Hawking, 2025-09-16 Explore Ancient Tibet and its Profound Secret Knowledge The civilization of very ancient Tibet the lost kingdom of Zhang Zhung and its legendary tradition of sorcery and true magic is among the least known and most irritatingly mysterious obscurities of history Very little of its past has been deciphered and orthodox scholarship stands before Zhang Zhung in deeper darkness today than that which shrouded the Egypt of the Pharaohs before Champollion Archaeologists debate what the ancient civilization on the Qinghai Tibet Plateau actually was when it came and whence it came Doubtless many chapters of Tibet s ancient history will lie forever silent under her remote and desolate soil yet extant traditions exist and have been too readily set aside academic pundits love to brand as mythical the accounts which have endured the millennia and which mischievously persist The study of antiquity is properly accounted worthless except as it may be made living knowledge which illuminates and enriches our contemporary life Owing to a remarkable series of events in an isolated region of the Himalayas I encountered an extraordinary group of people and through those encounters was privileged to

learn that much of the secret knowledge of the ancient Zhang Zhung culture has not only been preserved it is powerful richly illuminating and utilized to this day As the reader will discover these shrouded secrets formulate the explorations in this book As one of their most illuminating concepts those traditions relate that there is a group of esoteric teachings the Four Portals which set forth the true nature of physical reality and techniques of powerful elemental magic or sorcery The first traces of the teachings are thought to have appeared as part of the lore of the pre Tibetan Zhang Zhung culture that arose in Tibet several thousand years ago but may have originated far earlier Being a forbidden body of knowledge said to convey enormous powers the teachings disappear from the historical record for countless centuries not to reemerge until the 7th century A D in the arcane scriptures of the ancient pre Buddhist Bon religion According to those ancient traditions the teachings of the Four Portals were formulated by the earliest known Buddha like master Tonpa Shenrab Miwoche The Bon traditions relate this historic event as occurring as early as 18 000 to 16 000 B C Although still shrouded in mystery our most recent research indicates that the extant evidence places the earliest date of the Zhang Zhung culture at about 6 000 B C although the date of 18 000 to 16 000 B C may indicate the existence of a true Zhang Zhung or pre Zhang Zhung culture existing prior to the Younger Dryas Boundary cataclysmic event that effectively erased early civilizations from the historical record Much like our most recent historical Buddha Shenrab renounced his life as a prince of the royal family to become a monk Over a period of many years the traditions relate he gained access to secret knowledge that had been imparted recorded and hidden away some two thousand years earlier by an entity known as Gekhoe With this knowledge Shenrab achieved enlightenment and otherworldly powers then later composed a comprehensive body of teachings to instruct qualified seekers on the means and techniques of attaining the most elevated wisdom and power Transcribed from explorer Hawking s five years in Nepal and Tibet this book reveals the profound secret knowledge of this long forgotten realm and its extraordinary secrets of sorcery and magic An incomparable read for anyone interested in occult and paranormal studies For more information please see the read sample feature Thank you

Morinaga, 2005-05-05 Exploring the Japanese tradition of hidden or the secret transmission of knowledge within a closed and often hereditary group the author investigates how esoteric practices function how people make meaning of their practices and how this form of esotericism survived into the modern age These questions are examined through the use of esoteric texts from the 15th to 18th centuries and theatrical treatises from the late 19th century onwards

The Secret World Christopher Andrew, 2018-09-04 A comprehensive exploration of spying in its myriad forms from the Bible to the present day Easy to dip into and surprisingly funny Ben Macintyre in The New York Times Book Review The history of espionage is far older than any of today s intelligence agencies yet largely forgotten The codebreakers at Bletchley Park the most successful WWII intelligence agency were completely unaware that their predecessors had broken the codes of Napoleon during the Napoleonic wars and those of Spain before the Spanish Armada Those who do not

understand past mistakes are likely to repeat them Intelligence is a prime example At the outbreak of WWI the grasp of intelligence shown by US President Woodrow Wilson and British Prime Minister Herbert Asquith was not in the same class as that of George Washington during the Revolutionary War and eighteenth century British statesmen In the first global history of espionage ever written distinguished historian and New York Times bestselling author Christopher Andrew recovers much of the lost intelligence history of the past three millennia and shows us its continuing relevance Accurate comprehensive digestible and startling a stellar achievement Edward Lucas The Times For anyone with a taste for wide ranging and shrewdly gossipy history or for that matter for anyone with a taste for spy stories Andrew s is one of the most entertaining books of the past few years Adam Gopnik The New Yorker Remarkable for its scope and delightful for its unpredictable comparisons there are important lessons for spymasters everywhere in this breathtaking and brilliant book Richard J Aldrich Times Literary Supplement Fans of Fleming and Furst will delight in this skillfully related true fact side of the story Kirkus Reviews A crowning triumph of one of the most adventurous scholars of the security world Financial Times Includes illustrations The Art of the Chinese Snuff Bottle Hugh M. Making Transcendents Robert Ford Campany,2009-02-18 Honorable Mention Joseph Levenson Prize pre 1900 category Association for Asian Studies By the middle of the third century B C E in China there were individuals who sought to become transcendents xian deathless godlike beings endowed with supernormal powers This quest for transcendence became a major form of religious expression and helped lay the foundation on which the first Daoist religion was built Both xian and those who aspired to this exalted status in the centuries leading up to 350 C E have traditionally been portrayed as secretive and hermit like figures This groundbreaking study offers a very different view of xian seekers in late classical and early medieval China It suggests that transcendence did not involve a withdrawal from society but rather should be seen as a religious role situated among other social roles and conceived in contrast to them Robert Campany argues that the much discussed secrecy surrounding ascetic disciplines was actually one important way in which practitioners presented themselves to others He contends moreover that many adepts were not socially isolated at all but were much sought after for their power to heal the sick divine the future and narrate their exotic experiences The book moves from a description of the

roles of xian and xian seekers to an account of how individuals filled these roles whether by their own agency or by others or often by both Campany summarizes the repertoire of features that constituted xian roles and presents a detailed example of what analyses of those cultural repertoires look like He charts the functions of a basic dialectic in the self presentations of adepts and examines their narratives and relations with others including family members and officials Finally he looks at hagiographies as attempts to persuade readers as to the identities and reputations of past individuals His interpretation of these stories allows us to see how reputations were shaped and even co opted sometimes quite surprisingly into the ranks of xian Making Transcendents provides a nuanced discussion that draws on a sophisticated grasp of diverse theoretical sources while being thoroughly grounded in traditional Chinese hagiographical historiographical and scriptural texts The picture it presents of the quest for transcendence as a social phenomenon in early medieval China is original and provocative as is the paradigm it offers for understanding the roles of holy persons in other societies **Jade** Richard Alexander,1928

Traditional Japanese Arts and Culture Stephen Addiss,Gerald Groemer,J. Thomas Rimer,2006-01-31 This admirable and necessary volume allows the original writers to speak to us directly Though all this is carefully documented we are at the same time spared any layers of scholarly interpretation Rather the richness of the original reaches us complete Donald Richie Japan Times May 14 2006 Japanese artists musicians actors and authors have written much over the centuries about the creation meaning and appreciation of various arts Most of these works however are scattered among countless hard to find sources or make only a fleeting appearance in books devoted to other subjects Compiled in this volume is a wealth of original material on Japanese arts and culture from the prehistoric era to the Meiji Restoration 1867 These carefully selected sources including many translated here for the first time are placed in their historical context and outfitted with brief commentaries allowing the reader to make connections to larger concepts and values found in Japanese culture The book is a treasure trove of material on the visual and literary arts but it contains as well primary texts on topics not easily classified in Western categories such as the martial and culinary arts the art of tea and flower arranging More than 60 color and black and white illustrations enrich the collection and provide further insights into Japanese artistic and cultural values **Strange Writing** Robert Ford Campany,1996-01-01 This is the first comprehensive Western language study of the important Chinese genre of writing known as accounts of the anomalies zhiguai in its formative period The book sets forth a new view of the nature and origins of the genre **Karmic Relationships** Rudolf Steiner,2002-05-28 During 1924 before his last address in September Rudolf Steiner gave over eighty lectures on the subject of karma to members of the Anthroposophical Society These profoundly esoteric lectures examine the underlying laws inherent in reincarnation and karma and explore in detail the incarnations of specific historical figures In Rudolf Steiner s words the study of karma is a matter of penetrating into the most profound mysteries of existence for within the sphere of karma and the course it takes lie those processes which are the basis of the other phenomena of world existence A study of the karma of the anthroposophical movement and society the
