Lordship and Community in Medieval Europe Fredric L. Cheyette, 1975 **Lordship and Community in Medieval Europe** Fredric L. Cheyette, 1975 *Lordship and Community in Medieval Europe. Selected Readings. Edited by Fredric L. Cheyette. [With Maps.].* Fredric Lawrence CHEYETTE, 1968 **Lordship and Community in Medieval Europe** Fredric L. Cheyette, 1968 **International Relations** Andrew Linklater, 2000 Lordship and the Decentralized State in Late Medieval Europe Erika Graham-Goering, Jim van der Meulen, Frederik Buylaert, 2025-01-23 Lordship and the Decentralized State in Late Medieval Europe rethinks the rise of modern European states as a process of decentralization The idea that states made lordships obsolete is challenged by showing how the distribution of authority among local lords reinforced the development of new political systems **Lordship and Locality in the Long Twelfth Century** Hannah Boston, 2024 A new perspective on lordship in England between the Norman Conquest and Magna Carta Multiple lordship that is holding land or owing allegiance to more than one lord simultaneously was long regarded under the western European feudal model as a potentially dangerous aberration and a sign of decline in the structure of lordship Through an analysis of the minor lords of Leicestershire Derbyshire and Staffordshire during the long twelfth century this study demonstrates conversely that multiple lordship was at least as common as single lordship in this period and regarded as a normal practice and explores how these minor lords used the flexibility of lordship structures to construct localised centres of authority in the landscape and become important actors in their own right Lordship was moreover only one of several forces which minor lords had to navigate Regional society in this period was profoundly shaped by overlapping ties of lordship kinship and locality each of which could have a fundamental impact on relationships and behaviour These issues are studied within and across lords honours around religious houses and urban areas and in a close case study of the abbey of Burton upon Trent This book thus contextualises lordship within a wider landscape of power and influence **Communities, Politics, and Reformation in Early Modern Europe** Thomas Brady, 2021-10-25 The studies united in this volume explore themes of community politics religion gender and social conflict and accommodation during the first decades of the Reformation movement Other chapters investigate historiographical themes especially the interpretation of early modern German history Two longer chapters address European themes the historical sociology of early modern societies in terms of legal definitions of status and modern conceptions of economic class and the difference between central and western European development in a global context Taken together the studies explore the transition zone between medieval and modern history in both microhistorical especially urban and regional and broadly comparative contexts Some of the studies are supplementary to the author's books on the sixteenth century Protestant Reformation at Strasbourg in southern Germany and in the Holy Roman Empire **The Cambridge Illustrated History of the Middle Ages** Robert Fossier, 1986 This is the second volume of one of the finest general introductions to the medieval world of recent times first published in French by Armand Colin Volume II begins at

the turn of the millennium and covers the extraordinary rebirth of Europe in terms of demographic expansion agrarian settlement and organisation the establishment of towns and villages the ascendancy of the feudal system the appearance of formal states and kingdoms and the dramatic controlling ascendancy of the western Church In the east despite the external appearance of grandeur the Islamic countries were being torn apart by mutual rivalry while the Byzantine empire lost massive border territories through political and economic incompetence Full coverage is given to both east and west and their artistic heritage is displayed lavishly in many of the colour plates A comprehensive bibliography is also included

Later Medieval Europe Daniel Waley, Peter Denley, 2013-11-26 From the divine right of kings to the political philosophies of writers such as Machiavelli the medieval city states to the unification of Spain Daniel Waley and Peter Denley focus on the growing power of the state to illuminate changing political ideas in Europe between the thirteenth and sixteenth centuries Spanning the entire continent and beyond and using contemporary voices wherever possible the authors include substantial sections on economics religion and art and how developments in these areas fed into and were influenced by the transformation of political thinking The new edition takes the narrative beyond the confines of western Europe with chapters on East Central Europe and the Teutonic knights and the Portuguese expansion across the Atlantic The third edition of this classic introduction to the period includes even greater use of contemporary voices full reading lists and new chapters on East Central Europe and Portuguese exploration Suitable as an introductory text for undergraduate courses in Medieval Studies and Medieval European History

Bishops, Authority and Community in Northwestern Europe, c.1050-1150 John S. Ott, 2015-12 This important study of episcopal office and clerical identity in a socially and culturally dynamic region of medieval Europe examines the construction and representation of episcopal power and authority in the archdiocese of Reims during the sometimes turbulent century between 1050 and 1150 Drawing on a wide range of diplomatic hagiographical epistolary and other narrative sources John S Ott considers how bishops conceived of and projected their authority collectively and individually In examining episcopal professional identities and notions of office he explores how prelates used textual production and their physical landscapes to craft historical narratives and consolidate local and regional memories around ideals that established themselves as not only religious authorities but also cultural arbiters This study reveals that far from being reactive and hostile to cultural and religious change bishops regularly grappled with and sought to affect positively and to their advantage new and emerging cultural and religious norms

The Birth of Theory Andrew Cole, 2014-06-15 Modern theory needs a history lesson Neither Marx nor Nietzsche first gave us theory Hegel did To support this contention Andrew Cole's *The Birth of Theory* presents a refreshingly clear and lively account of the origins and legacy of Hegel's dialectic as theory Cole explains how Hegel boldly broke from modern philosophy when he adopted medieval dialectical habits of thought to fashion his own dialectic While his contemporaries rejected premodern dialectic as outdated dogma Hegel embraced both its emphasis on language as thought and its fascination with the categories of identity and

difference creating what we now recognize as theory distinct from systematic philosophy Not content merely to change philosophy Hegel also used this dialectic to expose the persistent archaism of modern life itself Cole shows establishing a method of social analysis that has influenced everyone from Marx and the nineteenth century Hegelians to Nietzsche and Bakhtin all the way to Deleuze and Jameson By uncovering these theoretical filiations across time *The Birth of Theory* will not only change the way we read Hegel but also the way we think about the histories of theory With chapters that powerfully reanimate the overly familiar topics of ideology commodity fetishism and political economy along with a groundbreaking reinterpretation of Hegel's famous master slave dialectic *The Birth of Theory* places the disciplines of philosophy literature and history in conversation with one another in an unprecedented way Daring to reconcile the sworn enemies of Hegelianism and Deleuzianism this timely book will revitalize dialectics for the twenty first century

Aye D'Avignon Ellen Rose Woods, 1978 *The Salian Century* Stefan Weinfurter, 1999 An important interpretation of a major epoch in German history John Freed Illinois State University

Constitutionalism and Society in Africa Okon Akiba, 2017-03-02 The issues addressed in this rewarding book provide new insight into the way we conceive reflect and study the problems of political transformation and constitution making in Africa The study provides a refreshingly in depth analysis of the strengths and weaknesses of constitutional provisions for managing the challenges of race religion ethnicity citizenship civil liberties and civil military relations in Africa's transitional democracies Tracing emerging trends in constitution making it blends the theory of constitutional democracy with case studies and defines the imperative of social justice

Max Weber on Power and Social Stratification Catherine Brennan, 2020-07-09 First published in 1997 this book revolves around a textual analysis of the Weberian thesis that classes status groups and parties are phenomena of the distribution of power within a community An internal reconstruction of Weber's own ideas on what is called social stratification in contemporary sociological discourse is undertaken The reason for this reconstruction inheres in the fact that Weber's thought especially in the field of social stratification has been modified and misappropriated to such an extent that Weber himself is usually lost in the commentaries

Moreover this reconstruction is crucial because the secondary literature does not contain a single account teasing out the analytic structure underlying Weber's statements on the nature of social inequality in various societies. It is the principal intention of the book then to retrieve the essential form and significance of Weber's ideas on social stratification. Chivalry and Knighthood in Scotland, 1424-1513 Katie Stevenson, 2006. This work considers how chivalry was interpreted in 15th century Scotland and how it compared with European ideas of chivalry, the responsibilities of knighthood in this period and the impact on political life, the chivalric literature and the relevance of Christian components of chivalric culture. Nobility and Annihilation in Marguerite Porete's Mirror of Simple Souls Joanne Maguire Robinson, 2012-02-01. This first book length study of Marguerite Porete's important mystical text *The Mirror of Simple Souls* examines Porete's esoteric and optimistic doctrine of annihilation, the complete transformative union of the soul into God in its philosophical and historical contexts. Porete was burned at the stake as a relapsed heretic in 1310. Her theological treatise survived the flames but it circulated anonymously or under male pseudonyms until 1946 and her message endures as testament to a distinctive form of medieval spirituality. Robinson begins by focusing on traditional speculations regarding the origin, nature, limitations and destiny of humankind. She then examines Porete's work in its more immediate historical and literary contexts, focusing on the ways in which Porete conceptualizes and expresses her radical doctrine of annihilation through contemporary metaphors of lineage and nobility.

The North Atlantic Frontier of Medieval Europe James Muldoon, 2017-05-15. Discussion of medieval European expansion tends to focus on expansion eastward and the crusades. The selection of studies reprinted here however focuses on the other end of Eurasia where dwelled the warlike Celts and beyond whom lay the north seas and the awesome Atlantic Ocean, formidable obstacles to expansion westward. This volume looks first at the legacy of the Viking expansion which had briefly created a network stretching across the sea from Britain and Ireland to North America and had demonstrated that the Atlantic could be crossed and land reached. The next sections deal with the English expansion in the western and northern British Isles. In the 12th century the Normans began the process of subjugating the Celts, thus inaugurating for the English an experience which was to prove crucial when colonizing the Americas in the 17th century. Medieval Ireland in particular served as a laboratory for the development of imperial institutions, attitudes and ideologies that shaped the creation of the British Empire and served as a staging area for further expansion westward.
