**Lordship, Capitalism, and the State in Flanders (c. 1250-1570)** Frederik Buylaert, Miet Adriaens, 2025-03-30 This is an open access title available under the terms of a CC BY NC ND 4.0 International licence It is free to read at Oxford Scholarship Online and offered as a free PDF download from OUP and selected open access locations Until recently historians tended to assume that in the late medieval period local lordship was effectively crushed between strong cities and states Developing recent debates to the contrary Lordship Capitalism and the State in Flanders draws on qualitative and quantitative evidence from the county of Flanders to reconsider the ways in which lordship continued to be a cornerstone of life in rural Europe across this period Flanders is an extreme example of a scenario in which seigneuries were not so much vehicles for the elite interests of lords but dynamic instruments for village communities and lordship here was as important if not more so at the start of the Dutch Revolt in 1567 than it was around the mid thirteenth century where this study begins As a forerunner in the commercialization and urbanization of society Flanders saw the rise of mighty towns who provided the inhabitants of their hinterlands with a shield against seigneurial oppression up to the point that the seigneurial administration could only continue to function if it was closely aligned with the interests of peasants Next to this the Low Countries including Flanders became part of the mighty Burgundian Habsburg polity Rather than undermining seigneurial lordship however the princely administration increasingly relied on the peasant aldermen of seigneuries to provide justice and governance to villages The self rule of Flemish peasantries through lordship meant that the seigneurie was the forum in which contemporaries made a critical decision that being how to respond to the new and all encompassing phenomenon of agrarian capitalism a mode of agricultural production that first emerged in the Low Countries and Flanders before spreading

to the rest of the globe The persistence and transformation of seigneurial lordship into what might be called middle class lordship thus had great consequences for Flemish society across the late medieval period and beyond and this story helps scholars to understand more generally how power relations between lords and peasants differed from one region to the next in dialogue with different trajectories in urbanization economic change and state formation

**Lords and Lordship in the British Isles in the Late Middle Ages** Rees Davies,2009-06-11 It is well known that political economic and social power in the British Isles in the Middle Ages lay in the hands of a small group of domini lords In his final book the late Sir Rees Davies explores the personalities of these magnates the nature of their lordship and the ways in which it was expressed in a diverse and divided region in the period 1272 1422 Although their right to rule was rarely questioned the lords flaunted their identity and superiority through the promotion of heraldic lore the use of elevated forms of address and by the extravagant display of their wealth and power Their domestic routine furnishings dress diet artistic preferences and pastimes all spoke of a lifestyle of privilege and authority Warfare was a constant element in their lives affording access to riches and reputation but also carrying the danger of capture ruin and even death while their enthusiasm for crusades and tournaments testified to their energy and bellicose inclinations Above all underpinning the lords control of land was their control of men a complex system of dependence and reward that Davies restores to central significance by studying the British Isles as a whole The exercise and experience of lordship was far more varied than the English model alone would suggest

*HL 75 - The Office of Lord Chancellor* The Stationery Office,2014

The rule of law is a fundamental tenet of the United Kingdom constitution In the context of the Government it means more than simple compliance with the letter of the law it means governing in accordance with constitutional principles The Lord Chancellor has traditionally had a key role to play both by defending the independence of the judiciary and by ensuring that the rule of law is respected within Government The Constitutional Reform Act 2005 substantially changed the office of Lord Chancellor The Lord Chancellor is no longer the head of the judiciary or speaker of the House of Lords and since 2007 the office has been combined with that of the Secretary of State for Justice Yet the duty of the Lord Chancellor in relation to the rule of law remains unchanged It has become more difficult for post reform Lord Chancellors with their wider policy responsibilities more overtly political positions as Secretaries of State for Justice and their reduced role in relation to the judiciary to carry out this duty in relation to the rule of law Whilst responsibility for constitutional change passed to the

Deputy Prime Minister in 2010 the Committee have heard no evidence that he or any other minister currently takes responsibility for the state of the constitution as a whole The Committee concludes that despite significant changes to the office of Lord Chancellor it still retains important constitutional duties and responsibilities that go beyond those of other ministers and recommends that the office and its associated responsibilities be retained and strengthened with an amended oath
