs in expanding service industries **Comparing European Workers** David Brady, 2011-06-22 Focuses on the politics economics sociology and history of work and workers in Europe This title places the labor markets workplaces jobs and workers of Europe in

comparative perspective and compares contemporary patterns and the history of European workers with other models of work worldwide *The Challenge of Remaining Innovative* Sally H. Clarke, Naomi R. Lamoreaux, Steven W. Usselman, 2009 The contributors explore two main themes the challenge of remaining innovative and the necessity of managing institutional boundaries in doing so The book is organized into four parts which move outward from individual firms to networks or clusters of firms to consultants and other intermediaries in the private economy who operate outside of the firms themselves and finally to government institutions and politics Editor *Changing Welfare States* Anton Hemerijck, 2013 *Changing Welfare States* is a major new examination of the wave of social reform that has swept across Europe over the past two decades In a comparative fashion it analyses reform trajectories and political destinations in an era of rapid socioeconomic restructuring including the critical impact of the global financial crisis on welfare state futures The book argues that the overall scope of social reform across the member states of the European Union varies widely In some cases welfare state change has been accompanied by deep social conflicts while in other instances unpopular social reforms received broad consent from opposition parties trade unions and employer organizations The analysis reveals trajectories of welfare reform in many countries that are more proactive and reconstructive than is often argued in academic research and the media Alongside retrenchments there have been deliberate attempts often given impetus by intensified European economic integration to rebuild social programs and institutions and thereby accommodate welfare policy repertoires to the new economic and social realities of the 21st century Welfare state change is work in progress leading to patchwork mixes of old and new policies and institutions on the lookout perhaps for greater coherence Unsurprisingly that search process remains incomplete resulting from the institutionally bounded and contingent adaptation to the challenges of economic globalization fiscal austerity family and gender change adverse demography and changing political cleavages *Technology, Organizations and Innovation: Towards 'real virtuality'?* Ian McLoughlin, David Preece, Patrick Dawson, 2000 An authoritative collection of leading critical and contemporary writings published in the field of technology and organizations The set spans a 50 year time period taking the reader from the first and most influential papers from the early 1950s through to some recent publications which address contemporary and emerging debates in the field at the dawn of the 21st century Each of the 4 volumes has a particular focus upon this area of research and scholarship the early debates theories paradigms and concepts critical empirical studies and emerging themes and future debates The editors provide an introduction to and overview of the themes debates perspectives theories and paradigms which characterize this area of organization studies and set out a route map to help guide the reader through the four volumes *The Consortia Century* Stakeholder Alignment Collaborative, 2025 The Consortia Century presents a bold prediction about consortia becoming the defining institutional arrangement of the 21st century It notes that the prediction holds despite the spanning diverse stakeholders While consortia are not new concepts for the field they will have a growing importance in addressing societal challenges that exceed the capacity of any

single organization The Consortia Century also provides an overview of case examples of consortia challenges before discussing the model for achieving sufficient stakeholder alignment for collective action through consortia Sufficient stakeholder alignment allows interdependent individuals groups and organizations to accomplish together what they cannot do separately

Handbook of Manufacturing Industries in the World Economy John R. Bryson, Jennifer Clark, Vida Vanchan, 2015-04-30 This interdisciplinary volume provides a critical and multi disciplinary review of current manufacturing processes practices and policies and broadens our understanding of production and innovation in the world economy Chapters highlight how firms

Agglomeration and Firm Performance Fiorenza Belussi, Jose-Luis Hervás-Oliver, 2018-08-10 This contributed volume studies and explains the effect of agglomeration on a firm s innovation and performance It presents new cases as well as new topics within the agglomeration phenomenon exploring also their role under the Great Recession Beyond the analysis of regions or clusters this volume focuses on firms within agglomerations and captures this phenomenon from different perspectives contexts and diverse literatures Specifically it looks at the question under what circumstances exert generate benefits on firms performance and how those gains are generated and distributed usually asymmetrically across agglomerated firms In this context the book addresses topics such as networks collocation labor mobility firm s strategies innovation competitiveness and collective actions across a diverse set of literatures including economic geography business economics management social networks industrial districts international business sociology or industry dynamics

China's New Development Strategies Gary Gereffi, Penny Bamber, Karina Fernandez-Stark, 2022-09-17 This book examines China s new development policies which seek to reposition China from export platform for a diverse array of low cost consumer goods to technological leader in sectors linked to advanced manufacturing artificial intelligence electric vehicles e commerce and new internet related production networks oriented to China s large domestic market Focusing on the post 2010 period the book shows how China s central government programs and reforms upgrading from above are coupled with a wide variety of local government policies firm strategies and domestic economy shifts upgrading from below that link China s top down programs into industrial growth on the ground Placing China s current development push within a global value chain GVC context shows how Chinese development strategies and the global economy remain intertwined This volume brings together international GVC experts and China based researchers who have carried out detailed fieldwork and industry specific quantitative analyses of GVCs and development with important implications for policymakers in both developed and developing economies

Economic and Social Upgrading in Global Value Chains Christina Teipen, Petra Dünhaupt, Hansjörg Herr, Fabian Mehl, 2022-01-01 This book investigates how global value chain governance public institutions and strategies in the area of industrial policy and industrial relations by stakeholders such as national or global trade unions governments companies or international NGOs shape upgrading in the Global South A special feature is its interdisciplinarity combining sociological economic legal and political dimensions Case studies systematically compare

different industry trajectories Furthermore it encompasses far reaching insights into the role of global value chains for development economic catching up of countries and socio political aspects such as working conditions and interest representation *Clusters in Urban and Regional Development* Andrew Cumbers,Danny McKinnon,2013-09-13 Going beyond the celebrated hot spots of economic development this book draws upon evidence from a broader range of cities and regions to help fill some important gaps in our knowledge of how clusters operate within the contemporary global economy This book was previously published as a special issue of the journal Urban Studies Cultures of Consumption Frank Mort,2013-04-15 Examines the construction of images of masculinity and the effect they have on identity sexuality and sexual politics Influences from black and white culture are explored as well as the ironies of class colour and sexuality

Entrepreneurship and Regional Economic Development Henri L. F. de Groot,Peter Nijkamp,Roger Stough,2004-01-01 Entrepreneurship had been high on the jobs growth and economic development agendas for many years and this edited book makes an important and timely contribution to the debate the book is nicely poised to bring together space innovation and economic growth linked together with entrepreneurship This book provides an excellent and worthwhile insight into many of the issues with many contributions that significantly add to our understanding of entrepreneurship and regional development Ronald W McQuaid Growth Change **The Long Twentieth Century** Giovanni Arrighi,1994 Winner of the American Sociological Association PEWS Award 1995 for Distinguished Scholarship The Long Twentieth Century traces the epochal shifts in the relationship between capital accumulation and state formation over a 700 year period Giovanni Arrighi masterfully synthesizes social theory comparative history and historical narrative in this account of the structures and agencies which have shaped the course of world history over the millennium Borrowing from Braudel Arrighi argues that the history of capitalism has unfolded as a succession of long centuries ages during which a hegemonic power deploying a novel combination of economic and political networks secured control over an expanding world economic space The modest beginnings rise and violent unravel ing of the links forged between capital state power and geopolitics by hegemonic classes and states are explored with dramatic intensity From this perspective Arrighi explains the changing fortunes of Florentine Venetian Genoese Dutch English and finally American capitalism The book concludes with an examination of the forces which have shaped and are now poised to undermine America s world power *The Future of Consumer Society* Maurie J. Cohen,2017 Shows how consumer society is changing due to demographic ageing rising income inequality political paralysis resource scarcity and steady jobs being replaced by freelancing It examines how people are striving to find new ways to ensure livelihoods and the role that the role that worker consumer cooperatives could play The Dynamics of German Industry Werner Abelshauser,2005-10-01 Over the past decade the German Model of industrial organization has been the subject of vigorous debate among social scientists and historians especially in comparison to the American one Is a Rhenish capitalism still viable at the beginning of the 21st century and does it offer a road to the New Economy different from the one

in which the standards are set by the U S The author one of Germany s leading economic historians analyzes the special features of the German path to the New Economy as it faces the American challenge He paints a fascinating picture of Germany Inc and looks at the durability of some of its structures and the mentalities that undergird it He sees a culture clash and argues against an underestimation of the dynamics of the German industrial system A provocative book for all interested in comparative economics and those who have been inclined to dismiss the German Model as outmoded and weak
