Tragedy and Triumph in Orbit Ben Evans, 2012-06-01 April 12 2011 is the 50th anniversary of Yuri Gagarin's pioneering journey into space To commemorate this momentous achievement Springer Praxis is

producing a mini series of books that reveals how humanity's knowledge of flying, working and living in space has grown in the last half century. *Tragedy and Triumph* focuses on the 1980s and early 1990s, a time when relations between the United States and the Soviet Union swung like a pendulum between harmony and outright hostility. The glorious achievements of the shuttle were violently arrested by the devastating loss of *Challenger* in 1986, while the Soviet program appeared to prosper with the last *Salyut* and the next generation *Mir* orbital station. This book explores the continued rivalry between the two superpowers during this period, with each attempting to outdo the other: the Americans keen to build a space station, the Soviets keen to build a space shuttle, and places their efforts in the context of a bitterly divisive decade which ultimately led them into partnership.

The Architecture of Industry Mathew Aitchison, 2016-03-16 From the Rust Belt to Silicon Valley, the intersection between architecture and industry has provided a rich and evolving source for historians of architecture. In a historical context, industrial architecture evokes the smoking factories of the nineteenth century or Fordist production complexes of the twentieth century. This book documents the changing nature of industrial building and planning from the end of the nineteenth century to the beginning of the twenty-first century. Drawing on research from the United States, Europe and Australia, this collection of essays highlights key moments in industrial architecture and planning representative of the wider paradigms in the field. Areas of analysis include industrial production, factories, hydroelectricity, aerospace, logistics, finance, scientific research and mining. The selected case studies serve to highlight architectural and planning innovations in industry and their contributions to wider cultural and societal currents. This richly illustrated collection will be of interest for a wide range of built environment studies incorporating findings from both historical and theoretical scholarship and design research.

International Bibliography Of Sociology 2003/Bibliographie Internationale Des Sciences Sociales Compiled by the British Library of Political and Economic Science, Jean Sykes, 2004-12 First published in 1952, the *International Bibliography of the Social Sciences* (anthropology, economics, political science and sociology) is well established as a major bibliographic reference for students, researchers and librarians in the social sciences worldwide. Key features: authority. Rigorous standards are applied to make the IBSS the most authoritative selective bibliography ever produced. Articles and books are selected on merit by some of the world's most expert librarians and academics. Breadth: today the IBSS covers over 2000 journals, more than any other comparable resource. The latest monograph publications are also included. International coverage: the IBSS reviews scholarship published in over 30 languages, including publications from Eastern Europe and the developing world. User-friendly organization: all non-English titles are word-sectioned. Extensive author, subject and place name indexes are provided in both English and French.
