International Handbook of Network Industries Matthias Finger, R. W. K. Nneke, 2011 To learn about how economic and institutional forces have shaped the network industries and policies towards them read the first part of the book To discover their impacts on particular industries read the second part And to find out what has happened in particular countries read the third part I think anyone interested in network industries should read all of it The book's structure allows for many interesting comparisons across countries and sectors Richard Green University of Birmingham UK This is a very useful and comprehensive guide to reforms in network industries in communications energy transport and water It is organized by generic topic sector and region Its authors are acknowledged experts I am confident that this Handbook will be a widely read and valuable resource for many years Martin Cave London School of Economics UK Quite an accomplishment this Handbook provides by far the most comprehensive overview of the role of the private sector and competition in infrastructure industries

with thoughtful surveys of each of the major infrastructure sectors and of the key regions and countries Jos G mez Ib ez Harvard University US In recent decades all infrastructures have undergone significant restructuring This worldwide phenomenon is often labelled liberalization and although expectations were high with respect to lower prices greater efficiency and innovation the expected gains have not always been fully realized This extensive state of the art Handbook provides a comprehensive overview of the various experiences of liberalization across different sectors regions and disciplines The multidisciplinary approach focuses on the economic political and institutional aspects of liberalization as well as to a lesser extent on technological issues As such it constitutes a unique contribution as this broad overview is often lost in the sector specific country focused and purely disciplinary approaches prevalent in the current literature Sectors explored include telecoms the Internet energy and transport whilst the truly global perspective incorporates unique case studies from an array of developed and developing countries including the US China India and the EU The International Handbook of Network Industries will become the definitive volume for academics researchers and students of economics political science and law interested in infrastructure regulation It will also prove a valuable guide to practitioners and policy makers involved in liberalization and competition

OECD Reviews of Regulatory Reform: Mexico 2004 Progress in Implementing Regulatory Reform OECD,2004-11-04 This comprehensive review of Mexican regulatory policy outlines progress made by Mexico since the 1999 review conducted by the OECD and makes recommendations for further reforms aimed at promoting investment and boosting productivity and Multinational Enterprises in Latin America since the 1990s P. Toral,2011-06-06

This volume provides an original analysis of the role of foreign firms in the structural reforms implemented by the Latin American governments since the 1980s with a focus on the making of the Spanish multinational enterprise *The Rise of the Regulatory State of the South* Navroz K. Dubash,Bronwen Morgan,2013-06-27 The 1990s and 2000s have witnessed a spurt of energetic institution building in the developing world as regulatory agencies emerge to take over the role of the executive in key sectors This rise of the regulatory state of the south is barely noticed both by scholars of regulation and of development let alone adequately documented and theorized Yet the consequences for the role of the state and modalities of governance in the south are substantial as politically charged decisions are handed over to formally technocratic agencies creating new arenas and forms of contestation over the gains and losses from development decisions Moreover this shift in the developing world comes at a time when the regulatory state in the north is under considerable stress from the global financial crisis Understanding the regulatory state of the south and particularly forms of accommodation to political pressures could stimulate a broader conversation around the role of the regulatory state in both north and south This volume seeks to provoke such a discussion by empirically exploring the emergence of regulatory agencies of a range of developing countries across Asia Africa and Latin America The cases focus on telecommunications electricity and water sectors that have often been at the frontlines of this transition The central question for the volume is Are there distinctive features of the

regulatory state of the South shaped by the political economic context of the global south in the last two decades To assist in exploring this question the volume includes brief commentaries on the case studies from a range of disciplines development economics law and regulation development sociology and comparative politics Collectively the volume seeks to shape the contours of a productive inter disciplinary conversation on the emergence of a significant empirical phenomenon the rise of regulatory agencies in the developing world with implications both for the study of regulation and the study of development
