Intercultural Language Use and Language Learning Eva Alcon Soler, Maria Pilar Safont Jorda, 2007-05-24 Eva Alc n Soler Maria Pilar Safont Jord Universitat Jaume I Spain The main purpose of the present book is to broaden the scope of research on the development of intercultural communicative competence Bearing this purpose in mind English learners are considered as intercultural speakers who share their interest for engaging in real life communication According to Byram and Fleming 1998 the intercultural speaker is someone with knowledge of one or more cultures and social identities and who enjoys discovering and maintaining relationships with people from other cultural backgrounds although s he has not been formally trained for that purpose Besides possessing knowledge of at least two cultures is the case of many learners in bilingual or multilingual communities In these contexts the objective of language learning should then focus on developing intercultural competence which in turn may involve promoting language diversity while encouraging English as both a means and an end of instruction see Alc n this volume This is the idea underlying the volume which further sustains Kramsch s argument 1998 against the native non native dichotomy Following that author we also believe that in a multilingual world where learners may belong to more than one speech community their main goal is not to become a native speaker of English but to use this language as a tool for interaction among many other languages and cultures

Aspects of Language Development in an Intensive English Program Alan Juffs, 2020-03-02 While there is much in the literature on ESL development this book is the first of its kind to track the development of specific language abilities in an Intensive English Program IEP longitudinally and highlights the implications of this particular study s findings for future IEP implementation and practice and ESL and SLA research The volume draws on many years worth of data from learners at an IEP at the University of Pittsburgh to explore selected aspects of language

development including lexical grammatical speaking and writing abilities in addition to placement assessment practices and student learning outcomes A concluding chapter points to the ways in which these findings can be applied to decision making around IEP curriculum development and the future role of IEPs in higher education more broadly With its focus on students in IEP settings and the concentration on data from students evaluated over multiple semesters this volume offers a unique opportunity in which to examine longitudinal developmental patterns of different L1 groups on a variety of measures from the same learners and will be key reading for students and researchers in second language acquisition English for Academic Purposes language education and applied linguistics
