Siegel, 2013-09-15 In 1979 Dr Bernie S Siegel a successful surgeon took a class from Elisabeth K bler Ross that focused on crayon drawing for healing especially with patients facing life threatening disease Siegel incorporated into his practice these techniques many of which were laughed at by others in the medical community But his Exceptional Cancer Patients carefrontation protocol facilitated healings often deemed miraculous and attracted attention Dr Bernie discovered and shared the fact that while patients might need antibiotics surgery radiation and chemotherapy their bodies also want to heal He found that this innate propensity could be aided by unconventional practices including drawing Why Drawing produces symbols often representing the subconscious Siegel shows how to interpret drawings to help with everything from understanding why we are sick to making treatment decisions and communicating with loved ones All those facing ill health and those caring for them personally and professionally will welcome the hands on patient proven practices offered here
