Landscape Infrastructure Ying-Yu Hung, Gerdo Aquino, Charles Waldheim, Julia Czerniak, Adriaan Geuze, Matthew Skjonsberg, Alexander Robinson, 2012-11-05 Infrastructure is a much discussed topic within the field of landscape architecture. It regards the entire urban and rural space as a network that calls for an integrated planning and urban design approach. Natural and man-made infrastructures are viewed as forming a single overarching whole. The book examines this robust and ecologically sustainable approach with essays by well-known experts in the field. It also documents 14 international case studies by SWA landscape architects and urban designers among them: the technologically innovative roof domes for Renzo Piano's California Academy of Science in San Francisco; the restoration of the Buffalo Bayou in Houston; and several master plans for ecological corridors in China and Korea. Other projects develop smart re-use concepts for railroad tracks that no longer serve their original purpose such as Kyung Chun railway in Seoul or Katy Trail in Dallas. All projects are described extensively with technical diagrams and plans. The publication offers ideas for reinventing, repurposing and repositioning infrastructure as a viable medium for addressing issues of ecology, transit, urbanism and habitat.

Trading Environments Gordon M. Winder, Andreas Dix, 2015-12-07 This volume examines dynamic interactions between the calculative and speculative practices of commerce and the fruitfulness, variability, materiality, liveliness and risks of nature. It does so in diverse environments caught up in new trading relationships forged on and through frontiers for agriculture, forestry, mining and fishing. Historical resource frontiers are understood in terms of commercial knowledge systems organized as projects to transform landscapes and environments. The book asks how were environments traded and with what environmental and landscape consequences. How have environments been engineered, standardized and transformed within past trading systems? What have been the successes and failures of economic knowledge in dealing with resource production in complex environments? It considers cases from northern Europe, North and South America, Central Africa and New Zealand in the period between 1750 and 1990 and the contributors reflect on the effects of transnational commodity chains, competing economic knowledge systems, environmental ignorance and learning and resource exploitation. In each case they identify tensions, blind spots and environmental learning that plagued commercial projects on frontiers.

The Ethics of Aquinas Stephen J. Pope, 2002 In this comprehensive anthology, twenty-seven outstanding scholars from North America and Europe address every major aspect of Thomas Aquinas's understanding of morality and comment on his remarkable legacy. While there has been a revival of interest in recent years in the ethics of St. Thomas, no single work has yet fully examined the basic moral arguments and content of Aquinas's major moral work, the Second Part of the *Summa Theologiae*. This work fills that lacuna. The first chapters of *The Ethics of Aquinas* introduce readers to the sources, methods and major themes of Aquinas's ethics. The second part of the book provides an extended

discussion of ideas in the Second Part of the Summa Theologiae in which contributors present cogent interpretations of the structure major arguments and themes of each of the treatises The third and final part examines aspects of Thomistic ethics in the twentieth century and beyond These essays reflect a diverse group of scholars representing a variety of intellectual perspectives Contributors span numerous fields of study including intellectual history medieval studies moral philosophy religious ethics and moral theology This remarkable variety underscores how interpretations of Thomas's ethics continue to develop and evolve and stimulate fervent discussion within the academy and the church This volume is aimed at scholars students clergy and all those who continue to find Aquinas a rich source of moral insight **Vademecum** Klaske Havik, Kris Pint, Svava Riesto, Henriette Steiner, 2024-04-12 **Vademecum** 77 Minor Terms for Writing Urban Places offers a set of concepts that stimulate new approaches in planning architecture urban design policy and other practices of spatial development These diverse concepts might reveal blind spots in urban discourse or bring insights from one discipline to another The term minor refers to the ambition to look at the local and social specificity of urban places and to challenge established discursive frameworks by giving voice to multiple actors in the debate **Marquis de Sade and Continental Philosophy** Lauwaert Lode Lauwaert, 2019-03-21 He might be best known for sex and violence but Lode Lauwaert shows that the Marquis du Sade sits at a crossroads of surprisingly disparate branches of western culture abstract art Tom and Jerry gnosticism Kant's moral philosophy romanticism scholasticism stoicism and more To explore these links Lauwaert reads six interpretations of Sade in French postwar philosophy looking specifically at Pierre Klossowski Maurice Blanchot Georges Bataille Jacques Lacan Roland Barthes and Gilles Deleuze Lauwaert shows how these interpretations of de Sade can be read as a lively introduction to a postmodern way of thinking that is often considered inaccessible but which dominated the French intellectual scene after the Second World War Hobbes and Modern Political Thought Yves Charles Zarka, 2016-07-07 Yves Charles Zarka shows you how Hobbes established the framework for modern political thought Discover the origin of liberalism in the Hobbesian theory of negative liberty that Hobbesian interest and contract are essential to contemporary discussions of the comportment of economic actors and how state sovereignty returns anew in the form of the servility of the state At the same time Zarka controversially argues against received readings claiming that Hobbes is a thinker of a state monopoly on legitimate violence **Nature's Metropolis: Chicago and the Great West** William Cronon, 1992-05-05 Argues that the American frontier and city developed together by focusing on Chicago and tracing its roots from Native American habitation to its transformation by white settlement and development Being Inclined Mark Sinclair, 2019 Being Inclined is the first book in English about the work of Felix Ravaisson France's most influential philosopher in the second half of the nineteenth century Sinclair offers a study of Ravaisson's masterpiece Of Habit 1838 in its intellectual context and demonstrates its continued importance for contemporary thought Experience and the World's Own Language Richard Gaskin, 2006-02-09 Gaskin argues that John McDowell's attempt to revive the doctrine of empiricism in a minimal or

Rosenstock-Huessy, 2025-05-20 The contributions of Eugen Rosenstock Huessy 1888 1973 one of the most profound and original thinkers of the twentieth century span several disciplines in the humanities history philosophy sociology linguistics religion although his work is ultimately uncategorizable In 1933 immediately upon the ascent of Hitler he emigrated to the United States from Germany where he had been teaching at the University of Breslau In the US he was a professor at Harvard University for two years and then moved to Dartmouth College where he taught until 1957 His voice is prophetic urgent and compelling and it remains relevant This volume is a compilation of nine essays written between 1937 and 1961 all but one of them previously unpublished Protocol Alexander R. Galloway, 2006-02-17 How Control Exists after

Decentralization Is the Internet a vast arena of unrestricted communication and freely exchanged information or a regulated highly structured virtual bureaucracy In Protocol Alexander Galloway argues that the founding principle of the Net is control not freedom and that the controlling power lies in the technical protocols that make network connections and disconnections possible He does this by treating the computer as a textual medium that is based on a technological language code Code he argues can be subject to the same kind of cultural and literary analysis as any natural language computer languages have their own syntax grammar communities and cultures Instead of relying on established theoretical approaches Galloway finds a new way to write about digital media drawing on his backgrounds in computer programming and critical theory Discipline hopping is a necessity when it comes to complicated socio technical topics like protocol he writes in the preface Galloway begins by examining the types of protocols that exist including TCP IP DNS and HTML He then looks at examples of resistance and subversion hackers viruses cyberfeminism Internet art which he views as emblematic of the larger transformations now taking place within digital culture Written for a nontechnical audience Protocol serves as a necessary counterpoint to the wildly utopian visions of the Net that were so widespread in earlier days **The SAGE Handbook of**

Decadence in Iran Alireza Shomali, 2019-04-01 Political decay in Islamic societies has for the most part been the subject of structural analyses while philosophical studies have been rare often speculative and deterministic Thoughtlessness and Decadence in Iran explores from a theoretical perspective the problem of democracy deficit or political decadence in contemporary Iran and by implication in present day Middle Eastern societies This decadence the book argues is in part a religion based decadence and deliverance from it requires collective thoughtfulness about religion Alireza Shomali conceptualizes the Iranian Reality in terms of a lack of not only good life but also thinking of good living This thoughtlessness means dissolution of critical consciousness and as such it heralds escalating decadence At this moment of rapid decay the book argues thought must become relevant to society the communicative practice of thinking must emerge to examine the pathologies of a religiously administrated life Opening a dialogue between Adorno Strauss Farabi and Razi among others Shomali underlines the critical points of similarity and difference between these thinkers and envisions a local emancipatory project that noting the specifics of the Iranian case takes lessons from the Western experience without blind imitation

Flower of the Desert Antonio Negri, 2015-10-26 Antonio Negri one of Italy's most influential and controversial contemporary philosophers offers in this book a radical new interpretation of the nineteenth century Italian poet Giacomo Leopardi For Negri Leopardi is not the bitter idealistic individualist of conventional literary history but rather a profoundly materialist thinker who sees human solidarity as the only possible solution to the catastrophes of history and politics Negri traces Leopardi's resistance to the transcendental idealism of Kant and Hegel with its emphasis on reason's power to resolve real antagonisms into abstract syntheses and his gradual development of a sophisticated poetic materialism focused on the constructive power of the imagination and its true illusions Like Nietzsche who admired him Leopardi provides an alternative to modernity within modernity expressing a force of rupture and recomposition a uniquely Italian one that is as relevant now as it was in the nineteenth century and which connects to the theory of Empire as the political constitution of the present that Negri has elaborated in collaboration with Michael Hardt Aesthetics, Metaphysics, Language Stefano

Marino, 2015-09-18 Martin Heidegger and Hans Georg Gadamer undoubtedly belong among the most important representatives of twentieth century phenomenological hermeneutics which represents in turn one of the major traditions within so called continental philosophy Respectively teacher and pupil during their long and philosophically intense lives and careers Heidegger and Gadamer greatly contributed to the development of philosophical thought in our age providing significant and often decisive contributions in various fields of philosophical inquiry Their main works Being and Time 1927 and Truth and Method 1960 respectively amount to the great classics of contemporary philosophy both being extraordinarily influential books without which the history of twentieth and also twenty first century philosophy as we know it would not be conceivable This book addresses a number of problems concerning aesthetics metaphysics language and philosophical anthropology by focusing on Heidegger's and Gadamer's specific contributions in these fields and by establishing fruitful and

original comparisons between their views and those of other relevant thinkers of our time such as Hannah Arendt Richard Rorty and John McDowell The book adopts a comparative approach that portrays the complex philosophical problems and concepts at the core of this investigation from various points of view thus broadening the philosophical horizon generating a more comprehensive perspective and underlining the compatibility of different philosophical views **Mission**

Unaccomplished Alan Nadel,2025 Throughout his career prominent film scholar Alan Nadel has explored the idea of cultural narratives and how every social unit sees and explains the world through the stories we tell In this book he identifies how the war film genre has changed in the 21st century after 9 11 and more specifically Bush s announcement of Mission Accomplished He explains how the traditional war film narrative in which soldiers have a specific mission or objective to achieve in battle changed to one in which war is treated as a daily occupation with no larger mission that will lead even in the long run to peace He examines how films such as Saving Private Ryan at the end of the 20th century have morphed into films such as Jarhead The Hurt Locker and The Green Zone With the indefinite and ill planned occupation of Afghanistan and Iraq including the privatization of many military services through contractors this new situation has led to films in which we follow soldiers day to day lives as they go through their duties or even after they ve come home as in American Sniper Another change in war films during the Global War on Terror puts the emphasis on just surviving and getting out such as in Hacksaw Ridge which even carries over to films about for example WWII such as Dunkirk Again combatants have no specific goal other than escaping or helping others to escape or just surviving long enough to go home Nadel shows how this change has also affected non war films such as Sully Captain Phillips Deepwater Horizon and Get Out and even the television series Lost Nadel deftly moves between political history and film analysis with this wide ranging lucid examination of the changing nature and role of war films German Political Philosophy

Chris Thornhill,2007-01-24 This book combines philosophical intellectual historical and political theoretical methodologies to provide a new synoptic reading of the history of German political philosophy Incorporating chapters on the political ideas of Luther and Zwingli on the politics of the early Enlightenment on Idealism on Historicism and Luk cs on early Twentieth Century political theology on the Frankfurt School and on Habermas and Luhmann the book sets out both a broad and a detailed discussion of German political reflection from the Reformation to the present In doing so it explains how the development of German political philosophy is marked by a continual concern with certain unresolved and recurrent problems It claims that all the major positions address questions relating to the origin of law that all seek to account for the relation between legal validity and metaphysical and theological superstructures and that all are centred on the attempt to conceptualise and reconstruct the character of the legal subject

Inhabiting the Earth Martin Locret-Collet,Simon Springer,Jennifer Mateer,Maleea Acker,2021-10-25 Over the last several decades scholars and practitioners have progressively acknowledged that we cannot consider cities as the place where nature stops anymore resulting in urban environments being increasingly appreciated and theorized as hybrids between

nature and culture entities made of socio ecological processes in constant transformation Spanning the fields of political ecology environmental studies and sociology this new direction in urban theory emerged in concert with global concern for sustainability and environmental justice This volume explores the notion that connecting with nature holds the key to a more progressive and liberatory politics

Daily Spatial Mobilities Professor Aharon Kellerman, 2012-08-01 Discussing the concept of mobility at large and that of spatial mobilities in particular this book makes the case for daily spatial mobilities as a distinct type of mobility and explores this concept from a variety of perspectives Daily mobilities such as for commuting shopping social ties information banking news studies business meetings etc are typified by their being two way mobilities frequently performed constituting a major element of our daily routine lives and inclusive of both corporeal and or virtual mobilities Outlining his argument for daily spatial mobility author Aharon Kellerman focuses on needs and triggers for daily mobilities on levels of personal mobility and personal autonomy in daily mobilities and on potential mobilities leading to practiced ones The concept is further explored using three major types of daily mobility terrestrial virtual and aerial and three major spatial elements urban spatial reorganization in the information age mobility terminals namely bus metro and railway stations as well as airports and global opportunities through daily mobilities notably for users of the Internet

Adopting the Tune of Phrase: An Mental Symphony within **Second Nature**

In a global used by displays and the ceaseless chatter of quick transmission, the melodic splendor and psychological symphony developed by the prepared term usually diminish into the back ground, eclipsed by the relentless sound and disturbances that permeate our lives.
