*Loren Eiseley, the Development of a Writer* Ervin Fred Carlisle, 1983      **Encyclopedia of the Essay** Tracy Chevalier, 2012-10-12 This groundbreaking new source of international scope defines the essay as nonfictional prose texts of between one and 50 pages in length The more than 500 entries by 275 contributors include entries on nationalities various categories of essays such as generic such as sermons aphorisms individual major works notable writers and periodicals that created a market for essays and particularly famous or significant essays The preface details the historical development of the essay and the alphabetically arranged entries usually include biographical sketch nationality era selected writings list additional readings and anthologies      [Biographical Dictionary of American and Canadian Naturalists and Environmentalists](#) George A. Cevasco, Lorne Hammond, Richard Harmond, Keir B. Sterling, 1997-12-09 Casting a wide net this volume provides personal and professional information on some 445 American and Canadian naturalists and environmentalists who lived from the late 15th century to the late 20th century It includes explorers who published works on the natural history of North America conservationists ecologists environmentalists wildlife management specialists park planners national park administrators zoologists botanists natural historians geographers geologists academics museum scientists and administrators military personnel travellers government officials political figures and writers and artists concerned with the environment Some of the subjects are well known The accomplishments of others are little known Each entry contains a succinct but careful evaluation of the subject's career and contributions Entries also include up to date bibliographies and information concerning manuscript sources      *Visions of the Land* Michael A. Bryson, 2002-06-29 The work of John Charles Fremont Richard Byrd Charlotte Perkins Gilman John Wesley Powell Susan Cooper Rachel Carson and Loren Eiseley represents a widely divergent body of writing Yet despite their range of genres including exploration narratives technical reports natural histories scientific autobiographies fictional utopias nature writing and popular scientific literature these seven authors produced strikingly connected representations of nature and the practice of science in America from about 1840 to 1970 Michael A Bryson provides a thoughtful examination of the authors their work and the ways in which science and nature unite them *Visions of the Land* explores how our environmental attitudes have influenced and been shaped by various scientific perspectives from the time of western expansion and geographic exploration in the mid nineteenth century to the start of the contemporary environmental movement in the twentieth century Bryson offers a literary critical analysis of how writers of different backgrounds scientific training and geographic experiences represented nature through various kinds of natural science from natural history to cartography to resource management to ecology and evolution and in the process explored the possibilities and limits of science itself *Visions of the Land* examines the varied sometimes conflicting but always fascinating ways in which we have defined the relations among science nature language and the human community Ultimately it is an extended meditation on the capacity of using science to live well within nature      *American*

*Literature and Science* Robert Scholnick, 2021-10-21 Literature and science are two disciplines often thought to be unrelated if not actually antagonistic But Robert J Scholnick points out that these areas of learning up through the beginning of the nineteenth century were understood as parts of a unitary endeavor By mid century they had diverged but literature and science have continued to interact conflict and illuminate each other In this innovative work twelve leaders in this emerging interdisciplinary field explore the long engagement of American writers with science and uncover science s conflicting meanings as a central dimension of the nation s conception of itself Reaching back to the Puritan poet minister physician Edward Taylor who wrote at the beginning of the scientific revolution and forward to Thomas Pynchon novelist of the cybernetic age this collection of original essays contains essential work on major writers including Franklin Jefferson Poe Emerson Thoreau Twain Hart Crane Dos Passos and Charles Olson Through its exploration of the ways that American writers have found in science and technology a vital imaginative stimulus even while resisting their destructive applications this book points towards a reconciliation and integration within culture An innovative look at a neglected dimension of our literary tradition American Literature and Science stands as both a definition of the field and an invitation to others to continue and extend new modes of inquiry

Dunér,2025-03-18 The evolutionary biologist Julian Huxley 1887 1975 attempted to promote a religion for the future which he would come to refer to as Transhumanism Transhumanism was an attempt to unite a more traditional humanistic view of the human as containing some form of core essence or potential with an evolutionary point of view of humans as a work in progress Before humans natural selection had been responsible for the transformation of life Through its ordering principles and through chance it had given rise to humankind which had ushered in a new phase of evolution Humanity stood on the threshold of yet another critical point in evolution The consciously purposive phase of evolution This open access book explores the history of transhumanism by analyzing how Julian Huxley s transhumanism develops and why it does at this particular point in time by placing it firmly within the context of his specific scientific and sociopolitical milieu starting roughly in the interwar years and stretching over the Second World War to the 1970s Continuing the study then focuses on the new transhumanists of the 1970s 1980s and 1990s and investigates continuity in mode of thinking contributing to a more coherent understanding of transhumanism its history and of modern projects of human enhancement The book captures how
